At the Theaters

The famous old Garden theater in New York was used for the staging of important scenes in "An American Widow," a Metro wonderplay starring Ethel Barrymore, which will be the attraction at the Orpheus theater Thursday and Friday.

The story called for scenes showing the premiere of a comedy success on the stage with a capacity first night audience, and the presence of the author and his wife in a lower box. A score or more of high powered studio lights were installed for the photographing of these theater scenes.

Ethel Barrymore, as the "widow," appears in a lower box and Irving Cummings, as the author, steps before the curtains and delivers an address at the call of "author, author." Several farcical scenes of the "author's" play are enacted on the stage, therefore showing a play within a play.
