

NATION WILD OVER COMING PEACE

HUN DELEGATES NOW BEFORE FOCH

"NOT YET, BUT SOON," IS THE DRIFT OF REPORTS COMING IN BY ASSOCIATED PRESS FROM WASHINGTON TODAY

GERMAN DELEGATION IS RECEIVED AT FIVE O'CLOCK—GIANT CELEBRATION OVER ENTIRE UNITED STATES

In company with the rest of the United States and the entire world, Klamath Falls is today celebrating in a most vociferous manner the signing of the armistice submitted by the Allied nations, virtually amounting to an unconditional surrender on the part of the Teutonic forces.

The jollifying was started by a "flash" sent out by the telegraph companies this morning to the effect that the armistice had been signed, and that fighting was suspended at 2 o'clock this afternoon. While this was premature to some extent, the rumor was acted upon with the same avidity as would have occurred had it been signed and sealed by all the officials of the powers that be.

No official substantiation of the rumor has been received as yet, but the feeling prevails that it is founded on fact, and all that is lacking for the official confirmation is the time needed to make the announcement after absolute facts have been ascertained.

In all cities of the Nation, large and small, the glorifying goes on. Word comes that San Francisco has gone hog wild, and that influenza masks have been thrown to the winds in order to give the denizens of that metropolis room to voice their feelings in a proper manner.

In Washington the President left his luncheon to appear at a window of the White House and wave his napkin at the throng congregated to express their joy at the news.

Secretary Lansing, it is true, claims to have received a cablegram to the effect that the armistice had not been signed as yet. But notwithstanding this fact, the jollification still goes on, and the joy of the populace will not be downed. The feeling predominates that the articles have already been signed, and even those who cannot wholly believe the joyful tidings, feel assured that something has taken place to justify such a wide-spread acceptance of the fact that PEACE HAS COME.

PARIS, Nov. 7.—It is officially announced that four German officers bearing white flags will probably arrive at the headquarters of Marshall Foch tonight.

WASHINGTON, D. C., Nov. 7.—Secretary Lansing authorized the statement that the German armistice delegates would not be received by General Foch until 5 o'clock this afternoon.

The secretary's announcement came after Washington had been celebrating for two hours on the strength of the unofficial report that the armistice terms had been accepted, despite the fact that officials did not accept the report as true. Demonstrations are persisting.

The President left his lunch table to see from the veranda what was going on outside, and waved his napkin before the White House gates. The Lansing reply was based on a message of inquiry rushed to Paris when the rumor originated.

WASHINGTON, D. C., Nov. 7.—Navy cable censors received an unofficial message from abroad announcing that the Germans had signed terms of armistice, but there was no authority for the rumor, and officials said nothing but an official dispatch could be believed.

It is assumed that the German envoys have been conducted thru the French lines some time today, however.

FLOUR MILL AT MALIN TO BE LAUNCHED

MACHINERY HAS ARRIVED FOR NEW PLANT AND IS TO BE INSTALLED AT ONCE. IS CO-OPERATIVE VENTURE.

That the machinery for the new flour mill at Malin thirty-five miles southeast of the city has arrived and will be taken at once and installed, is the announcement made by A. Kallne, one of the principal stockholders of this new co-operative enterprise, known as the Malin Milling Company. The bumper crops which have been produced by the fertile irrigated lands of that section in the last few years, have warranted the move which was launched several years ago.

The plant which will start as a twenty five daily barrel operation is being built with the idea of taking care of double this amount. It will cost approximately \$25,000. The grinding operations will start as soon as the machinery can be installed, and a very heavy investment has been made in grain.
