A special election by the people of the Third Ward has been ordered by the city council for December 12th, to fill the vacancy caused by the resignation of Councilman I. R. Strable.

Why are you so tired after dancing?

Simply because you have put an unnatural strain on the arches of your feet. Nature intended the weight to be distributed evenly. Shoes center the weight by making bridges of your arches. Take warning before your arches weaken and break down. The

Wizard  
Adjustable  
Arch Builder

provides the support nature intended your arches to have. By distributing the weight of your body evenly over the feet the strain is avoided and serious consequences averted. You can walk, dance or stand without becoming unnaturally tired. The Wizard Adjustable Arch Builder is not an ordinary metal plate arch support. It is a featherlight, flexible, all leather device that can be adjusted to fit your arch by simply arranging the inserts in the pockets so that they feel comfortable. They give instant and permanent relief. If you have been wearing ordinary arch supports change and get a pair of Wizard Arch Builders. By gradual adjustments at home, you can build up your own arch to normal, with ease and comfort.

Soldiers to Build  
Oregon's Highways

SALEM, Nov. 19.—How many skilled men will the Oregon state highway department need in connection with its road building next year?

That is the substance of the question received by State Highway Engineer Herbert Nunn from Chairman Page of the United States highways council, who is gathering the information for submission to the secretary of agriculture.

The information is being assembled in connection with the government's plan to provide for returning soldiers.

If the highway building program proceeds on full schedule next year, as it probably will, places will be open for hundreds of skilled men. However State Highway Engineer Nunn says that the full extent of the highway program will not be known until after the highway commission meets on November 22.

There will be available for expenditure by the state next year on highway work approximately \$6,000,000, according to Mr. Nunn. In addition there will be the sums which will be put up by the government in match-

ing post road and forest road money, and the contributions of the various counties to the road building program.

This year when the highway work was under full swing approximately 3000 men were employed directly by the state highway department. Of that number 600 were classified as skilled.

State Highway Engineer Nunn points out that the use of labor saving machinery and auto trucks is steadily increasing the number of skilled workmen required. On some jobs skilled men number 50 per cent of the entire crew. The skilled men include engineers, machinists, truck men, quarrymen and foremen.

Fifty-eight of the state highway engineer corps went into the army. Their positions are being held for them. All told about 400 men classified as skilled left the highway department for military service. They will be taken back and places will be open for many more, pointed out Mr. Nunn.

If there should be much bridge construction that also provides employment for many skilled men.
