BELGIANS WERE TOO CLEVER FOR

PARIS—(By Mail.)—The Libre Belgique, famous little patriotic paper printed and circulated by "underground" methods in occupied Bel-4.30 gium recently celebrated its fourth anniversary by publishing a special number with a portrait of General 1.70 von Falkenhausen, German governor general, with a scathing article hold-1.70 ing the general up to derision.

In some inexplicable way Von 14.85 Falkenhausen found a copy of the 24.00 paper in his overcost pocket. In his ge he summoned 40 of the most 3.50 skillful Berlin detectives and ordered them to find the culprits at all costs.

last number had been printed and arrested the printer, who was sentenced to 12 years imprisonment. Then the detectives proceeded to celebrate the victory by a hilarious banquet. With- this program, which he characterised in two weeks the Libre Beigique re-5.10 appeared with a photograph of the of the nation. detectives' banquet and sarcastic comments. And again the governor found a copy in his pocket.

These recent escapades of the Libre Belgique were told by a Belgian who has just escaped from the occupled regions. Asked how such tricks were possible he said:

"One of the explanations is that most of the Germans are to be bought for a few france; but there are also other reasons, and they will be fully revealed after Belgium itself has been freed."

SCHOOLS MUST

NUAL EXPORT ISSUED TODAY OUTLINES PLANS FOR RECON-STRUCTION PROBLEMS.

WASHINGTON, Dec. 12 .- Develpment of arid, swamp and cut-over lands to provide farms for returning soldiers, and improvement of the pub-lic school system to provide for Am-ericanisation of foreign-born citisens and the education of illiterate mountain white populations and negroes, are two big reconstruction problems, Secretary of the Interior Lane, says in his angual report made public to-

day. Schools, he added, should lay more emphasis on teaching trades.

Of immediate importance is the proposal that the government systematically go about the work of providing work for soldiers on existing irrigation projects in the west. Later, The Berlin detectives succeeded in finding the printing office where the should be put under way, and small farms sold to soldiers by the govern-

ment on long-system payment plan.
Mr. Lane outlined in detail his proposed methods of carrying out as part of the "looking ahead work"

Referring to the returning soldiers be said.

"Being Americans and being young, they will not ask or expect ensions. They will want work. They will want, if possible, a chance for a home of their own."

By systematic government development of idle lands, said Mr. Lane there will be provided immediate jobe for these men, labor markets will be protected against possible collapse by being swamped with a collapse by being swamped with a surplus of labor, re-established industries will be supplied with an immediate demand for their products, the movement of population to cities will be checked, many "best proven Americans" will be affixed permanently to agricultural occupations, and great areas of land now neglected and valuates will be brought into area.

great areas of land now neglected and valueless will be brought into use.

"As an immediate program," said the Secretary, "we should first offer an opportunity upon our present ir-rigation projects for all who wish work at clearing and leveling the land not now cultivated but for which water is available, or to which water can be brought under the pre-sont irrigation system, and that such tracts shall be developed under an appropriate land-settlement plan. This we can do at once and me whatever labor problem may be im-

"As a second step I would urge an appropriation for one or more of the

concurrently it would seem to me wise to undertake the draining of the largest irrigation schemes for which most promising projects—Govern-ment—owned land preferred, but, if privately, owned, the land to be bought at an appraisement made by the Farm Loan Board and subject to the approval of the Department of Agriculture.

"There is an alternative method ECRETARY OF INTERIOR IN AN. of dealing with private lands which stready has the approval of Congress being incorporated in the reclamation act. Under this a private owner agrees to sell his land to whoever gots the water right at an appraised price as a condition precedent to our undertaking the construction of ir-rigation work. Under such a plan there would be no difficulty whatever in securing control of any-sised bodies of cut-over or swamp lands that might be desired; the government would not buy the land, but the owner would look to the new settler for the price, and take it on such terms as the government itself would exact for its own expenditure upon the lands. Supplementing this there should be an opportunity given for the co-operation of all the states upon limited tracts which would be toolt with under state control and subject to the closest federal super-

> After a soldier has returned to his me, said Mr. Lane, if his old position is not open and he wishes to turn to an independent life "there would be laid before him a number of projects which the government had undertaken in the different sec scheme, another a drainage project, a third the development of a body of cut-over lands. The one would need to have great dams constructed to France impound and divert waters, a hydro electric plant, miles of canal and tunnel, perhaps, thousands of acres to be cleared and leveled, fenced and broken. This would mean years of work at good wages work in the open under housing conditions that would seem palatial to the soldier of the trench, and at the end a piece of land on which would be erected a house and barn, a farm home in a group of farm homes. For this he must pay But already he has received wage out of which he can have saved necessary first installment on place of 10 or 15 per cent. HOOD RIVER, Ore., Dec. 13.-If suggestions of some of the prominent church people of this city are realised, Hood River next year may have a single community Protestant church, attended by members of all denominations. The movement is meeting with much favor and organisation plans are already under way. A meeting was held recently to provide for future conferences of com-mittees from all Protestant denominations of the city.

Hood River has eight churches owning buildings. They include the Baptist, Christian, United Brethren, Unitarian, Episcopalian, Congrega-tionsi, Methodist and Christian and Missionary Alliance. Rev. W. H. Boddy, formerly co

nected with Reed College in Portland who has been successful in conduct-ing a union church in the Upper Valley, has promised his aid in effect-ing a community church. One of the rguments advanced in that the proresult in great economy and will in rease interest in church affairs.
