FAMINE FACES RESIDENTS OF PORTO RICANS

SAN JUAN, P. R., (Correspondence of the Associated Press)—Many towns in the island are without a single bag of rice and the shortage in many localities has brought about a condition described by those in a position to know as bordering on famine.

This food shortage is adding very greatly to the seriousness of the influenza epidemic and many deaths

are attributed not so much to the disease itself as to the complications brought about by lack of food.

Shipments of rice from New Orleans and other Gulf ports which are now from four to six weeks over due probably will bring some relief but in the meantime the island authorities anticipate much suffering and hardship that at present they seem powerless to prevent.

According to Albert E. Lee, Federal Food Commissioner and Chairman of the Porto Rico Food Commission, the question now is wholly one of transportation and the Commission has considered the local situation so serious that it has urged upon the United States Shipping Board the necessity of immediate relief. Help has been promised by the Shipping Board but so far the local Food Commission has not been advised of the sailing of any ships bringing rice. For the first time in a year and a

half the Food Commission has no reserve stock of rice on hand, all of its stock having been released as needed in anticipation of the arrival of the new crop. In order to provide the Red Cross with rice needed for the relief of earthquake sufferers the Commission was forced to pick up small lots of rice here and there.

Many sugar centrals in the island employing large quantities of labor have been scouring the island for rice at any price in order to provide food for the sick on their plantations. In many instances they have not been able to buy a single bag.

ITALY WILL NOT DEMOBILIZE YET

(By Associated Press).

ROME, Dec. 19.—Premier Orlando told the Senate that Italy was not in a position to demobilize a single man and that all war material should be kept intact. The immediate difficulties to be surmounted, he said had not been diminished but had increased.

He added that reparation for damages was a question outside discussion. President Wilson's principles, he continued, excluded an indemnity in the traditional sense of the word, but doubtless Italy would adopt the same policy regarding reparation as the other allies. A commission has been appointed to establish Italy's damages.
