PORTLAND SHIP
YARDS HOLDING
U. S. RECORD

PORTLAND, Or., Dec. 26.—A check on the statements and figures of the production of the various wood and steel yards on the Pacific coast reveals the fact that the Portland district not only has been the largest producer of ships on the Pacific Coast during the emergency resulting from the war, but has eclipsed every other shipbuilding center in the United States in the production of ships, says a statement prepared by the local Chamber of Commerce.

"In 1916 with six yards for wooden ships beginning operations but four wood ships were launched; in 1917 thirty-one wooden ships had slipped from the ways and the record for 1918, up to and including December 10, was one hundred and thirteen wooden ships, making the total for less than three years construction, one hundred and forty-eight wooden vessels.

"In steel construction, the record of production in Portland is remarkable from the fact that, while Portland is the largest lumber manufacturing city in the world she has developed a large new industry in the construction of ships of steel. In 1916, three steel yards were being constructed but no launching occurred. In the following year eight steel vessels were launched and the number of yards increased to five. In 1918 thus far, thirty-seven steel ships have been launched and several more soon will be ready to put into the Willamette, making a total of forty-five steel ships for less than two years operations."

There are at present 32,500 men engaged in shipbuilding and allied industries in Portland and the Portland district, and the monthly payroll is \$4,471,200. The contracts for 1918 called for \$230,000,000 the Chamber of Commerce reported.

WILL SOON ATTEND
PORTLAND CONVENTION.

FLU BAN IS
LIFTED FROM
CITY TODAY

FEW CASES OF DISEASE STILL HERE, BUT BELIEVED THAT FURTHER SPREAD OF EPIDEMIC CAN NOW BE CHECKED.

The city is open; hurrah! hurrah! After more than two months of comparative inaction, during which time the greatly dreaded Spanish influenza has held sway here, Klamath Falls again resumes its normal activities. Although there are a few cases still in town, it is believed by the authorities that the force of the epidemic has spent itself and that by a careful quarantine of the individual cases, it can be kept from spread in the future.

Since early in October, all public meetings, schools, movie theatres, pool halls and functions of any kind, necessitating assembling of persons in considerable numbers, have been strictly under the ban and the community has been obliged to proceed at half speed. Even with the precautions taken the results have been fearful. Forty deaths have occurred and about ten times that number of persons have suffered from the disease. Business has suffered a slump from which it will take months to recover. The school children, who will probably resume their work early next month, will have a hard time to catch up and complete the regular work assigned.

Following are the new cases reported today by the authorities: E. G. Walters, Mills Additt, Phil Motchenbacher and wife, Mrs. Alice Baldwin and Orval and Leonard Ford.

The American girl is expected to fly to Paris soon where she will enter the employ of the Red Cross. She may be accompanied on this proposed flight by Alice Fleener of San Francisco.

FIGHTERS FROM
KLAMATH WILL
GET BACK SOON

GALLANT REGIMENT OF ARTILLERY, IN WHICH SEVERAL LOCAL BOYS ARE ENLISTED WILL REACH NEW YORK SOON.

PORTLAND, Dec. 26.—The 65th artillery, which numbers many Oregon men in its ranks, will probably be in this country before the first of the year, according to official reports. The company was in the thick of the fighting for 12 weeks prior to the signing of the armistice, taking part in five major actions. Three times the 65th was cited for good work and firing, and established a record for moving the big guns.

The company entered the big fight from Rouroy, France. They participated in the big offensive at St. Mihiel. Later they were transferred to the Argonne forest where they were in the midst of terrible fighting. At Verdun they had the distinction to be the first foreign troops to enter the old town, and they fought side by side with the famous 17th French corps of the 4th French army, under command of General Gourard.

Klamath County is well represented in this famous regiment, Paul Hill, Clarence Montgomery, Elmer Lawrence, Ben Mitchell, Edgar McCullom, Robert Turner, Clifford Sevlts and Gerald Sears being among the number. These boys were stationed at Fort Stevens near Astoria previous to their removal to France.

KLAMATH MAN
TAKES BRIDE
FOR X-MAS

Whether Santa Claus brought his present down the chimney or not is a question that E. G. Argraves of this city has refused to discuss, but anyway he appears very happy with his "remembrance". St. Nicholas was assisted somewhat in the matter by the Reverend E. P. Lawrence yesterday forenoon at the Lawrence home at 34 and Jefferson when he pronounced Eugene George Argraves and Miss Etta Spiva man and wife. The ring ceremony was used.

The bride is a Sacramento girl who has made her home in this city for some time past. Mr. Argraves has resided in this city for a number of years where he is well known and has considerable property interests in the city and county. The young couple expect to remain here for a few weeks and then go east for their wedding trip.

CONGRESS ASKED TO
NAME WHEAT PRICES

WASHINGTON, D. C., Dec. 26.—The department of Agriculture and the Food Administration has recommended legislation to Congress to make effective wheat prices as a guarantee of the 1919 crop and to safeguard the government against losses by the suggested extension beyond June, first of the date for the purchase of the crop, the continuance of the Grain Corporation and the creation of a new agency to buy store and sell wheat offered to the government. Legislative provisions were suggested to protect the government against wheat or flour bought from foreign countries and to protect buyers of such wheat.
