

U. S. SEAPLANE, LARGEST IN THE WORLD, WHICH CARRIED FIFTY PASSENGERS

This is the first photograph the navy department has permitted to be published of the latest type of seaplane—the largest in the world. During a recent flight at Rockaway Beach, N. Y., it carried fifty passengers. Its official name is the N. C. 11. This machine, built by the Curtiss

Engineering corporation at Garden City, L. I., is propelled by three Liberty motors that develop 1,200 horsepower. It has a cruising speed of 80 miles an hour. An idea of the size of the giant flier is given by the number of persons standing under the wings, which spread 126 feet.

Spokane Is Planning Soldiers' Employment

SPOKANE, Wash., Jan. 17.—Plans for the occupation of returning soldiers are taking definite form in the case of several local organizations, and others are expected to take like measures in the near future, as soon as the problem becomes more urgent. So far the city, the local chamber of commerce and the Spokane Master Builders association have taken concrete steps, and the local immigration bureau of the federal immigration service is lending its co-operation.

Improvements, mainly in the form of road construction, to a total of \$7,500 has been announced by the city park board, which has stated that returned soldiers will be given preference in hiring workmen. Expenditures have been kept to a minimum for more than a year, only necessary maintenance work having been ordered by the park board. Accumulated funds now will be used to furnish employment to former warriors of the nation's uniform.

At a recent meeting of the master builders' association here, the members voted to give work first to returning soldiers, and established an employment bureau for the purpose

in the office of the organization. If sufficient jobs are not forthcoming, it was announced, efforts will be made to obtain outside employment.

The Spokane Chamber of Commerce has established an employment agent at its office, with J. L. Conway himself a returned soldier, donating his services as employment agent to establish communication between soldiers seeking work and employers with jobs for them. A number of positions already have been listed.

COLONEL SHARPE TO REMAIN AT CORVALLIS.

OREGON AGRICULTURAL COLLEGE, Corvallis, Jan. 17.—Colonel Alfred C. Sharpe has been relieved of his duties as commander of the S. A. T. C. of the College, and has been officially appointed professor of military science and tactics and commandant of cadets. The first R. O. T. C. drill took place this week. Captain P. J. Cooper now has charge of leading up the affairs of the S. A. T. C.

French Demand Guns That Fired on Paris

PARIS. (Correspondence of the Associated Press).—The French people want one of the German "Big Berthas" or supercannon which bombarded Paris to display in the Place de la Concorde as a souvenir of German frightfulness that failed of its purpose to destroy French morale.

The armistice does not stipulate that one of these instruments shall be surrendered but there is a movement to urge the government to demand it. There is no expectation that the Germans will include one of these weapons among the 2,500 guns they are required to give up under the armistice.

Facts obtained by military experts show that the first guns that fired upon Paris on March 23, last numbered three. They were installed near Mont-Joli, in the forest of Saint Gobain. Two were on the same railroad spur leading out of Laon while the third was a little further east in the vicinity of Crepy.

According to the latest information, the guns were pointed at an angle of more than 65 degrees, a charge of three hundred pounds of powder propelling the projectile to a height of one hundred thousand feet (nearly 19 miles) on its murderous mission to Paris. With every shot ten or twelve marine guns of sixteen or seventeen-inch calibre fired simultaneously upon targets unknown in order to conceal the location of supercannon. The shell was of 210 millimetre calibre (about eight inches). It weighed three hundred pounds but the charge of explosive contained therein varied between thirty and forty pounds.

In the manufacture of the shell resided an innovation of the Germans. It is said to have been made of special steel treated with tungsten so as to offer the maximum of resistance for a minimum of weight. The guns' only protection was in camouflage and it proved to be no protection at all as allied aviators soon located them. There is a report that several aviators Americans, French, British, lost their lives in locating the first three Berthas in the forest of St. Gobain but upon that point officials are silent.

However on March 27 one of the Berthas was blown up by an aerial torpedo which tore a hole in the

ground fifty feet in diameter a photograph of which has been taken. The second was put out of business in the last days of April, while the third of the original three was silent in May.

It is now asserted that two of these guns were remodeled into a larger calibre nine-inch and that these remodeled guns were the ones which resumed the shelling of Paris late in May last.

Subsequently the Germans succeeded in utilizing larger calibre guns for long distance firing for, in August they used a marine gun from near Soissons, firing a twelve and a half-inch shell. They were preparing to subject Paris to an intensive bombardment such as Dunkirk had to suffer when they were driven out of their Soissons-Chateau Thierry line by the counter-offensive of the Allies.

Commandant Mirbel, the military expert, who organized the Turkish artillery before the Germans assumed charge of the military affairs of that country, told the Associated Press that the whole secret of the German long distance gun lay in the invention of a special high explosive powder which could only be used in guns constructed with a special steel of extraordinary resisting power. The Germans had commenced the generalization of the process and they were manufacturing several guns similar to their Soissons one but Marshal Foch's offensive deranged their plans.

Bottles must be put out daily to insure delivery of milk. Tickets sold on and after February 1st, take new rate. Anyone wishing good milk and prompt service, call 15F3. ALTAMONT DAIRY, 15-4f

NINE ARE KILLED BY EXPLOSION OF TANK

BOSTON, Jan. 17.—Nine persons are known to have been killed and about 50 injured by the explosion of a huge tank of molasses on the water front off Commercial street, near Kearny Square. Eight bodies were removed from the wreckage and one man died at the relief hospital. Most of those injured suffered only from bruises.

The Price of Peace

"Great Scott, officer, how did these men come to be so badly bruised and battered up?" "Please, your honor, they were discussing the peace settlement."—Baltimore American.

With all respect to the venerable John Burroughs, who says that the time has come for Germany to repent openly, we would suggest that repenting openly is one of the easiest things a sinner does—it is repenting inwardly that counts. We should see to it that Germany repents all the way thru.—Chicago Daily News.

CLAUSE TELLS OF ELK HUNT

FORMER S. P. AGENT TELLS OF HIS LIFE IN FRANCE—YANKEE BOYS ARE BUSY OPERATING TRAINS

A letter just received from C. J. Clause, who was formerly agent for the Southern Pacific company here, and who is now with the transportation corps in France, with a title of master engineer, declares that it devolves upon the Yankee boys to operate 75 per cent of all the trains. There are over 10,000 American engines and engineers in France, he says.

Mr. Clause tells of going hunting with some French friends, and bagging an elk weighing over 500 pounds. The Frenchmen were greatly surprised, he says, when he extracted the teeth. He adds that he has been offered over \$200 for two of them. The writer, who made many friends while in the city, sends his regards to them.

Everyone Should Drink Hot Water in the Morning

Wash away all the stomach, liver, and bowel poisons before breakfast.

To feel your best day in and day out, to feel clean inside; no sour bile to coat your tongue and sicken your breath or dull your head; no constipation, bilious attacks, sick headache, colds, rheumatism or gassy, acid stomach, you must bathe on the inside like you bathe outside. This is vastly more important, because the skin pores do not absorb impurities into the blood, while the bowel pores do, says a well-known physician.

To keep these poisons and toxins well flushed from the stomach liver kidney and bowels drink before breakfast each day a glass of hot water with a teaspoonful of limestone phosphate in it. This will cleanse, purify and freshen the entire alimentary tract before putting more food into the stomach.

Get a quarter pound of limestone phosphate from your pharmacist. It is inexpensive and almost tasteless, except a sourish twinge which is not unpleasant. Drink phosphated hot water every morning to rid your system of these vile poisons and toxins; also to prevent their formation.

To feel like young folks feel; like you felt before your blood, nerves and muscles became saturated with an accumulation of body poisons, begin this treatment, and above all, keep it up! As soap and hot water act on the skin, cleansing, sweetening and purifying, so limestone phosphate and hot water before breakfast, act on the stomach, liver and bowels.—Adv.
