BOLSHEVISM IN THE COLLEGES.

One of the most striking examples of the easy indulgence with which the American republic not merely harbors, but fosters, propaganda aimed at its own destruction, is the extent to which socialism has been permitted to entrench itself in universities and colleges.

The first fact which we need to keep in mind is that socialism is of distinctly German origin, having been promulgated by Karl Marx and Frederick Engels, both Germans, and imported to America and every other country by German immigrants and refugees.

It is natural, for these reasons, that the Intercollegiate Socialist should contain an article on "The Soviet State of Russia," by C. Kuntz—a distinctly German name.

The soviet state seems to be the medium chosen by history for the realization of those ideals which formed but the veneer of the now tottering civilization, the ideals of liberty, equality and brotherhood and all that flows therefrom.

So the civilization of which the splendid emblems are the great democracies that overthrew German autocracy is "tottering" and the soviet state of which Lenin and Trotsky give us an example in Russia is to supplant it.

It is the work of the soviet state to put concrete content into the empty phrase of the passing civilization "All men are free and equal," by eradicating the cause of social inequality.

Such revision may open up before you a charming vision of the dawn of a new civilization rising in Russia in the form of the soviet state where in many of the ideals cherished by

humanity and heretofore deemed so remote and even doubtful of realization are to become reality thru applied communism.

FEW BILLS AT LEGISLATURE. SALEM, March 7.—Of the 821 bills introduced 436 have passed the legislature at the session just closed.
