

NOT THE SHADOW OF A DOUBT

GERMANY'S NEW GOVERNMENT TO CONTROL PRESS

ZURICH, (Correspondence of the Associated Press.)—According to reports reaching here from Berlin, the rulers of new Germany have resolved to surpass all the efforts of their predecessors in the exercise of official influence over the press.

Immediately opposite the German Foreign Office stands one of the palaces of the Royal House of Prussia, which of late years has been occupied by Prince Frederick Leopold, a cousin of the former Emperor. This palace is to become the headquarters of the new press bureau which the government will create soon. It will be more than a mere government department, for it also will contain a club for journalists.

One part of the palatial building, a

Berlin dispatch says, will be devoted to the offices of officials whose work will be that of inspiring the press, and the remainder will be transformed into luxurious clubrooms.

There will be a library, writing-rooms, reading-rooms, smoking-rooms, billiard-rooms, a restaurant, an American bar, lounge rooms and a gymnasium, with a telegraph office conveniently attached.

Every conceivable device, it is stated, will be employed to capture and retain the sympathies of newspaper men.

DASH FOR POLE ON SKIS PLANNED.

CHRISTIANIA, April 26.—The Norwegian government has arranged to put food depots at different places on Grant Land from Cape Columbia to Kobeson canal for the use of Knud Amundsen who, in the summer of 1920, expects to make a final dash for the Pole on skis and with sleighs by way of Grant land or Winter Harbour Melville Island.

The Danish explorer Knud Rasmussen soon will leave for Greenland with provisions for the food depots at Cape Columbia.

FLYING CIRCUS TO ADVERTISE VICTORY LOAN

American Aviators to Exhibit in at Least Nine Coast Cities During Campaign

A flying circus made up of twenty American aviators, a captured German submarine and 3000 feet of motion picture film showing actual fighting on the Western front will be three of the features used to attract attention to the Victory Loan which opens April 21.

The aviation feature will exhibit the American birdmen flying American, English and German planes and exhibitions will be made in at least nine of the larger cities of the district. This will be the most sensational feature of the campaign and in the fleet of eleven planes which will come to this district will be two captured German Fokkers, two British single seater Spads, two British combat S. E. 5's and five American Curtiss bombers.

The official itinerary has not been completed, but among the cities which will be visited are San Diego, Los Angeles, San Francisco, Sacramento, Portland, Seattle, Spokane, Boise City and Salt Lake City. Landing fields in all these cities are now being chosen.

Beware of small expenses; a small leak will sink a great ship.
Spend one penny less than thy class.

BACK WITH BIG TRUCK.

Louis Hoagland returned from Portland last evening driving a big Winther five ton truck and trailer for the Southern Oregon Auto Company.

BUSINESS MEN FEAR GERMAN ENCROACHMENT

LONDON, April 26.—London business men and British manufacturers whose plants are located outside of London are alarmed lest the Germans should again obtain profitable foothold in the country, and wide publicity is being given all information which tends to show that Germany

again expects to do business here. The latest is the publication of labels which Germans have prepared for the expected trade and which have been sent to London by soldiers with the Army of Occupation at Coblenz.

"Superior safety razors made of the best double refined cast steel made in Germany" reads one label, and "finest hollow-ground razors, set ready for use, warranted; made in Germany" is another. Still others carry the guarantee of the German manufacturing firm, and all of them bear the place of origin.

According to an announcement by the Board of Trade, the regulations against the importation of German goods in Great Britain are still in force, and there is no danger of a German trade invasion until these

have been removed. The British are jealously guarding their home trade from the German.

LEAVING FOR ASHLAND.

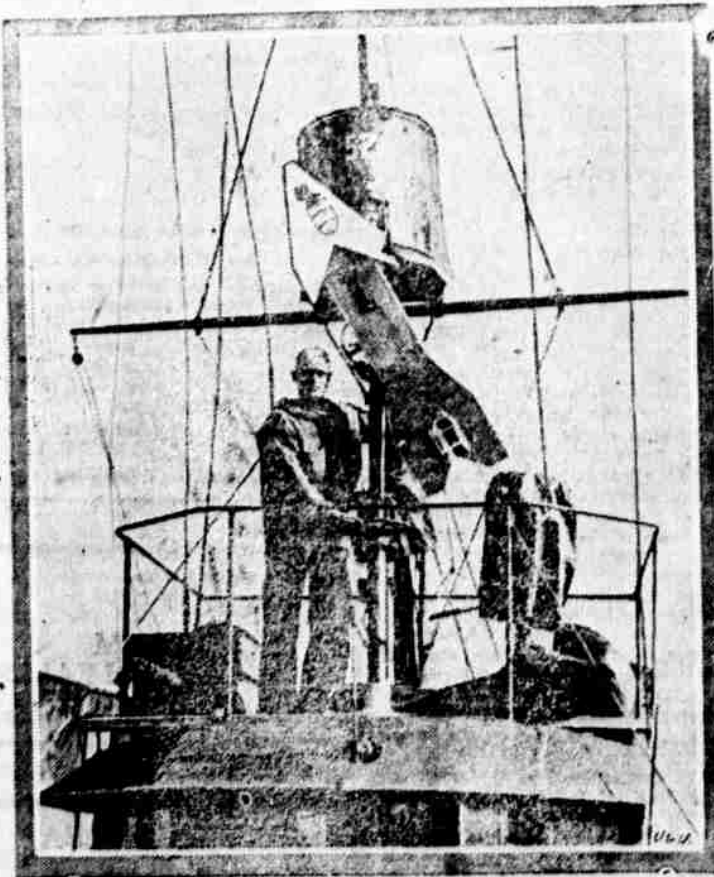

Miss Ina Caldwell, who for the past two months has been visiting with her sister, Mrs. E. H. Brouillard of Pelican City, will leave tomorrow for her home in Ashland.

One of the U-Boats' Most Deadly Enemies.

One of the most valuable aids in destroying U-boats was the detector tube with which our chasers were equipped. This device, which registered the slightest movement beneath the surface of the water, was connected with a large arrow. This arrow would point out the position of the submarine to the members of

the chaser squadron which would surround the spot indicated and drop depth bombs. The U-boat would be in great danger even if running far below the surface. The Navy Department carefully guarded the secret of the detector tube's construction during the war and this is the first photograph showing the operation of the arrow indicated.
