**SERVICE**

What the public is interested in, insofar as power and light companies are concerned is SERVICE. If a power company does not give proper service, the consideration which the public has extended to the power company is not returned. Enlightened modern management recognizes this fact and therefore makes every effort within its financial and physical ability to render such service. This is not only a sentimental consideration. It is best business policy. No power company can successfully operate in a community amid dissension, discord and dissatisfaction between itself and its patrons. It has been the experience of this company that its efforts to render good service have been understood and appreciated, and that it has been supported in its endeavors to so arrange its affairs as to give such service.

The year just passed has been an extremely trying one. Many of our men were called to the colors. Requisition by the Government for war time needs made it impossible to secure many kinds of equipment and material used in our business, and what could be obtained by release was most expensive, still we struggled on for SERVICE, and it has been a matter of special gratification to the company to note the cheerfulness with which our patrons have excused the little interruptions which conditions made it impossible to avoid. The current year will see an improvement which we believe will fully satisfy our friends.
