#### Our WITCH HAZEL

Many preparations are  
now on the market that  
are supposed to take the  
place of good old-fash-  
ioned witch hazel, but  
they have failed to rob  
it of its popularity.

There is nothing better  
for bruises, inflammations  
and minor wounds.

It is also excellent for

## CHILDREN WHO GO TO SCHOOL GET WELL PAID

## FRANCE HAS POOR CHANCE WITH ENEMY

SEATTLE, WASH., May 8.—The value  
of staying at school is stated in  
dollars and cents in figures compiled  
by the Bureau of Education and  
now being distributed to boys and  
girls throughout the country by the  
Children's Bureau.

From a study of a large number of  
actual cases it has been found that  
at 25 years of age the boy who re-  
mained in school until he was 18 had  
received \$2,000 more salary than the  
boy who left school at 14, and that  
the better educated youth was then  
receiving more than \$400 a year  
more in pay.

"This is equivalent to an invest-  
ment of \$1,000 at 5 per cent," the  
statement said. "You can increase  
this amount as fast in any other way."

"From this time on the salary of  
the better educated boy will rise  
still more rapidly, while the earnings  
of the boy who left school at 14 will  
increase but little."

While wages have increased with  
the war, the proportions shown in a  
table of weekly earning still hold  
true, the statement said. The boy  
who left school at 14 at the time  
the investigation was made received  
an average of \$4 a week, his wages  
increasing each year to \$7 a week at  
18. The boy who remained in school  
until he was 18 began work at \$10  
a week. At 20 the salaries were  
\$5.90 a week for the boy who left  
school early and \$15 for his better  
trained competitor. At 25 they were  
earning \$12.75 and \$31 respectively,  
and total wages up to that time had  
been \$5,287.50, so that the boy who  
remained in school had earned nearly  
50 percent more in eight years than  
the other lad in 12 years.

"Children should stay in school as  
long as possible because education  
means better jobs," the Children's  
Bureau urges. "Boys and girls who  
go to work at the end of grammar  
school rarely get good jobs. The work  
they find to do is usually unskilled;  
it offers little training or chance for  
advancement. When they are older  
they find they are still untrained for  
the skilled work which offers a  
future. Education means higher wages."

"Many boys and girls when they  
leave school find work that offers a  
high wage to a beginner. But these  
wages seldom grow because the work  
requires no training.

"A position with a future and  
steadily increasing wages requires  
school training.

"Does it pay to continue your  
studies? Education means a successful  
and useful life; it pays the individual.  
Education means efficient workers;  
it pays the nation. Show this  
to your parents and ask them what  
they think about it. Stay in school!"

PARIS (Correspondence of the As-  
sociated Press). "I am afraid the  
peace Conference is going to let the  
Boches off too easily," said Professor  
Louis Buhus, deputy for the de-  
partment of the Seine, to the As-  
sociated Press today. Professor Buhus  
has made a special study of the  
economic situation in northern  
France produced by the destructive  
inactivity of the Germans. He has  
submitted to the Chamber of Deputies  
a detailed report of his findings.

"Are the Germans to be spared?"  
he asked. "With their industries un-  
broken they will have seized the  
markets long before we are ready to  
reopen with them if only President  
Wilson would commandeer us with his  
own eyes what utter ruin and des-  
olation they have brought upon our  
unhappy land."

"We have to see the destruction  
with their own eyes," he went on.  
"Such has been cleaned up already.  
With devilish ingenuity the Germans  
made a specialty of destroying the  
essential things. They even had a  
machine specially devised to destroy  
railway points. General Gouraud,  
who commands the northern section  
told me that it will take two years  
before the railway system is in proper  
working order again.

"Transportation is interlocked  
with all the big difficulties we have  
to cope with. There is the question  
of raw materials and the question of  
labor. If, by demobilization, we get  
labor we must transport the men to  
places where they are needed. Then  
we must house and feed them. There  
is neither food nor housing available.  
To provide it, we again need  
transportation.

"We are asked why we cannot  
make fuller use of the canals but  
these canals served as lines of defense  
for the enemy. Their banks are  
battered, they are full of debris and  
need dredging. Many of the locks are  
destroyed.

"The pits of the coal mining dis-  
trict are flooded in places. One or  
two may be worked partly in six to  
eight months but it will be five or  
six years before the mines are in  
proper working condition again.

Where are we to find the miners?

The country around is razed and  
devastated to a degree of which peo-  
ple have not the faintest idea. There  
is not a house left standing in Lens.  
How are we to lodge and feed a

mining population and how are we to  
regain our prewar output of 20,000,  
000 tons of coal a year which even  
then did not cover our home needs?

Asked if France was recovering  
any of the textile, metal manufac-  
turing or sugar refining machinery stolen  
by the Germans, he replied that it  
was difficult to transport it and most  
of the French plants were not yet  
ready to receive it. "I know cases of  
Germans approaching the original  
owners of machinery and offering to  
sell them back their own property  
they had stolen from them," he said.

"Then there is the agricultural  
question," he continued. "The arable  
soil in these parts is only ten inches  
deep. Beneath it is a sub-soil of bar-  
ren chalk. The good soil that grows  
wheat—where is it? The farmers will  
have to begin right from the begin-  
ning again, as the squatters did it in  
America; that is, they will have to  
prepare the soil for cultivation, labor  
and transportation again! Not in  
fifteen or twenty years will that  
soft produce anything in the way of  
food grain."

### CATTLE RANGE IS IN GREAT DEMAND

LEWISTON, Idaho, May 9.—J. G.  
Peterson of the United States department  
of agriculture has been in the city  
conferencing with O. P. Hender-  
shot, secretary of the Northwest  
Livestock show, regarding conditions  
in the livestock industry in Idaho.  
Mr. Peterson is in the bureau of animal  
husbandry and is making a survey  
of stock-raising conditions in the  
western states, with special regard  
to opening up new ranges for cattle.

The investigation is largely due to  
inquiries that have come to the federal  
department from discharged soldiers  
and other prospective settlers  
in this part of the country.
