Compare Goodrich 375's with other Ford Car Tires

If you have not used these husky, de luxe tires for the Ford car, go at once to a Goodrich dealer and say to him, "Give me a Goodrich Three-Seventy-Five."

Compare it with an ordinary Ford-size tire, and you will find it bigger and better in every way.

As a matter of figures and measurements, it is an inch bigger on the circumference, and much thicker in the cross section—that is, a 31 x 3 1/2 inch tire.

That extra size means a finer looking, easier riding Ford car to begin, and a longer lived car and tires in the end.

Though "Three-Seventy-Fives" cost a little more at the outset, built to meet the special needs of the Ford car and bring out its known virtues, they soon reveal a greater dollar economy, which makes it the better buy in the long run.

JUNGLE LAND IS COMING TO KLAMATH FALLS, NEXT MONDAY, MAY 12TH

Mamie Thornton and Her Military Elephants in a War Act in Barnes' Circus, May 12th.

Fifty-two carloads of wild animals are lights. The snapping of whips and pistol shots and the girls in the big wild animal circus will be in town at day break for a one day stand, according to Thos. Francis Heney, representative of the circus.

The event is of more than passing interest to this community. It is the day the small boy has been waiting for. Now the time draws near, and of course papa and mama just go to take care of the children, and incidentally recall moments of their own childhood.

Building a Big Circus City is an Exhibition of Efficiency. It is an education as well as a delight to watch the arrival and establishment under canvas of a Big Modern Circus. Get up at early dawn and watch the unloading of the long strings of circus cars, then follow the procession of horses and wagons to the show grounds and linger until the heavy canvases go in the air. Oh, Skippers! Look who is Here! Kiddies joy in the form of lions, tigers, leopards, wolves, hyenas, camels, elephants, zebras and what not from the land of the far away will perform like acrobats in big steel cages.

A traveling zoo valued at more than a million dollars will be camped beneath the white top of the largest circus of its kind in the world. Al G. Barnes has gathered from all parts of the world more wild and strange animals than any other living circusman and with his trainers, he has educated them to do the very tricks which are performed by human beings in other shows.

Hard, you say? Ask the girls who comprise his training staff. They've worked months in winter quarters training the jungle brutes to do the stunts they will perform in Klamath Falls for the amusement of the crowd.

It's like a great Roman arena. The Barnes Circus with the place of the

DEFENSE ASKING INSANE VERDICT

SEATTLE, May 10.—Ruth Garrison's attorneys have announced that their intention is now to ask the jury to find the girl "criminally insane" and will not ask that she be released or acquitted.

Even her parents believe that she should not be allowed her liberty.

We are always on the job ready to take care of your fire insurance. Chilcote & Smith, 623 Main st. 9-11

HAVE ROSY CHEEKS AND FEEL FRESH AS A DAISY—TRY THIS!

Says glass of hot water with phosphate before breakfast washes out poisons.

To see the tinge of healthy bloom in your face, to see your skin get clearer and clearer, to wake up without a headache, backache, coated tongue or a nasty breath, in fact, to feel your best, day in and day out, just try inside bathing every morning for one week.

Before breakfast each day, drink a glass of real hot water with a teaspoonful of limestone phosphate in it as a harmless means of washing from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases and acidity and gives one a splendid appetite for breakfast.

A quarter pound of limestone phosphate will cost very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the blood and internal organs. Those who are subject to constipation, bilious attacks, acid stomach, rheumatic twinges, also those whose skin is sallow and complexion pallid, are assured that one week of inside bathing will have them both looking and feeling better in every way.—Ad.

ORGANIZATION

When the American engineers appeared on the scene "Over There," the necessity of putting through one big job was apparent: Thousands of our boys were to follow; the big ships bringing them, and the big freighters loaded with supplies must be able to dock quickly, unload in haste and depart unhampered by delay of any kind, to bring more and more men and additional tons of food, supplies, ammunition, and the necessities of war, in order that success be assured right from the start.

A certain seaboard town, on the coast of France, had been selected as the most favorable port for the landing of these great ocean carriers, but the facilities to dock and store were far from adequate and haste was the important factor to save France.

Elaborate plans had been prepared by the French engineers for building suitable docks and warehouses, but they said it would take six years to complete them. The American engineers re-designed and built them in six months: ORGANIZATION did it.

So it is with everything else American today. Success in the operation of all the big things, in this age of wonderful accomplishment is through this medium. Public service corporations have been quick to realize this fact and their policy has undergone a change.

Organization sounds the death knell of the duplication of effort, it systematizes details, it brings unity of action, it produces the most for the least, it makes a smooth running machine whose product is service.

This is the reason why, in this day of progress and development, modern cities and great manufacturing industries prefer to be doing business with large concerns engaged in supplying electric energy; this is why the systems and plants of big power companies are being tied together to secure the most efficient service through organization.
