# IT WILL MAKE YOU

# FAT

Scientists and dieticians of today are advocating the excessive use of Butter for anemics. They have found that Butter and Cream and Milk are Nature's builders. That is why when you go in a Sanitarium they put you in bed and they stuff you with these three articles of food and you begin to put on fat almost immediately. If the people would do the same thing at home it would not be necessary for them to go to bed nor to go to a Sanitarium. But they should be careful of the kind of Butter they use. Here you should use Klamath Creamery Butter. When you use it you know that you are not poisoning your system with impurities, but that you are eating the purest and best article of food that it is possible for human agencies to produce. It is made here where you can see how it is handled and where you can convince yourself that everything connected with its production is as it should be. When you buy Klamath Creamery Butter you do not buy inferior Butter. Insist on getting it.
