IS IT NOW OR NEVER?

A final effort is to be made tomorrow night to put over the reorganization of the Commercial Club, and for that purpose there is to be held in the council chamber at 8 o'clock a meeting at which everyone interested in getting the new organization under way is asked to be present. Benjamin S. Worsley, of Astoria, who is known throughout the state because of his work in behalf of horticulture and agriculture, is in the city, and it is for the purpose of giving the people of this city and county an opportunity of hearing him that the meeting is called. He will talk of the advantages of a progressive commercial organization and as he is a forceful talker it will be a privilege to hear him.

The necessity for an active Commercial Club is so apparent to everyone that it hardly needs discussion. Any business man or property owner recognizes the need of one, but when it comes right down to going to a meeting or putting forth any effort, he immediately joins the "let George do it" class. That is why this city is lumbering along without one, and why it will continue to do so unless something is done now to get one actually under way.

Klamath Falls needs a Commercial Club now as it never needed one before and the least those who want one can do is to come out to the meeting tomorrow night. It must be remembered that the time is at hand when something must be done about the location of factories in this city. The Herald has warned about this time and time again. It has told the people of Klamath Falls that the site for another town has been purchased and it tells them now that unless something is done three mills are going to be located there. That much is practically settled. There is also a possibility of two, and perhaps three, other mills joining with them. Now if the business men of Klamath Falls can sit quietly by and see this thing happen without the slightest effort to stop it, when it can be stopped; if the property owners of the city think that the mills have to come here, when they don't have to; if the working man who has his home here and wants to take advantage of the schools thinks it will not affect him, when it will; if the people in general think that this matter of a new town is none

BIRD-EYEING THE WILLARD-DEMPSEY FIGHT ARENA AND REFEREE

This photo of the Willard-Dempsey fight arena at Toledo, Ohio, was taken from an airplane at a height of about a thousand feet, showing the wonderful seating capacity of the immense structure. The inserted photograph is of Ollie Percord, official referee of the Toledo Boxing Commission, who was selected to officiate in the big scrap.

THIS IS HIM AGAIN.

Ollie Percord

In conclusion I might add that by the acquisition of the Keno Power Company property the City of Klamath Falls will come into possession of a water power that will meet the needs of the city for many years to come. We have a potential power here of between thirty and forty thousand horse power. Hoping that this information will be of interest to you I remain,

Very truly yours,

J. W. KERNS.

The statement referred to in the opening statement had to do, in a comparative way, with the expenses and income of the plant of the California, Oregon Power Company and a municipal plant, showing that operating under the same conditions as that prevailing for the California,

Oregon Power company, the city would have over \$12,000 a year to apply towards the retirement of the bonds, and \$8,000 additional, if the city furnished the power for the pumping plants. This statement was published at the time the original proposition was made to the city by the Kern Brothers.

It is understood that preliminary steps will be taken to get into communication with Kern Brothers and have them resubmit their proposition at the next meeting of the council, as it is the intention of the club to crowd the question to an immediate issue.

AMERICAN FINDS THE TALKING MONKEY

Professor Robert L. Garner, the American naturalist, has just returned from a three-year sojourn in the heart of Africa where he discovered "the talking monkey"—claiming they have a language all their own. He brought back the body of one of the species for the Smithsonian Institute at Washington, D. C.

IMPORTANT MEETING OF IMPROVEMENT CLUB.

An important meeting of the Women's Improvement club will be held in the council chambers of the city hall tomorrow afternoon at 2:30 o'clock. Every member of the club is urged to be present, for two matters of great interest to the organization will be up for consideration. The importance of this club to the city is becoming more manifest and the program for future work, which will be up for consideration at the meeting tomorrow afternoon, is sure to bring it and the members more and more into the limelight of public opinion, as well as approval.

SMILES, TEARS AND CHEERS FOR CHAMPION YANK FLYERS' HOMECOMING

She's happy. And you'd be happy, too, if your husband had commanded the first seaplane to fly the Atlantic ocean, and had just arrived home. It is Mrs. Albert C. Read, wife of Lieut. Com. Read of the U. S. Navy seaplane NC4, as she greeted her husband, on the transport off New York harbor upon his arrival. Wives and mothers of the flyers went down New York Bay to welcome the homecoming history makers.

Keep The Old Customer

This is more than a mere slogan—it's a resolution, so far as we are concerned. We are trying to conduct this business on a basis that will bring old customers back for more—and old customers help a lot toward bringing in new ones.

Of course, a good salesman can sell even a poor make of tires once. That's "putting one over"—but we would rather sell a good make of tires—please the people, and depend on the recognized merits of DIAMOND TIRES to keep the business going.

If you are looking for good tires—not risks—come in and see us; we are in business for steady customers.

We Have a Better Grain Binder for You

The next time you are in town, come in and look over the John Deere Binder. It's a machine that will give you extra years of service at less cost for repairs, and will do better work under abnormal field and weather conditions than other binders.

We want to show you many points about this machine not found in other binders that you will recognize as extra value.

Stronger wheels, heavier frame, reinforced platform, self-aligned bearings, roller bearings, three packers instead of two, hardened wearing surfaces on knotters parts, ground and polished packer shaft bearing and quick turn tongue truck are a few of the many points about this binder that make it serviceable, light draft and economical to operate.

You will appreciate what binder satisfaction truly is when you get a John Deere into your harvest fields.
