roll of approximately two hundred thousand dollars per month.

NAVIGABILITY. The Upper Klamath Lake which although a shallow lake has always been and is now used for navigation for passenger steamers and United States mail boats, freight and log towing boats. The lowering of the water three feet below average low water would make a very large portion of the lake unnavigable for even the towing of logs, and also destroy our log storage and render useless the canals which many of the operators have dug for their industries. The maintenance of the navigability of the lake is essential for the advantageous sale of a great quantity of timber owned by the United States Government in the United States Forest Service and also a great body of timber on the Indian lands of the Klamath Indian reservation.

INJURIES. The injuries which would sustain by the operation of the contract as written are as follows: The contract permits the lowering of the lake approximately three feet below the average low water occurring in a state of nature. This would make a large portion of the surface of the lake unnavigable and as timber and sawmill sites are located at various points channels would be unpractical for the movement of such bulky freight as logs in so many varying directions and the lowering would render useless the present ample log storage which storage is absolutely necessary for the present lumber industry and its unquestionable future development under favorable conditions.

Will you grant us the courtesy of a hearing in the above matters and especially before any further action is taken in regard to the matter of the dike contract or otherwise and also a full hearing relative to the effects upon us which would follow putting into effect the lowering of the lake as contemplated in the Power Company contract. We ask this because we are extremely anxious that timber manufacturing on Upper Klamath Lake should not be annihilated.

Gentlemen: You were kind enough to confer with us regarding the lake situation and we feel it to be fair and expedi-

ent that we should advise you that indeed be glad to confer with you, having in view the co-operative attempt to find a solution to our problems which would, if possible, not work a hardship on either of us.

The telegram is sent with the hope of finding a solution which will not threaten the timber and lumber industries on Upper Klamath Lake, and at the same time not work in-

SENATORS REFUSE TO TALK

WASHINGTON, July 18.—Republican senators refused to comment on the nature of their conferences with President Wilson today. Senators Kenyon, of Iowa, and Kellogg, of Minnesota, talked with the President. It was understood that he had later appointments with McNary of Oregon, and Capper, of Kansas.

U. S. ARMY OFFICERS WILL BE SUMMONED TO ANSWER CHARGES

WASHINGTON, July 18.—Army officers that composed the court martial that tried Lieutenant Smith, and Lieutenant Mason, formerly in charge of the American military prisoners in France, where the soldiers confined alleged that they had been beaten unmercifully, will be called before the House War Investigation Committee soon to explain the sentence they imposed. This is in accordance with the statement issued by Representative Dallinger, Republican from Massachusetts.

Congressman Dallinger said that the witnesses called "will testify that the trial of these two men was a 'joke'". Smith and Mason were only honorably discharged despite brutality. Smith arrived at Fort Jay, New York, recently. Some of his victims serving there beat him "to pulp" before guards intervened, according to Dallinger.
