Belgian Children Warned by Posters of Danger of Handling Unexploded Shells

Although the Germans have been out of Belgium for months, there are thousands of unexploded shells in the battle-scarred sections of the little kingdom. This is a photograph of one of the latest posters used to warn the Belgians, especially the children, of the danger of handling "duds." Despite the warnings, many persons have been injured.

COST OF LIVING IS CUT BY RED CROSS

BUCHAREST, July 21.—When the American Red Cross and the American Relief Administration commenced work here several months ago, sugar was selling at \$4.50 a pound, and almost impossible to obtain because of that price. Today it is still very scarce, but can be purchased at somewhere around \$1.00 due to the large relief shipments.

A "Hoover" ship with 900 tons of milk, about 3,000 tons of fat, and 3,000 tons of other foods, recently arrived at Constanza. Thousands of Rumanians participated in a great demonstration as the ship docked. These supplies did much to improve the situation.

Food is not the only commodity which has taken a fall. In the last month the price of thread has dropped from \$6.00 to \$1.50 a spool. Rumania is in great need of cloth and thread. A speculator who recently brought in a trunkload of cotton thread realized a profit of \$3,500 on his enterprise.

The high prices of necessities in this country are due in large measure to the crippled state of transportation. Tickets on the weekly train between Bucharest and Paris bring a premium as high as \$200.

Thanks to maternal comforts supplied without stint by her American friends, the "victory" baby is thriving.

A Thousand Yous

When you pick up your morning or afternoon newspaper and glance over the advertising you quite unconsciously multiply yourself a thousand times.

In half or three-quarters of an hour you can, metaphorically speaking, visit every progressive store in town. You virtually poke your head into every department of every department store. You run into the florist's, the confectioner's, the oculist's, the leading groceries, banks, theatres, all the various places that supply the things that make this the twentieth century and life worth the living. Here is a greater choice in clothing, food, furniture, books, pictures, musical instruments, travel, entertainment, opportunities for investment, the service of public utility corporations than any monarch of old could command.

It would easily take a thousand yous, traveling hard all day, to find out for yourself what the advertisements tell you in a few minutes morning or evening.

They deserve your attention. They deserve your confidence. Without them, without the progressive spirit of the merchants and manufacturers who back them, the great abundance of things you now enjoy would be a memory—or something still to be realized. Without advertising the prices you would have to pay for many of the necessities you now buy for a few pennies would make a dollar look like a snow ball on the kitchen range.

Read the advertisements. Read them for your own information and advantage. Read them to encourage the advertisers who are making these better things possible for you.
