AGENT THOMAS AND SULPHUR.

The attention of every business man and rancher of Klamath County is called to the work that is being done by County Agriculturist Thomas, and particularly to that being done in the matter of introducing the use of sulphur on the lands of the Klamath Basin. Mr. Thomas is the man Klamath county has been looking for. He came here under an immense handicap. At the beginning he received no encouragement. The ranchers had grown to look upon the work of agricultural agents with suspicion. Nothing practical nor tangible had come out of the work and it was an uphill task that the new man tackled. But he has won the day. The victory is not yet complete, but The Herald makes the prediction that within another year every rancher and business man in the county will be back of him and giving him the support that is so necessary to make his work the success it is going to be.

Though here but a few months he has accomplished wonders in the matter of killing off the gopher and the grasshopper and other pests that have cost the farmers of the valley thousands of dollars every year. There is still a great deal of work to be done along this line, but if the right kind of co-operation is given Mr. Thomas, a gopher and a grasshopper will be a curiosity in Klamath county.

While the work of killing off the pests has been going on, Mr. Thomas has been busy in another direction—that of increasing crop production. He has waged a successful campaign for the use of sulphur, and was able to induce a number of ranchers to invest quite heavily in its application. This is the first year in which it has been used in large quantities, and the results have surprised everyone, who has interested himself sufficiently to make an investigation. It is for the purpose of showing the people of the county what can be accomplished by the use of sulphur that Mr. Thomas plans to have an excursion to the various ranches where it has been used, so that the business man and the farmer can see for himself just what has been done.

This excursion will be held next Tuesday. The business men of the city should attend in a body. It is as vitally important to them to see the crop production increased as it is to the farmer. It will show Mr. Thomas that he has the support of the entire community. It will give him that courage necessary to carry him over the rough places that are ahead. It will be profitable for the community, which means for each individual.

It is needless to urge the farmer to be present. If he is progressive he will be there. If he is not, all the sulphur in christendom would have no influence on him. But there are few, if any, of the non-progressive type here, and the chances are that next Tuesday will be the turning point in the agricultural history of Klamath County.

RIOTS SPREAD OVER CHICAGO

Windy City in Throes of Great Racial War—Troops Not Called Out, and Governor Helpless to Order Out Soldiers.

CHICAGO, July 30.—Bitter fighting between the whites and negroes spread last night to all parts of Chicago. Serious casualties were more numerous than any similar period of the racial war. City authorities made no call for troops, and lacking such a request, Governor Lowden could not order the soldiers to take charge, although 8,000 are now resting on their arms.

The death list has reached twenty-eight. Two negroes were killed during last night's fighting, and hundreds of persons were injured. Whites and negroes slashed each other with knives, shot from ambush, and ran down isolated members of their opposite race and beat them. Some looting was carried on. Probably a dozen were fatally wounded.

The whites seemed more aggressive than the blacks. A grand jury will attempt to fix the responsibility for the riots.

MORE CAMP SITES ARE OPENED FOR ENTRY.

Earl Shepherd, who with his wife, is enjoying an outing at "Wiley's Camp" at Rocky Point, was in the city for a few hours today and as proof of his ability as an angler presented The Herald with a splendid specimen of the fine fish that have been caught there this year.

"I was surprised," said Mr. Shepherd, to learn that practically all of the summer camp sites that are being allotted by the Forest Service, of which a rental of five dollars a year is charged, are being taken by people who reside outside of Klamath County, and it occurred to me that someone is overlooking a bet. In a few years these sites will be valuable and then the people here will wake up to the fact that, like the timber claims, someone else owns them. I understand that sixteen more of them have just been opened for entry, and if this is true it affords local people a chance to get one and provide for the future.

If Mr. Shepherd's information is correct it will be possible to get full information about the sites from the Forest Supervisor, Medford, Oregon.

The Wisconsin Industrial Commission has set a minimum wage rate of 22 cents an hour for experienced women workers which, figuring a 55-hour week amounts to \$12.10, and a rate of 18 cents an hour for learners for a six months' period, amounting to \$9.90 a week.

Mrs. A. Whitman, who has been at the Blackburn hospital for some time, suffering from a nervous breakdown, was taken home today, and is reported as being much improved.

CANADA'S NEW PARLIAMENT BUILDING RISES FROM ASHES OF THE OLD, TYPIFYING RECONSTRUCTION

The destruction by fire of the old Parliament Building

The New Dominion Parliament Building

The spirit of reconstruction animating Canada to repair as quickly as possible the loss and wreck of war is typified in the rebuilding, more beautiful than before, of the great Dominion parliament building in Ottawa

From the completion of the old building, the cornerstone of which was laid by the Prince of Wales in 1860, up to its destruction during the present war, it was the crowning architectural feature of the capital city, standing on the summit of

Parliament Hill, whose limestone bluffs rise 150 feet sheer from the river passing through the city. The central tower of the building rose 180 feet from the ground.
Opinion is undecided as to whether or not the explosions and subsequent fire which destroyed this magnificent structure were the result of a German plot. At any event, all the efforts of the fire fighters were of no avail.
Now a new parliament house has risen from the ashes and will be a worthy monument to the era of reconstruction in Canada. The new building is nearly completed with the exception of the main tower, which will stand at the intersection of the walls.
The Prince of Wales will dedicate the new parliament building with appropriate ceremonies while on his visit to Canada and the United States this August.

MILLMAN IS FINED FOR FOREST FIRE

MEDFORD, July 30.—As a result of an investigation by an official of the United States forest service, W. Salsig of the Salsig Lumber company, operating up Anderson Creek, pleaded guilty to a charge of operating a donkey engine on forest land without an adequate spark arrester. The fire started by the engine spread

over about 300 acres. Mr. Salsig was fined \$25 and costs by Justice Taylor.
A determined effort is being made by the forest service, in co-operation with state officials, to reduce the number of fires by prosecuting all cases of negligence. During the past five years in Oregon there have been an average of 2,000 fires each year. Between 65 per cent and 75 per cent have been avoidable.

Incendiarism has averaged about 500 for each of the five years, or slightly more than four daily for the four months of the fire season. The careless camper is second. The men burning brush and slashing without a permit ranks third. About 200,000 acres within the national forests of the state were burned over during 1918, while the loss to private timber interests outside of the forest was \$1,107,743,000.

Little grains of dandruff mean good-by to Hair
Dandruff literally smother the life out of the hair roots and eventually brings baldness.
Wildroot is guaranteed to clean up dandruff and remove it. It does more; it cleanses, softens and loosens the scalp and stimulates the hair to normal, healthy growth.

WOODSTOCK
BACK OF THIS KEYBOARD
Are All The "Worth While" Features Found in Typewriters—Simplified and Improved
The standard typewriter is a machine of business—not of sentiment. It should be judged on its merits alone—not on its name or fame. Take the label off the bottle, take the stencil off the piano—the true musician, the real musician can tell, apply the same test to a typewriter.
The Fairbank Typewriter is a standard keyboard machine, with the eyes handfolded the Woodstock among them. Let your sense of touch and hearing alone tell you, and then try.
Put the Woodstock to this test, and then let your eyes behold its many other advantages. The Woodstock must be seen, must be felt and operated, to be appreciated. Give it that chance—better your typewriter equipment—it stays and grows in favor, because it is built to fit the hand, to fit the mood, to fit the job. Simplified and improved, the Woodstock with its self-cleaning mechanism has 20% less parts (20% less trouble). You get your own favorite machine and the best features of the best of others, in the Woodstock.

Shasta Sand
If you want permanent construction—the kind you will not have to replace in a short time, see that Shasta Sand is used.
Shasta Sand stands a higher test than any other sand on the Pacific Coast. That is way you should insist on its use. It costs you no more than poor material, and saves you the expense of repair work later.
