

General Just Back From Germany, Whose New Post Includes Mexican Border

Major General Joseph T. Dickman, just back from the other side where he was in command of the American Army of Occupation in Germany, was notified at the pier of his assignment to take charge of the Southern Division. His orders were to proceed to Fort Sam Houston, Texas. He goes to the Mexican border just as feeling is running high because of the Correll murder, the robbery of American sailors in Mexico, and the looting of the Atlantic Refining company's oil loading station at Puerto Lobos, Mexico.

Just Remember this. The dates for the Elks' Convention are August 14, 15 and 16. Get ready.

## GREEK THEATRE WILL BE BUILT

Striking Additions Will Be Constructed in New Griffith Park in Los Angeles—\$100,000 Will Be Spent.

LOS ANGELES, Cal., July 29.—A Greek theater, a Hall of Science and an observatory will be built in Griffith Park here and given to the city as the result of bequests in the will of the late Griffith J. Griffith which was filed recently for probate.

Several years ago, Col. Griffith gave to the city a tract of several thousand acres in the northwestern section of the city, skirting Hollywood and located in the foothills, for a public play-ground. The park was named in his honor and later he spent large sums in building roads, installing a zoo and making other improvements.

At least \$100,000 will be spent in the construction of the theater, the will reciting that the deceased "desires that the plans I have perfected during my lifetime for such a structure and commonly known as the 'health plan' be used as a basis for the theater as nearly as possible." Col. Griffith suggests that the theater be built in Vermont Canyon, one of the canyons running through the park.

The document continues to the effect that the remainder of the trust fund, totalling almost \$1,000,000, is to be devoted to the Hall of Science and the observatory which is to be located on the summit of Mt. Hollywood, a mountain peak rising out of the park. In the Hall of Science and the observatory, according to the will, is to be placed a collection of scientific instruments. The bill provides that these buildings be available to the public and that a motion picture theater be constructed in the Hall of Science. In the observatory, the will provides, a 12-inch telescope is to be installed, the codocils of the will bequeathing these improvements concluding:

"When my efforts are fully known they will show the fixed purpose to direct and aid the concentration of thought which lifts one above environment. I am anxious to have these improvements instructive and attractive fully believing that thereby many people can then be lifted out of the trenches of ignorance and superstition and placed on a higher plane of intelligence.

READ HERALD AD—IT PAYS  
Don't forget; the Elks will have a convention here August 14, 15 and 16. Get busy!

### SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, and almost every morning to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes, all denote liver uncleanness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless, and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out.—Adv.

## WALKED ACROSS U. S.

Mrs. J. N. Franklyn, 28-year-old nurse of Seattle, Wash., walked from her home to New York City winning \$2000 by the performance. She spent only \$28 on the trip. She could accept a "lift" if asked twice to ride. She carried an 18-pound pack.

Miss D. H. Furman, recently elected assistant secretary of a trust company in New York City, is the first woman to become an officer of any prominent banking institution in the metropolis.

## HE DID NOT WORK IN OVER A YEAR

MUNSON GAINS 18 POUNDS TAKING TANLAC—IS WELL AND STRONG AGAIN

"I have gained eighteen pounds since I commenced taking Tanlac and never felt better in my life than I do now," said Alek Munson, who, before his health failed, was a valued employe of the Foundation Ship Building Co., and lives at 1134 Michigan Avenue, Portland, Ore., the other day.

"When I began taking Tanlac," he continued, "I hadn't been able to hit a lick of work for over a year, and I had been suffering terribly from stomach trouble for about four years. It seemed to me that I had made every possible effort to overcome this trouble, but my condition gradually grew worse, and about a year ago I reached the point where I had to give up my work altogether. Everything I ate disagreed with me, and for two or three hours after meals I would be all bloated up with gas, and would have the worst cramping pains in the pit of my stomach a man ever had. Then, this gas would often get up into my chest and make my heart palpitate something awful, and it would be almost impossible for me to get a good breath. I also suffered from constipation and often had splitting headaches. I was very nervous all the time, and never got a good night's sleep. These troubles just continued to pull me down until I got so weak and run down that when I went to walk my legs would just give right down under me.

"The money I had spent for medicines and treatments might just as well have been thrown in the Columbia River so far as the good I got from it, but I thought I would keep on trying, and that is why I gave Tanlac a trial when it came along. Well, sir, before I had finished my first bottle of Tanlac, I could see that I had struck it right at last and I was right, too, for Tanlac certainly did just what they said it would do, and I am now a well, strong man again. My stomach troubles have all disappeared, and I am never bothered with gas forming, and I don't have those awful cramping spells any more. I have such a fine appetite that I can hardly get enough to eat, and everything I eat agrees with me all right. I have regained all my lost weight and strength, and am now getting ready to go back to work. Now, that is what Tanlac has done for me, and I think that is saying a whole lot for this wonderful medicine."

Tanlac is sold in Klamath Falls by the Star Drug Co., and in Lorella by the James Mercantile Co.—Adv.

# WASTE

During the late war people were taught not to waste. The reason for this was to secure that surplus above what was necessary in order that others might get the benefit thereof.

It found result in finding sufficient for all and was obtained through the kindly consideration of the other fellow in the equalizing of distribution.

True, some were selfish and for a time refused to lend aid to the scheme which comprehended a more equalized distribution to all, but the sharp eye of the Government searched them out and they were punished in the end.

1,584,000 gallons of Water is being pumped every twenty-four hours into the reservoirs supplying the twenty-two miles of distributing pipes which carry water to 1,019 customers in the City of Klamath Falls. This means that did each of these users receive a pro rata of water served, every service would be entitled to 1,554 gallons a day, or, based on a population of 5,000, about 316 gallons to each man, woman or child, every day. Such an amount is far in excess of all requirements, so that if any one or more users are being deprived of ample water for ALL PURPOSES, his neighbor is wasting.

No doubt the abuse of a flat rate service by a few is training the eye of the Public Utilities Commission on those who wilfully do not consider the rights of others and the punishment must follow in the installation of meters for everybody.

# IT'S A POOR DOCTOR Who Won't Take His Own Medicine

THAT'S WHY WE ARE USING THIS SPACE TO TELL YOU WHAT JOLLY LITTLE BUSINESS STIMULATORS HERALD WANT ADS ARE—AND WHY THEY GET RESULTS

THERE IS NO GUESSWORK about a Herald Want Ad. They do the business. We know they pay. Our customers have told us so time and again. We have used them ourselves and they have never failed to get results. They are the short cut to a quick turn-over—the modern method of merchandising on a small scale, where the value of the article to be sold or the importance of the want to be filled will not justify a heavy outlay.

If you had something to sell, trade or give away and went out on the street and told each person you met about what you wanted to do, you might get results—but the people you talked to would be very likely to say: "That poor fish has bats in his belfry." If, on the other hand, you used a Want Ad, you would talk to the whole county at once, instead of only one person, and do it in a businesslike manner.

The same rule applies to hiring help, renting a house, looking for a job, or any one of the important little incidents of life where you must call in the assistance of someone outside your immediate family. You MIGHT get results by telling your troubles to the neighbors—but the certain, quick and economical way is to use a little classified ad.

Do you want to buy, sell or trade, want to hire help or find work; do you want to find a room, a house to rent, or to rent the same to someone else; do you want to call attention to some new feature of your business, seek information on some subject, or have you any little unfilled want?
