

**STATE LIME PLANT CLOSING NEXT MONTH**

OREGON AGRICULTURAL COLLEGE, Corvallis, Aug. 7.—The state lime plant at Gold Hill will be closed down not later than September 15th unless more orders are placed. This is the announcement of Dr. A. B. Cordley, secretary, although the board as an organization has taken no definite action.

The Oregon Agricultural Experiment Station recommends that several farmers get together and place a trial order, to learn the effects of liming the soil. More than half of the hundreds of farmers reporting say that beneficial results have been obtained through the use of lime, but only by trials can the value be determined. Lack of storage capacity makes it necessary that at least 30 tons of ground limestone be sold from the plant every day.

A mirror could tell a lot of secrets if it could talk.

**DEAREST PUBLIC:**

Say, Bill, what the dickens was the matter yesterday you didn't come in and get one of these Elk emblems?

I ain't a lyin' about them, as they are the real class.

Every tooth that is mounted is a real Elk's tooth.

What do you care for money, you little health wrecker, for money, if you died and took it with you, it would either melt or burn, and now all you can buy is food, but I am giving you a chance to spend it for something that advertises you as a regular guy or devil.

Some folks make their own lives, and the reputation they have is the workings of someone's mind.

If you don't know where I am find me, and I'll come after you.

Don't forget about these emblems, as I am starvin'. Hurry up!

McHattan's, between heaven and earth and Sixth and Main streets, rite side.

**Exhibition Boxing Contest**

AT CHILOQUIN, ORE.

Next Saturday Night, at Duvall's Hall; between Bob Allen of Klamath Falls and Billy Huff of Tacoma.

10-ROUND BOUT

There will be preliminary 4-round bouts.

**The Necessity of Jewels**

The woman of today no more thinks of being unprovided with appropriate jewels than with suitable gowns. She realizes that she owes it to herself and her station to possess jewelry; she knows that money expended for jewels of quality is a judicious investment. At Upp's Jewelry Store she finds a profusion of worthy and suitable pieces from which to supply her needs.

**FOREST SURVEY BADLY NEEDED**

Newspapers Dependent Almost Entirely on Forests of Canada to Supply Them With Newsprint Paper.

WASHINGTON, Aug. 7.—Two-thirds of the newsprint paper used by American newspapers is imported or is manufactured from wood or pulp imported from Canada. One-third is made in the United States from wood grown in the United States. The former proportion is steadily increasing, the latter is steadily decreasing.

Nearly all of the American newsprint manufacturing industry is located in the Northeastern States—half of it in New York. Forests of wood suitable for pulp-making are being exhausted in the Northeastern States. At the present rate of depletion none to speak of will be left at the end of ten or twenty years.

But in the Pacific Northwest—Washington, Oregon, and part of California—and the Inland Empire of northwestern Montana and northern Idaho are great forests that have been no more than touched by the few pulp mills in that section of the country.

And in Alaska are enormous areas of forests—the annual growth of which would supply pulp enough for half of the newsprint paper used in the United States. No pulp mills are there.

For pulp mills have been established in the Northwest, and none have been established in Alaska, in part because of the disadvantage in freight rates in reaching the eastern markets. The Panama Canal is believed to have removed much of the reason for this disadvantage, but other obstacles—such as the disinclination of business to pioneer in new fields—remain.

Development of newsprint production in these regions is also retarded, it is believed, by the lack of authoritative knowledge of the extent and character of the available supplies of forest material, their location and accessibility, available water power, and the general situation which confronts the industry.

The practice of forestry, which now the only possible means of a permanent supply of domestic pulpwood in the East, it is believed, would be greatly stimulated by such a survey, which would develop in detail the seriousness of the situation.

The sum of existing conditions is that American newspapers are becoming more and more dependent upon foreign sources for the raw material from which newsprint paper is made; the raw material is being exhausted in the section where the domestic industry is concentrated, and mills are moving from this country to Canada; while at the same time the United States contains forest resources in the Northwest and in Alaska that promise abundant supply for many years, and indefinitely under proper conservation, if the industry can be built up in these regions.

A condition of dependence upon foreign supplies of newsprint carries with it serious possibilities not only for consumers of newsprint (chiefly our newspapers) but also for other business interests and the public generally. It would afford a dangerous opening for covert interference—the freedom of the press and with untrammelled development of business through advertising. That such a danger is not imaginary has been evidenced abroad.

A permanent domestic newsprint industry is therefore a matter of public importance. Its maintenance is believed to be entirely practicable if the proper public action is taken.

The Forest Service of the United States Department of Agriculture, to prevent American newspapers from becoming totally dependent upon a foreign supply, recommends:

Immediately, an adequate governmental survey of American resources in this field.

Immediately, steps to bring about the practice of forestry and the conservation of forests in the pulp-producing regions, to the end that the annual inroads upon the forests will be lessened, and eventually will be no more than equal to the annual growth. This part of the program would require Federal and State legislation.

As soon as practicable development of the pulp-making industry in the Northwest and in Alaska.

**SPECIAL NOTICE**

All Members of Local No. 1764, Millmen and Boxmakers' Union.

A most important matter will be considered at the regular meeting to be held on Thursday evening, August seventh. The subject is one of utmost importance to all of you, and you should not fail to attend. Bring along an eligible—which includes every man employed where you work.

**CARD OF THANKS.**

We wish to express to the general public our heart-felt thanks and gratitude for the floral offerings and prayers, and the many other evidences of friendship too numerous to mention during our terrible time of distress and anxiety.

DOCTOR G. C. MITCHELL,  
MRS. G. C. MITCHELL,  
GARRISON MITCHELL.

**DR. FREDERIC W. HOGG**

Eye-Sight Specialist of Portland, Or., is at the Marshall House for one week, commencing August 7th.

Dr. Hogg has had over 25 years practice in the scientific fitting of eye-glasses. He is a graduate from the McCormick School of Ophthalmology, Chicago.

If you have headaches, dizzy spells or black specks floating before the eye, or any nervous ailments, better have your eyes examined, for these symptoms all point to eye strain.

All school children should have their eyes examined by a competent Optometrist before returning to school. Dr. Hogg has had great success in straightening cross eyes with properly fitted glasses.

Remember, no charge for examination.

Home address, 407-408 Selling Building, Portland, Ore.

**PRINCE ALBERT**  
the national joy smoke

Tannyrad bags, tidy red tins, handsome pound and half-pound tin humidors—and that classy, practical pound crystal glass humidior with sponge moistener top that keeps the tobacco in such perfect condition.

Copyright 1919 by R. J. Reynolds Tobacco Co.

PUT it flush up to Prince Albert to produce more smoke happiness than you ever before collected! P. A.'s built to fit your smokeappetite like kids fit your hands! It has the jimdandiest flavor and coolness and fragrance you ever ran against!

Just what a whale of joy Prince Albert really is you want to find out the double-quickest thing you do next. And, put it down how you could smoke P. A. for hours without tongue bite or parching. Our exclusive patented process cuts out bite and parch.

Realize what it would mean to get set with a joy's jimmy pipe or the papers every once and a while. And, puff to beat the cards! Without a comeback! Why, P. A. is so good you feel like you'd just have to eat that fragrant smokel R. J. Reynolds Tobacco Company, Winston-Salem, N. C.
