

American Six-Footers Leading Bastille Day Parade in Paris.

American soldiers led the memorable Bastille Day parade in Paris. They are seen here marching down the Champs Elysees, a hand-picked regiment in which the requirements were that each doughboy must be a six-footer, and that he knew his business as a soldier. Each was up to their specifications. Following them were troops of every other allied nation.

MACHINES WILL MAKE SPEECHES

NEW YORK, Aug. 15.—Phonographs will be used by both the republican and democratic parties in the approaching presidential campaign. It is announced, the plan embracing a program which will permit the residents of small towns and remote hamlets to hear the speeches of eminent orators at the same time that the records are released in the large cities.

The phonographic campaign will be opened on September 1st, when records containing utterances by Attorney General Palmer, speaking for the democrats, and others registering the speech of United States Senator Lodge, voicing the sentiments of the republicans will be released. These speeches will be reproduced at clubs, societies' headquarters, churches, noonday meetings and in the homes of the party workers. Following the release of the speeches of Attorney General Palmer and Senator Lodge, other records will be distributed monthly, and it is expected that the meeting places and homes throughout the country will fairly echo and re-echo with the words of the orators as conveyed by means of talking machines. The extent of the part which phonographs may play in the campaign can be estimated by the statement that two manufacturers of the machines are known to have more than 2,000,000 phonographs in use in the United States. Among the speakers scheduled for phonographic oratory by the democratic national committee are President Wilson, Secretary of War Baker, Secretary of the Navy Daniels, former Secretary of the Treasury McAdoo and William J. Bryan. Former President Taft, Major General Wood, Elihu Root, Chauncey M. Depew and United States Senators Johnson and Borah are on the list of speakers chosen for talking-machine oratory by the republican national committee.

IMPETUS GIVEN TO GOLD MINING

End of the World War Opens Up Great Reservoirs of Natural Wealth in the Valley of the Amazon River.

PARA, Brazil, Aug. 15.—The ending of the World War has given a new impetus to the work of opening up the great reservoirs of natural wealth, from gold to fruits and valuable woods, which lie in the valley of the Amazon. Several expeditions of exploration are being organized here, one of the most important of which is under the direction of Henry S. Fleming of New York, United States Customs Receiver at Para, who will shortly start on a three months trip devoted to exploring the commercial possibilities of the vast region watered by the Amazon and its maze of tributaries.

The advance guard of another important expedition of scientists headed by Dr. Hamilton Rice of Boston and his wife, has passed thru here on its way to Manaus which will be headquarters of the venture. A specially equipped 45-foot motor launch will accommodate the party which plans to navigate the Rio Negro to its junction with the Orinoco in Venezuela.

General Rondon, the well-known Brazilian explorer who accompanied Colonel Roosevelt on his famous trip down the River of Doubt, now named the Rio Teodoro by the Brazilian government in honor of the former American president, has returned here after spending almost two years in surveying the wilds of the state of Matto Grosso on the borders of Bolivia. The territory explored by him lies to the southwest of the Paracis Range, northeast of which lies the Rio Teodoro. General Rondon reported the discovery of three new mountains and several new rivers. He also reported finding much evidence of rubber, caoutchoucipeac, cacao and other valuable forest products and said that he traversed large areas of gold-bearing country, especially in the region of the head waters of the Sao Miguel river.

Miss Sears in Unusual Pose at Society Games

Miss Eleanor Sears, horsewoman and lover of sports, is seen here with Frederick H. Prince on Red Wing at the Myopia Hunt games at Manchester-by-the-Sea.

Clear, Peachy Skin Awaits Anyone Who Drinks Hot Water

Says an inside bath, before breakfast helps us look and feel clean, sweet, fresh.

Sparkling and vivacious — merry, bright, alert—a good, clear skin and a natural, rosy, healthy complexion are assured only by pure blood. If only every man and woman could be induced to adopt the morning inside bath what a gratifying change would take place. Instead of the thousands of sickly, anaemic looking men, women and girls, with pasty or muddy complexions; instead of the multitudes of "nerve wrecks," "rundowns," "brain fags" and pessimists, we should see a virile, optimistic throng of rosy-cheek-

ed people everywhere. An inside bath is had by drinking each morning before breakfast a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour fermentations and poisons, thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach. Those subject to sick headache, biliousness, nasty breath, rheumatism, colds; and particularly those who have a pallid, sallow complexion and who are constipated very often, are urged to obtain a quarter pound of limestone phosphate at the drugstore, which will cost but a trifle, but is sufficient to demonstrate the quick and remarkable change in both health and appearance awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood, while the pores in the thirty feet of bowels do.—Adv.
