SECURING HOMES IS BIG PROBLEM

Special Commission is Appointed by President Carranza of Mexico, to Solve Problems of Immigration Facing That Country.

MEXICO CITY, July 30.—How to make homes for a million prospective new colonists, how to make those persons fit into the scheme of life here and how best to distribute them over the republic are question of immigration receiving the attention of a special commission appointed by President Carranza.

According to data collected by this committee on Articles of First Necessity one million persons will migrate from various European and Asiatic countries to Mexico, within the next year. They are expected to leave their native lands because of disrupted condition due to the war. Communications received here from England, France, Germany and Russia indicate that colonies of those nationals are already being formed and will embark for Mexico at an opportune moment.

Luis Luberty Rul, president of the investigating committee, has been quoted as saying that Mexico welcomes all dependable colonists.

MOTOR TRANSPORT CORPS LEADS ARMY IN RECRUITING

WASHINGTON, D. C., Aug. 19.—The Motor Transport Corps leads all other branches of the United States army in rate of recruiting in proportion to its authorized strength, according to official figures received at corps headquarters here. Since the beginning of the intensive campaign March 1st, 8,600 men have been accepted and sent to camps, an average of 400 a week.

The reason for the decided preference being shown by new recruits and by old men re-enlisting for the Motor Transport Corps is to be found in the plan of vocational training schools at the great M. T. C. base shops, the first of which, at Camp Holabird, is to be opened September 2d.

Under this plan a man may learn a basic trade from expert instructors in the finest shops of their kind in this country, and at the same time receive good pay and free clothing, shelter, medical and dental attention, altogether more than equivalent to \$100 per month in civil life. After completion of the basic course men of ambition who grade above the average will have the opportunity of receiving post graduate instruction in special lines for which they may be fitted, and finally it is planned to send men who stand out above their fellows in post graduate work to a high grade technical school for a year of special work, which will fit them for commissioned rank in the Motor Transport Corps, to become instructors in the M. T. C. schools or to occupy responsible positions in the automotive industry.

SAGE TEA KEEPS YOUR HAIR DARK

WHEN MIXED WITH SULPHUR TO BRINGS BACK ITS BEAUTIFUL LUSTRE AT ONCE

Gray hair, however handsome, denotes advancing age. We all know the advantages of a youthful appearance. Your hair is your charm. It makes or mars the face. When it fades, turns gray and looks streaked, just a few applications of Sage Tea and Sulphur enhances its appearance a hundred-fold.

Don't stay gray! Look young! Either prepare the recipe at home or get from any drug store a 50-cent bottle of "Wyeth's Sage and Sulphur Compound," which is merely the old time recipe improved by the addition of other ingredients. Thousands of folks recommend this ready-to-use preparation, because it darkens the hair beautifully, besides no one can possibly tell, as it darkens so naturally and evenly. You moisten a sponge or soft brush with it, drawing this through the hair, taking one small strand at a time. By morning the gray hair disappears; after another application or two, its natural color is restored and it becomes thick, glossy and lustrous, and you appear years younger.

YANKEE SAILORS GET PLENTY OF SEA-FISH

LONDON, Aug. 20.—American sailors on mine-sweeping duty in the North Sea, probably will not crave fish when they get back home. When mines are exploded in the process of clearing out the barrage, thousands of fish are killed. One of the little sub-chasers in the fleet scoops up hundreds of pounds of them each evening when operations cease for the day, and distributes them among the several vessels for food. The men enjoyed it for a time but now hate the sight of fish.

One catch included a salmon which was cruising around miles out from land. Anglers say that a salmon should not be so far from land.

SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, and almost every morning to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes, all denote liver uncleanness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless, and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out.—Adv.

ACID IN STOMACH SOURS THE FOOD

SAYS EXCESS OF HYDROCHLORIC ACID IS CAUSE OF INDIGESTION

A well-known authority states that stomach trouble and indigestion are nearly always due to acidity—acid stomach—and not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach retards digestion and starts food fermentation then our meals sour like arbage in a can, forming acid fluids and gases which inflate the stomach like a toy balloon. We then get that heavy, lumpy feeling in the chest, we eructate sour food, belch gas, or have heartburn, flatulence, waterbrash or nausea.

He tells us to lay aside all digestive aids and instead, get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast while it is effervescing, and furthermore, to continue this for one week. While relief follows the first dose, it is important to neutralize the acidity, remove the gas-making mass, start the liver, stimulate the kidneys the kidneys and thus promote a free flow of pure digestive juices.

Jad Salts is inexpensive and is made from the acid of grapes and lemon juice, combined with lithia and sodium phosphate. This harmless salts is used by thousands of people for stomach trouble with excellent results.—Adv.

WHY?

277 CITIES, TOWNS AND VILLAGES HAVE DEFUNCT MUNICIPAL LIGHTING PLANTS

Read the 1919 report of the Merchant's Association of New York:

"The 277 cities, towns and villages named below comprise but a part of those which after a trial of municipal ownership and operation of electric lighting plants, have ceased, in whole or in part, to operate the plants. In practically all these cases municipal operation was undertaken in the belief that the community would obtain electric service at materially less cost than if obtained from private companies. Experience demonstrates that this belief was mistaken. Most of the municipalities sold or scrapped their plants at a heavy sacrifice and thereafter obtained from private companies service at materially less cost."
