BRITISH WORRY OVER BUSINESS

Steel Manufacturers of England Perturbed Concerning Retention of Their Home Trade—Price Continually Increasing.

LONDON, Sept. 3.—British iron and steel manufacturers are seriously wondering whether they will be able to retain their home trade, not to speak of extending their export business, in the face of steadily increasing prices of materials and labor. Americans who have looked over the situation declare the British need not worry if they will adopt modern methods, for wages in the industry are much higher in America than they are in England.

Anxiety is chiefly confined to makers of railway materials, tools, machinery, engines, and those things which go to fit out the completed ship's power plant.

The British workman not only demands high wages, but he is charged with refusing to give its equivalent in labor, thus cutting down production and making it impossible for his

employer to fill contracts on time. America, awakening to the demands of Europe, is getting the bulk of the business, while Japan is a close second, according to high trade authorities. Even Germany, with its rioting workmen and lack of raw material, is after trade, and if report can be believed, is getting it.

As an instance of the trials which beset British manufacturers, it is pointed out that one company whose products had a world-wide sale before the war, has been able to obtain only one contract out of twenty in competition with German and United States bidders.

WONDER SPOT KNOWN BY NUMEROUS NAMES

Crater Lake has not always been known by its present title. It seems that many years ago nearly every party that made the visit to the wonder spot re-named it to suit their own fancy. The following news item, reprinted in the Oregonian a few days ago appeared originally in the Oregonian of August 27, 1869. It reads:

"A party from Jacksonville has returned from a trip to Sunken Lake. This sheet of water has a new name almost every year. First it was known at Blue Lake, then Sunken Lake, afterward Lake Majesty, and now Crater Lake."

LADIES DARKEN YOUR GRAY HAIR

USE GRANDMA'S SAGE TEA AND SULPHUR RECIPE AND NOBODY WILL KNOW

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She used it to keep her hair beautifully dark, glossy and attractive. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.

But brewing at home is messy and out-of-date. Nowadays, by asking at any drug store for a 50 cent bottle of "Wyeth's Sage and Sulphur Compound," you will get this famous old preparation, improved by the addition of other ingredients, which can be depended upon to restore natural color and beauty to the hair.

A well known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it, and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application or two, it becomes beautifully dark and glossy.

Hotpoint Range Model B

This is "Model D" Hotpoint Electric Range—"Queen" of the five models made by the Hotpoint people—has four surface cooking elements, high oven and warming oven; convenient shelf underneath for "pots and pans."

But the other models are fine, too. See them to know them.

We have engaged the services of Miss B. E. Galvin, expert Home Economist, from the Edison Electric Appliance Co., Inc., Chicago and Ontario, California, to prove to the home keepers of Klamath Falls that ELECTRIC COOKERY in the home means better cooked foods, an EASIER, quicker way of cooking the three meals a day, and a more delightful way of living.

Miss Galvin cordially invites every woman of our city to visit this demonstration and know the secrets of this delightful art as she will demonstrate it on a

Hotpoint Electric Range

Imagine stepping into your kitchen and finding at the turn of a switch (no more work than to turn on your electric light) cooking heat available! No smoke, no flame, no fuel fumes, no blackened walls, no "smutty" cooking dishes to wash—these are a few of the delights of electric cooking.

NO CARRYING OF WOOD, COAL, OIL NOR ASHES

Isn't that a wonderful amount of labor saved? It's worth your investigation.

SPECIAL COOKING RATE

Remember, you do not cook electrically at your lighting rate—your lighting company makes you a special rate. Ask us to explain.

DO COME IN—EVERY AFTERNOON, 2 to 5:30

Miss Galvin will demonstrate practically—actually cook on the HOTPOINT ELECTRIC RANGE, explaining in detail just how you would do it in your home. Many of our homekeepers came in yesterday afternoon, and were extravagant in their praise of this method of cooking.

ELECTRIC COOKERY

The homekeepers of our city are particularly favored in having an opportunity to know thoroughly the art of Electric Cookery through the daily work now being done at the Link River Electric Company's Store, Seventh and Main streets.

Especially are they favored in having the opportunity to learn of this delightful art through the work of Miss B. E. Galvin, Home Economist, from the Edison Electric Appliance Company, Inc., Chicago and Ontario, California. Miss Galvin has just finished very successful work in our neighboring city, Medford, where many of the homekeepers are now rejoicing that they cook on a Hotpoint Electric Range, which means the elimination of cooking drudgery.

The teaching of this delightful art, as it is being taught by Miss Galvin, is practical in every way, bringing out thoroughly the points so necessary for the homekeeper to understand—labor saved, time saved, the comfort, safety, cleanliness, economy and better cooked food.

Miss Galvin furnishes her visitors with a "bite" of the delicious cakes, pastries, etc., as proof of the good things electric cooking provides.

And the hours when this work is carried on is very convenient for the homekeepers of Klamath Falls—2 to 5:30 in the afternoon.

You Can Escape the Skin-Blemishing Effects of the Broiling Sun

On the links, in the surf, up on the mountains, out in the broad, open country, or wherever you may be this summer, you can escape the skin-blemishing effects of the broiling sun by using

Nyal's Face Cream

No tan, sunburn, freckles or other complexion ills are possible when this preparation is used. Protects the face, hands, neck and arms from sun and wind.
