

# HUN FLEET OF LITTLE NOTE

WITH THE AMERICAN FORCES IN GERMANY, Sept. 5.—An account of Germany's new "navy" is given in Mitschies, a German naval periodical, a recent issue of which has reached American headquarters, describes the iron torpedo boat and Haff flotillas both of which have been organized since the armistice.

The "iron flotilla" consists of twelve torpedo boats, which have been engaged in maintaining order on the western coast of Germany, says the paper. Some of the vessels have been used on several occasions for policing the port of Hamburg, such as guarding Allied food shipments to the Czech-Slovaks and similar work, during periods of disorder. The flotilla has its headquarters at Wilhelmshaven. A landing corps of about 360 men is distributed among the twelve boats, each of which has a platoon of thirty commanded by a naval lieutenant. The clothing and arms of members of this landing corps are the same as in the infantry.

**Machine Guns On Boats.**  
The Haff flotilla is supposed to be doing similar duty on the Baltic coast near the Russian boundary, with headquarters in Koenigsberg. The flotilla has been handicapped recently by delay in obtaining equipment needed to put the vessels in commission. The boats are armed with machine guns and in some cases with 3.7 centimetre guns as well. The flotilla was organized for operation in connection with the East Prussian Freiwillige corps and was, until a few weeks ago, subject to the commander of the northern army.

These two flotillas—excepting a few vessels which are either out of commission or of little or no use—constitute virtually all that is left in active service of the German navy.

# ASSUMES ENTIRE RESPONSIBILITY

PORTLAND, Sept. 4.—In the afternoon testimony that was received in the rigid Spruce investigation that the congressional committee is carrying on, Brigadier-General Disque assumed all responsibility for construction of the \$4,000,000 railroad, in Clallam County, Washington.

He declared he first tried to prevail on the Chicago-Milwaukee and St. Paul Railroad, of which John D. Ryan is the director, to build it. He then arranged for the government to build the road over Milwaukee Lake, for 10 per cent less than cost. Ryan, head of the aircraft board, did not participate in the negotiations, according to Disque.

### LAST SURVIVOR OF TREATY SIGNING OF 1864 GETS PENSION

Chief Lalo, who was recently granted a pension by the government, is the last remaining survivor who signed the treaty of 1864 which ended the Modoc War, according to Captain O. C. Applegate. Chief Lalo is 98 years of age.

Only 18 members of Captain Applegate's old company of 69 men, that fought in the Modoc War, are living at present. But seven of the 27 Indian Scouts are living. Ten of the

original scouts were Modoc Indians.

Chief Lalo, Reuben Konoki, Jim Copperfield, and Modoc Charley will receive a pension of \$20 a month from the government. They will receive this amount from March 1914, in that they were 62 years of age at the time of the passing of the act in Congress.

Trouble was experienced for a time in securing the pensions in that the Indians entitled to them were known by different names than they formerly had. Jim Copperfield enlisted in the Modoc as Little Jim. Reuben Konoki is known on the reservation at present as Rube Walker. Modoc Charley is known by his copper-hued friends as Charley Faithful.
