> A sharpness of competition unapproached in pre-war days will characterize the conduct of foreign trade activities during the next few years, it is generally conceded. America's possession of raw materials, her facilities for quantity productions and the fact that her industrial machinerv is not so clogged with strikes and other labor disturbances which are seriously impairing British trade, it is thought, ensures the United States a fair proportion of this business.

> But it is pointed out that a voluminous foreign trade will be essentially a "new game" and British traders feel that lack of experience will offset, in a measure, the advantages in-, dicated which now favor American trade bidders.
