### BIRD SHOOTING SEASON SETTLED

In an opinion given by Attorney General George M. Brown to M. A. Biggs, district attorney for Harney county the shooting season for ducks, geese and other migratory water fowl has been definitely settled. Confusion has existed in the minds of many shooters on account of a difference in the federal and state seasons. The state cannot legislate within the closed season of the federal regulations, but it can legislate within the open season. The federal open season is three and one-half months, but the state, if it cares to, may close any portion or all of the federal open season. The shooting season, therefore, which must be observed by the hunters throughout Oregon is as follows:

For Multnomah, Clatsop, Columbia and Tillamook counties, the open season begins on October 1 and closes December 31. In all other counties of Game District No. 1, which comprises all of that portion of Oregon lying west of the summit of the Cascade mountains, the season opens on October 16 and closes on January 15. In all counties of Game District No. 2, which comprises all that portion of Oregon lying east of the summit of the Cascade mountains, the open season begins on October 1 and ends on December 31.

It had been hoped that the fed-

eral and state laws would conform, and recommendations to this effect were made by the fish and game commission, the rod and gun clubs throughout the state, the Oregon Sportsmen's League, and many individual hunters who had given much study to the seasons. The original draft of the game code included a uniformity of seasons, but the position was taken by the game committee of the legislature that the federal regulations were unconstitutional and, therefore, would be inoperative. Since the legislature has adjourned two federal courts have upheld the federal regulations. It was the clear intent of the legislature to give equal hunting seasons. This would have been accomplished had not the federal law intervened. The state law is inoperative and will be enforced insofar as it does not conflict with the federal law. The dates given above are those within which hunters may shoot and be within both the federal and state law.
