

DIVORCES NOW ON INCREASE

SEATTLE, Wash., Sept. 25.—Divorce cases in Seattle and King county increased 32 per cent in the first six months of 1919, as compared with the same period of 1918, according to Pierce Lonergan, former King county divorce proctor. Whereas, a few years back the divorce rate was one divorce case to three marriages, it now is approximately one divorce case to every two marriages, he said.

One hundred and twenty-nine less marriages were recorded in the first six months of 1919 than in the same period in 1918. The divorce rate in King County and Seattle ten years ago was one divorce to 12 marriages.

"I believe that the fundamental cause of the alarming increase in divorce is the exaggerated conception of individual liberty, which ignores the duties and responsibilities which the individual owes to other members of the community," said Mr. Lonergan.

Politically this is manifested in the I. W. W., the 'red' socialists and others who fail to recognize any responsibility or standards other than those set by the individual."

BERT HAWKINS IS NO SPEED FIEND

Bert E. Hawkins is in danger of losing his reputation. Either he is one of those fellows who can't keep his foot from off the accelerator or he is the quiet, law-abiding, easy-going, fifteen-miles-an-hour chap everyone thought he was. The Herald put him in the first class, for it reported him as having been arrested and fined for speeding, while, as a matter of fact he was not guilty at all. It was just plain B. Hawkins. Hence the retraction. As to the second charge, his friends will have to split the difference, for someone told the Herald a short time ago that he sold his Dodge and now the inference is that sooner than run the chance of speeding he sold the darn thing. That is what might be termed diplomacy.

DECREASE IN LUMBER CUT LAST SEASON

WASHINGTON, D. C., Sept. 25.—The lumber cut of the United States in 1918 was 29,362,020,000 feet, as reported to the Forest Service up to June 15 by 14,753 mills. The complete total cut is 31,890,454,000 feet, based on the assumed operations of 22,456 mills. The computed cut in 1918 is 11 per cent smaller than the computed production in 1917.

A comparison of the computed cut of several of the larger general producing regions in 1918 with the figures for the preceding year shows a smaller output by approximately 20 per cent in the yellow pine group of states, a decrease of 19 per cent in the North Carolina pine group, and of 9 per cent in the Lake States. An increased cut of 2 per cent is noted for Oregon and Washington.

AMERICA'S BIG BREAD EATERS

NEW YORK, Sept. 25.—Americans are eating more bread and less of the higher priced foods, the consumption of flour the last 70 days showing an increase of 3,000,000 barrels or over 15 per cent over the same period last year, according to a statement issued here today by Julius H. Barnes, United States wheat director.

A fall in prices of other foodstuffs was reported by Barnes, who called attention to the fact that lard, which sold in Chicago at 35 cents a pound wholesale two months ago, now is bringing only 22 cents. Other edible oils, he said have shown "sharp declines in sympathy." Condensed and evaporated milk, he reported, have not shown the usual fall tendency to advance.
