LOGGING WITH ELECTRICITY

The elimination of the fire hazard in the woods of the Pacific Coast is each year becoming more and more of a factor to be considered. As the lumber industry increases in volume the fire hazard due to spark-emitting engines increases.

The utilization of the electric donkey engine in place of steam has been given attention for several years. Some progress has been made. There were a good many obstacles to overcome. First a motor suited to this particular service had to be developed. The Snoqualmie Falls Lumber Company, Snoqualmie Falls, Wash., is electrifying a logging operation. The company has installed 6,000 feet of transmission line and is successfully operating one of the electric units. Ultimately the entire camp will be electrified.

The Snoqualmie Falls Lumber Company generates its electric current at the mill from the refuse and returns the current to the woods.

One of the big Central Oregon pine lumber companies is considering the advisability of electrifying its logging railroads. There is no doubt but in the future electricity will play a large and important part in logging as it now does in the transformation of the log into lumber.

The subject of electricity in the logging camps is a subject of deep interest to the logging industry and will be discussed at the tenth session of the Pacific Logging Congress, which will be held at Portland, October 8 to 11. The headquarters of the congress will be at the Multnomah hotel.

"POKER FACE" HAS ITS USE

Ability to Hide Emotion Will Frequently Be Found of Value in Game of Life.

Princeton is about to send 110 graduates out into the world. Some of them are whimsical young fellows, as would appear by the way they filled out questionnaires which asked them, among other things, what of most value had been received by them in their college course. One reflective senior answered unblushingly that it was "his allowance." For others, "checks," "a poker face," "the art of bluffing," "learning how to leaf scientific," were their acquisitions of highest worth.

The value of no one of these can be gainsaid, for most lives bring emergencies when any one of them may be of the highest use. There are some who may be skeptical of the advantages of the "poker face." Yet who can doubt the value on occasion of a poised, impassive, imperturbable countenance which gives no slightest hint of the hopes and fears it masks.

A physiognomy under complete control is almost essential to a diplomat, and this ability to hide emotions behind a changeless exterior goes far to give the Japanese envys the reputation of being the best poised statesmen. Countenances which light up with emotion are more attractive. Wooden faces are never winning in the usual acceptance of the word. But they are the winning faces in two at least of the exciting games of life, diplomacy and poker.—Rochester Post Express.

The ink plant of New Granada is a curiosity. The juice of it can be used as ink without any preparation. At first the writing is red, but after a few hours it turns to a deep black.

EMULATION COUNTS IN LIFE

Woman Evangelist Was Evidently Aware of the Fact, and Turned It to Advantage.

In an Indiana city, not long ago, a woman evangelist held a revival meeting. She took no collections while the services were in progress, but on the final night she announced that a free-will offering would be in order. Interest in the meetings had been growing and the church was crowded to capacity. The ushers, with contribution plates, started on their rounds. The evangelist said she had instructed them to say "Amen" whenever 25 cents was dropped into the plate; when 50 cents the usher was to say "Hallelujah!" and when \$1 the usher was to say "Glory hallelujah!" in a loud tone. The collection amounted to \$1,100.

If there had been no emulation the total might have been small, but the evangelist knew that no person with money to give would be content with an "Amen" when a neighbor, sitting in the next pew, was acclaimed with a "Glory hallelujah!" The same principle holds good in everyday life. If one man has a fine vegetable garden it is an incentive to his neighbors. The interest women have in pretty frocks is largely due to somebody getting one and making the others desire something equally becoming. Men would care little for position if it were not for the age-old lure that makes them want a better job than the other fellow.

Without such emulation there would be nothing to drug men and women away from the commonplace things of life. There would be nothing to induce one boy to seek for the head of his class or persuade him that he should run for president later on. Many, of course, are content to have "Amen" said to their efforts in life, but more want to hear the "Glory hallelujah!"—Indianapolis News.

Danzig.

The old fortress of Danzig is rich in Napoleonic lore. It was here that the Man of Destiny failed to heed the intimations of a grand council of his marshals—Murat, Ney, and the rest, that his star had passed perihelion; it was here that he upbraided them for having grown soft in prosperity, and for opposing the invasion of Russia; and it was from Danzig that his legions "jumped off" for the ill-fated Moscow campaign.

In a later day Danzig was the background and the base for the northern spear of Mankonski's gray-green phlegms that took Warsaw. Look at the map of the blunt salient that Russian Poland made into the heart of the central empire in the days before the war, and the strategic value of the fortified city in the rear of the invading Germans can readily be seen.

Flying in Franklin's Day.

Benjamin Franklin, who closely reported the aerial experiments he viewed in France in 1783, wrote:

"The improvement in the construction and management of the balloons had already made a rapid progress; and one cannot say how far it may go."

"A few months since the idea of witches riding thro' the air upon a broomstick, and that of philosophers upon a bag of smoke, would have appeared equally impossible and ridiculous."

"These machines must always be subject to be driven by the winds. Perhaps Mechanical Art may find easy means to give them progressive motion in a calm, and to slant them a little in the wind."

Coal Family Numbers 200.

Ammonia, aspirin, carbonic acid, indigo, oil of wintergreen, saccharin, toilet water—this isn't a druggist's catalogue. It's the first names of a few of the members of the coal tar family.

The chemical department of Barrett & Co., New York, has just presented to the American Museum of Natural History a chart showing this family tree. More than two hundred direct descendants of Old King Coal are indicated on the chart, and each in its proper place, the descendants are represented by typical specimens.

YADEN IS FIRST TO FILE LICENSE

The first auto mechanic's license under the new state licensing act to be filed here with the county clerk today by John C. Yaden, foreman of Howies' garage. An examination was held here recently by examiners appointed by the state.

Yaden's license reads "First Class General Auto Mechanic," which embraces the trade of special auto-genous welder.

The law making it necessary for every auto mechanic to secure a license before being able to operate in Oregon was passed during the last session of the state legislature.

Almost \$100,000,000 worth of war stamps has been bought this year. That is only about 90 cents per capita, while we are asked to make it \$10 per capita in the whole year. Better buy some tomorrow.

NEGRO PRISONER ESCAPES AT SALEM

SALEM, Sept. 29—George Smith, a negro convict serving seven years in the state prison for larceny escaped from a gang working in a flax field near the penitentiary today. Smith has served sentences in the Washington state penitentiary at Walla Walla and the state prison at Deer Lodge, Montana.

Soapstone is largely used in China for preserving structures built of sandstone and other stones liable to crumble from climatic conditions. It is powdered and put on in the form of paint, and will preserve buildings for hundred of years.

The report that Lenin of the Bolsheviks was shot probably originated from his latest speech at Stockholm, which indicates that he was half shot.

—need new blades?

—Your razor is no better than its blade

The strong, keen-cutting convex edges of Gem Damascene Blades removes the toughest stubble and tenderest growth with velvet-like smoothness.

The life of each blade is remarkably long.

To know the luxury of velvet-like, smooth self-shaving, you must shave with Gem Damascene Blades. They leave your face with that smooth, comfortable feeling.

We sell a set of seven Gem Damascene Blades for 50 cents.

Our store is shavers' headquarters.

SAGE TEA DANDY TO DARKEN HAIR

IT'S GRANDMOTHER'S RECIPE TO BRING BACK COLOR AND LUSTRE TO HAIR

You can turn gray, faded hair beautifully dark and lustrous almost overnight if you'll get a 50-cent bottle of "Wyeth's Sage and Sulphur Compound" at any drug store. Millions of bottles of this old famous Sage Tea Recipe, improved by the addition of other ingredients, are sold annually, says a well known druggist here, because it darkens the hair so naturally and evenly that no one can tell it has been applied.

Those whose hair is turning gray or becoming faded have a surprise awaiting them, because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful.

This is the age of youth. Gray-haired, unattractive folks aren't wanted around, so get busy with Wyeth's Sage and Sulphur Compound tonight and you'll be delighted with your dark, handsome hair and your youthful appearance within a few days.
