MUZZLING THE PRESS

The latest scheme to control the news and editorial columns of the press of the country has just come to the attention of The Herald. It is in the form of a contract for the advertising of the Calumet Baking Powder.

This contract, or order, is issued with the understanding that you are not to run any copy or advertisements that in any way, shape or manner attack—directly or indirectly—the wholesomeness of alum in baking powders or alum baking powders.

Should copy of this nature appear in your columns during the life of this contract, it is understood that contract can be cancelled without paying short-time rate.

This is one of the boldest attempts to control the columns of the papers that has ever come to the attention of The Herald. Everyone knows that alum is a deleterious substance. The Calumet people know it and the government has been warning the public for years about it.

THE FIRE SURVEY

One gratifying result of the fire survey is the favorable reception given the report of Messrs Stokes and Allen. In only one instance can exception be taken to any part of it, and that is where it refers to the City Recorder.

As to the recommendations of the report, the general sentiment of the people of the city is in favor of their prompt adoption. It is recognized that it is a lot cheaper for the city to prevent a fire than it is to control it after it starts.

As a whole it was a splendid idea of the city administration to have this survey made, as it furnishes an intelligent foundation upon which may be erected a fire department that will keep pace with the rapid growth of the city.

Cordwood Now 'Steal of Human Load on Sub-Infested Ocean

Captain Bertram stays in a 'boat' now. It's just plain old cordwood on a sneaky sub-barrow at his farm at New Zealand, N. J. Captain Hayes commanded the huge liner transport, the 'Olympic,' throughout the war period, making hundreds of trips across the submarine-infested Atlantic.

Comforts Over a Volcano.

Up in the mountains, where snow covers the ground more than half the year and zero blasts whistle out of the north, lies the town of Chaudesaignes, and in this town there has not been a heating stove or a furnace for many years.

No Chaudesaignes is not in Utopia. It is in Auvergne, France, and the explanation of its emancipation from soot and furnaces and ashes lies in the fact that it is built in what was the crater of a volcano, and from the ground beneath comes boiling water in great volume.

Looting by the Ancients.

After the battle of Cannae—August 2, 216 B. C.—in which the Romans were totally defeated by Hannibal, the Carthaginian leader ordered that the gold rings should be taken from the hands of the dead Romans and heaped up in the vestibule of his quarters.

Beautiful American Bird.

In his distinguishing black on the forehead and yellow on the throat, the Maryland yellowthroat is one of the most beautifully marked of any member of his tribe and gives an appearance of Spanish grandeur.

Didn't Amount to Much Then.

Edman was boasting to his younger brother about how smart he was when he was a year old. 'I could walk on my own jump,' he bragged, 'and sing a song.'

'And what was I doing then?' inquired Willie. 'Did I run on my jump, too?'

'You couldn't do nothing,' was Edman's cringing reply. 'When I was a year old you was no more; you was just a spoon of dust.'

Illustrating a Point.

While going to church I was detained by a friend, and when I arrived there I was late, for the preacher was already speaking. At the time of my entrance he was saying, 'He who sineth shall fall,' when suddenly I tripped over a saw which a man had carelessly put out in the aisle.

ROOSEVELT WAS PUNY AS A BOY

'Roosevelt was one of the most puny kids that I ever saw,' remarked Henry L. Dollard, who knew the Colonel at Oyster Bay. At that time Roosevelt and his parents lived on an estate very near the water, and the first summer young Roosevelt and the boys in the neighborhood would go in bathing from the old steam boat dock.

'Roosevelt was then about sixteen years old,' said Dollard. 'He was game to the core and would follow any strong boy. They used to play stump the leader, and although Roosevelt was not as strong as the other boys, he managed to do just what they did. I've seen them in bathing many a time. The leader would make a fancy dive off the dock and Roosevelt would follow. Often I thought he would never come to the surface, but he did, and swam back to the dock, ready for the next stunt.'

Dollard watched the young man grow up, saw how he improved each year, and when he returned from the West, said that no one who had seen the young man before would never have recognized him.

'It was just grit and determination, and these qualities he had all through life,' commented Dollard.

COULD NOT SEE THE FUTURE

Oldtime Cleveland's Rebuke of 'Visionary' Makes Interesting Reading at This Time.

A Cleveland man who has inherited a mass of ancient correspondence ran across the following letter some time ago and found in it a little sermon on time's mutations. It was written in 1823 to an ancestor of his, a citizen of many activities, the writer being Hon. John W. Allen, lawyer, editor, congressman, the first president of the Society for Savings.

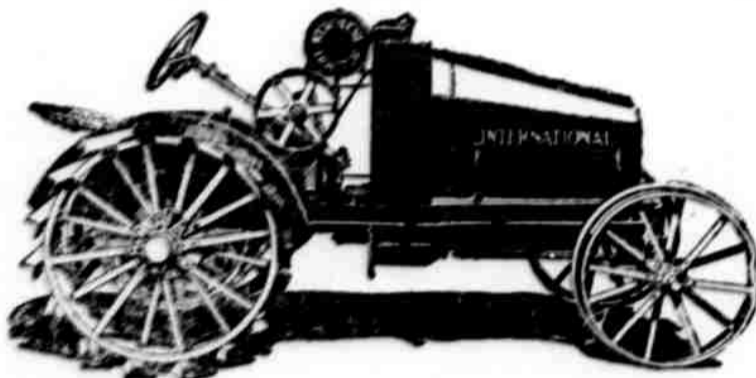

It appears that the recipient of the letter had written to his congressman suggesting a railway across the continent, an amazing vision in 1823.

Did Congressman Allen take kindly to the suggestion? He did not. On the contrary he gave the author of the wild scheme a neat dressing down.

'Why do you want at your age,' he wrote, 'and with property enough for your comfort and the well being of your children, to embark in such a crazy undertaking? . . . When you are well don't take physic. Truly your friend J. W. Allen.'

It will be noted that the world and the railways have advanced a good deal since that solemn warning was delivered.

International 8-16 Kerosene Tractor

THIS is a strong, light-weight tractor that you will like. Owners of the International 8-16 are pleased with the way it performs both at the drawbar and belt.

Fuel Economy

Of any two tractors of equal quality and usefulness, the one that operates on the cheapest fuel will be the most economical. The amount of saving to the owner can be definitely determined by the difference in fuel costs. The International operates successfully on kerosene and on even lower-priced fuels where they can be obtained.

Used to Advantage Any Day

International 8-16 is built to do belt work, as well as drawbar work, and is dependable for satisfactory service every day in the year.

Now is the time to place your order. The sooner you do so, the better chance to get your tractor in time to handle a large part of your farm work at a great saving in labor, time and money.

ALWAYS TAKING JOY FROM LIFE

SAN DIEGO, Cal., Oct. 1.—Seekers for entertainment of a more un-restrained character than is offered in the United States will be greatly hampered in their efforts to cross the California border into Mexico if the recommendations of the San Diego county grand jury are heeded.

Resolutions passed by the grand jury protest against the establishment in Tijuana, Lower California, of various resorts and ask federal aid in proper border regulations to prevent Americans crossing the border to patronize any resorts not permitted to operate on this side of the international boundary line.

The grand jury takes official notice of the announcements in the press and otherwise of the purpose to establish at Tijuana, across the international boundary line, a Lower California horse racing, gambling, drinking and sporting resort.

The preamble in addition states: 'Whereas such a resort if established, would be supported by American money and citizens, and will prey upon American men and women, as the people and resorts of Lower California are wholly inadequate to support or maintain such a Monte Carlo, or institution; and

Whereas the detrimental and degrading effects of such a resort will fall most heavily upon our county and city resulting in such unfavorable notoriety and disrepute, and making our city and county the rendezvous of lawless elements, incurring the burden of taxation to maintain public order.'
