### A Few Eye "Ifs"

If an hour's reading makes your eyes ache. If printed matter occasionally gets "misty." If you are obliged to stop work periodically to rest your eyes for a few moments. If you find it easier to read nearer or further away than the normal twelve to fourteen inches—then something is wrong.

If you cannot recognize people across the street. If you have to make an effort to see clearly—knitting the brows, for example. If strong light gives you pain in the eyes, or if you require more light than hitherto—your eyes need attention.

If you have any of these difficulties call and let us find out, definitely, just what the trouble is.

We grind our own lenses.
