# When You Want It Bad You Want It GOOD

This is not a paradoxical statement, but a truth which may easily be demonstrated when it comes to the purchase of drugs. If the drugs you buy are impure, if they lack strength, or if they are improperly compounded, you may never know the difference—yet the difference might mean the difference between sickness and health.

When you need something badly—make sure that you obtain good quality.

Poor drugs are expensive at any price.

Come to us and you'll get the finest drugs and service obtainable. The successful record of our store is a guarantee of this fact.
