M. Kirkpatrick, Malin, farmer; C. M. Pettit, Klamath Falls, farmer; Charles Bichu, Klamath Falls, merchant.

TYPHUS SLAYS THOUSANDS IN WEST SIBERIA

TOKIO, Oct. 2. (Correspondence of The Associated Press)—In a letter from Omsk, Siberia, Miss Charlotte Boardman Rogers, of New York City, who was on the western front when the Kolchak armies recently evacuated number of cities, writes a pitiable story of the horrors of typhus which she saw personally observed as a nurse of the American Red Cross. Under date of July 20 she says:

"I have spent twenty-four hours in hell. Our train was stalled at the railway station of Petropavlovsk, Far Western Siberia, and somewhere to the west of us the Red armies were coming on.

"To the right of us, left of us, rear of us, were typhus fever trains, box cars, passenger cars, twenty-five, thirty, even thirty-five cars to a train and all loaded with men from the front and from the evacuated hospitals, with hundreds—thousands of patients dying of the dread disease.

"No nurses waited on them, no doctors administered medicines to stimulate the action of their weakened hearts. They lay on rough board shelves erected around the sides and ends of the cars, or on the floor, where even cattlemen would have placed straw if animals were to be carried. No sanitary conveniences were supplied; the patients' clothes were stained with filth and blood; their feet caked with mud and manure; their bodies alive with

little gray typhus lice, the plague of Siberia.

"Cheek bones protruded through their yellow skins, eyes sunken into their sockets, hands like birds' claws stretched out with cups for water, they lay all day in the sweltering heat.

"We tried to look away, but all day long we heard them moan or call for their sanitary attendants.

"Our trip from Omsk to the extreme front and back again at a time when the Siberian government armies were falling back before the Reds has revealed in all its pitifulness the tremendous need of Russian hospitals, sanitary trains and dressing stations for every kind of supply.

"Although the American Red Cross has been sending train after train to Western Siberia, so vast is the need that many more trains are necessary to meet even the most primal necessities. Yet those of us who have seen the immediate improvement in hospitals and sanitary trains where American Red Cross supplies have come in are immensely encouraged, knowing that every pound of absorbent cotton, every ounce of drugs, every yard of gauze, can be used in Western Siberia to save a life."

Thousands of years ago man in his savage state, who was better able to control his muscles than modern man, bristled his hair out in order to look fierce and dangerous. Our ancestors fluffed their hair out in order to keep out the cold, and to this day the hairs of men stand on end when the body is exposed to cold. That is the real reason why we get "goose flesh." When our "hair stands on end," our "flesh creeps," or we get "goose flesh," the muscles which are situated under the skin contract and drive the blood out. Naturally the skin becomes white. It is then that we are "ghastly with fright" and "white to the lips." As the blood vessels and muscles contract so the skin tightens, pulling the hairs which cover the skin up straight. That is exactly what happens to the hair when it "stands on end." We might even call it "goose flesh of the head."
