Hot Water for Sick Headaches

Tells why everyone should drink hot water with phosphate in it before breakfast.

Headache of any kind is caused by auto-intoxication—which means self-poisoning. Liver and bowel poisons called toxins, sucked into the blood through the lymph ducts, excite the heart which pumps the blood so fast that it congests in the smaller arteries and veins of the head, producing violent, throbbing pain and distress, called headache. You become nervous, despondent, sick, feverish and miserable, your meals sour and almost nauseate you. Then you resort to acetaniline, aspirin or the bromides which temporarily relieve but do not rid the blood of these irritating toxins.

A glass of hot water with a teaspoonful of limestone phosphate in it, drunk before breakfast for awhile, will not only wash these poisons from your system and cure you of headache, but will cleanse, purify and freshen the entire alimentary canal.

Ask your pharmacist for a quarter pound of limestone phosphate. It is inexpensive, harmless as sugar, and almost tasteless, except for a sourish twinge which is not unpleasant.

If you aren't feeling your best, if tongue is coated or you wake up with bad taste, foul breath or have colds, indigestion, biliousness, constipation or sour, acid stomach, begin the phosphated hot water cure to rid your system of toxins and poisons.

Results are quick and it is claimed that those who continue to flush out the stomach, liver and bowels every morning, never have any headache or know a miserable moment.—Adv.

180-POUND DEER SHOT WITHIN 75 MILES OF NEW YORK CITY

Although New York is the most popular center in the United States, if not the world, the New York sportsman doesn't have to go far to enjoy good sport. This photograph shows deer hunters carrying a 180-pound buck back to their camp near Forestburg, Sullivan county—only about 75 miles from the metropolis.

Director of Census Who Is Preparing to Find Out How Big Uncle Sam Is

Samuel L. Rogers

The population of the United States has been estimated at 140,000,000, but whether this figure is too low nobody knows. Samuel L. Rogers of North Carolina, director of the census, is now making plans to find out. To obtain data for the 19th census, 79,000 enumerators were employed. Mr. Rogers will need more than that to get the figures for 1920.

Housekeeping.

We went housekeeping immediately upon our marriage, for mother said she despised those boarding people; she went to housekeeping when she was married, and she meant all her children should do the same; and if their husbands weren't able to go to housekeeping then they weren't able to be husbands, and there was an end of it; and no two people, she said, brought up in different fashions, could mix their lives into one without some jarring, and a third party was sure to find that jar into an earthquake; and if there were fewer third parties but the trouble would be done away with; for she believed half the divorces and separations and quarrels in the state were brought about by boarding house intimacies with third parties.—Harriet Prescott Spofford.

A very effective agent for moisture-proofing wood has been found in an aluminum leaf coating. This coating practically insulates the wood against any change in atmospheric conditions, and is particularly valuable for use where accurate form and balance must be maintained, as would be necessary in an airplane propeller.

Where Pershing Will Write Story of War

This is the home General Pershing has leased at Washington. It is located in Chevy Chase, overlooking Rock Creek Park, D. C., the former home of the late General Corbin, and leased from his widow, Rumer has it that General Pershing will soon marry again, although it is believed he is establishing this home with the thought only of his young son and two sisters.
