VOCHATZER BROS. DRILLING

Klamath Falls, Oregon

I am now prepared to furnish Shasta Sand from the Hoey, Gait, sand and gravel pit, in any quantity that may be desired by contractors and builders.
AL F. GRAHAM.

WAS A SURPRISE TO HER FRIENDS

MRS. ESPY GAINS TWENTY EIGHT POUNDS AFTER TAKING TANLAC.

"I have gained twenty-eight pounds since I commenced taking Tanlac and feel better in every way than I have for many years," said Mrs. C. L. Espy, who lives at 1664 Hassalo St., Portland, Ore., the other day.

"I had suffered from stomach trouble and indigestion so much, and for such a long time," she continued, "that my condition really became alarming. When I commenced taking Tanlac I had gone down to where I only weighed one hundred and five pounds, and my average weight was about one hundred and forty. Everytime I ate anything I would be badly bloated from gas, and very often this gas would get up into my chest and cause my heart to palpitate something awful. I also suffered from constipation, and would have raging headaches every day or so. Finally my entire nervous system got in such bad condition, that it was impossible for me to get a good night's sleep. I was so weak and run down that I couldn't do my housework, and in fact, if I exerted myself the least bit I would be completely exhausted and feel just like I was going to faint. It just seemed that during all those years of suffering that I did all in my power to get relief, but none of the medicines and treatments I took did me any good at all.

"One day a friend of mine who knew about my condition, came to see me and told me about Tanlac and advised me to give it a trial, and I took her advice, and it's the honest truth, I began to pick up just in a few days after I started taking this medicine, and from that time on I continued to improve until I am now a well, happy woman again. I have a fine appetite and eat three hearty meals every day, and I never suffer a particle afterwards. In fact, I never have a sign of stomach trouble or indigestion and my nerves are in such good condition that I sleep like a child every night. I have gotten back my strength, and have regained almost every pound I lost, and am so well and strong in every way that I can easily do all my housework now. All my friends are talking about my wonderful recovery, and I always impress one fact upon their minds, and that is that Tanlac is responsible for it."

Tanlac is sold in Klamath Falls by the Star Drug Co., and in Lorella by the James Merc. Co.—Adv.

WASTE TIME IN SAVING JUNK

LONDON, Nov. 19.—(By Mail).—Civilian visitors returning from tours of the battlefields in France criticise the salvage operations still being carried on there.

"Men who ought to be back at their work in England are engaged in collecting useless scrap on every battlefield under the direction of officers who have lost all keenness for work since the war ended a year ago," commented one returning visitor.

"I spoke to two officers, each of whom told me that the value of the salvage would not compare with the money spent in these operations," said another.

Others say that the French are complaining of the presence of thousands of Chinese laborers engaged on this work laying out tennis courts or building useless army huts.

PROFESSIONAL UNION FORMED IN ENGLAND

LONDON, Nov. 19.—(By Mail).—"The man in the black coat," as the professional salaried man is designated by promoters of the organization, is to have a federation designed to insure him increased income and other benefits which other workers have gained through their trade unions. A meeting was held here the other day to organize salaried men.

Industrial workers have received wage increases amounting to 130, or 140 per cent during the war, while the cost of living during that time has been increased 128 per cent, according to organizers of the Professional Workers' Federation sponsoring the new union. But for the man on a moderate salary, it is contended, there has been no proportionate salary raise. Increases for this class of worker have averaged less than 30 per cent for the five-year period.

MAJESTY OF LAVA FLOW IS NOW REVEALED

HILO, Island of Hawaii, T. H. Nov. 5. (Correspondence of The Associated Press).—The mysteries of a-a lava, the mechanism of its flow, and its behavior in motion to a large extent have been solved by the recent great eruption of Mauna Loa, one of the volcanoes on this island, according to Professor T. A. Jaggar, Jr., volcanologist.

Although there has been ample opportunity to study the mechanism of pahoehoe, or soft lava flows, a-a or the rough variety, has been more or less a sealed book to science, said Professor Jaggar.

After camping three days and nights at the fountainhead of the flow, Professor Jaggar returned to Hilo recently convinced that the peak of the recent great eruption had passed.

When the professor left the volcano only one jet of the original half dozen was playing. This fountain was leaping to a height of 300 feet and sometimes more from the throat of a cone which had built itself up during the outburst to a height of 120 feet above the level of the surrounding country. This cone is about 250 feet in diameter.

As the lava falls back it pools within the ramparts of the cone, flowing westward through a break in the walls. The vent itself is not the cone, but a fissure in the flank of the mountain, from which incandescent melt was spurting at as many as thirty different points when the professor first visited the source in the earliest stages of its activity.

On his last trip Professor Jaggar crossed the active fissure at a time when activity was confined to the one large cone. Shortly afterward four smaller cones south of the fountainhead burst into life with a loud roaring, puffing noise, and sent a stream of lava westward, paralleling that from the main cone. Along the eastern side of the fissure the country was found to have been built up to a great height by the earlier output of cones now lifeless. As the flow died away, the source retreated northward up the mountain.

The cone from which issued the greater bulk of the earlier Alike flow is now dead. The professor climbed this cone and climbed down from its topmost edge into a great amphitheater 300 feet deep and 1000 feet wide.

After watching the two flows Professor Jaggar verified by measurements a conjecture which he first made while observing the pulsations of the Alike channel. He noted then that the torrent of fire had moments when the stream seemed to rise along its whole length. Immediately it was suggested to him that the whole flow was alive, the bed of the stream as well as the river it bore. The rise, he believed must be a rise of the bed itself, heaved upward by pressure from living depths below.

The basin receiving the present reduced outpouring, the professor said, is of such extent that it could not be flooded brimful before the first of next year and before that time, judging from the lessening activity, the present great flow of Mauna loa will be dead.

Today's Events

Centenary of the birth of Joseph Durthaller, noted Jesuit educator, for many years president of St. Francis Xavier college, New York City.

Today is the 125th anniversary of Baron Steuben, the organizer of the American army in the revolutionary war.

Marcus H. Holcomb, governor of Connecticut, is in line for congratulations today on the 75th anniversary of his birth.

Rt. Rev. John C. Hennessy, Catholic bishop of Wichita, today rounds out half a century in the priesthood. Definite result of the election in Plymouth, England, where the American-born Lady Astor is a candidate for parliament, is expected to be announced today.

A union of professional men is expected to result from a conference to be held in Detroit today. Representatives of the medical, legal, educational and other professions from all parts of the United States have been invited to meet for a discussion of the possibilities of a permanent inter-professional organization for the protection and advancement of their common interests.

With Soap

—and broths. Their difference lies in their fresh flavored goodness. They are delightfully crisp, satisfying and daintily salted. Sold fresh everywhere by grocers.

Real-Fruit Desserts

Jiffy-Jell is flavored with fruit juice essences in liquid form, in vials.

A wealth of fruit juice is condensed to flavor each dessert. So it brings you true-fruit dainties, healthful and delicious, at a trifling cost.

Simply add boiling water.

Compare it with the old-style gelatine desserts. It will be a delightful revelation.

Get the right kind—

Jiffy-Jell

10 Flavors, at Your Grocer's 2 Packages for 25 Cents

Surety bonds while you wait. Chas. Cote & Smith. 5-42

Industries are like orchards

THEY have to be fostered, cared for and encouraged until they get a good start. But once they start to bear fruit, they are the source of wealth and prosperity for all of us. Industries are no longer for the autocrats and the "landed gentry." Fundamentally they benefit the workers—they make jobs—they give us all the opportunity to earn a good living and to advance and prosper in proportion to our ability, energy and ambition. America is a great country because of her great industries. Oregon is rapidly becoming a great state because of her great industries.

Let us—all the people of Oregon—pull together, to make Oregon's industries bigger and better.

Associated Industries of Oregon
