

# Thrift and Little Things

Who are the men and women that become masters over great things? They are those who first of all become masters over little things.

Dollar bills and silver dimes are only little things, so little that they often trickle away in every direction—and yet they have formed the solid foundation for many a comfortable income through the following slogan:

**"DON'T WASTE! SAVE!"**

# THORN IN SIDE OF 'RED' ARMY

KHARKOV, Russia, Nov. 2.—(By Mail).—General Andre Skouro of General Denikine's South Russian forces opposing the Bolsheviks, is credited with the capture from the Bolsheviks of 5,000,000 rubles' worth of booty. Americans here call him the "Million Dollar" general. He is the idol of the Cossack country and the leader of Skouro's "Wolves," whose daring and fearless cavalry warfare has made possible many of the volunteer army's big advances.

This dashing 32-year-old Cossack general turns all his money over to his wife, a beautiful young Caucasian girl, who resides here. And she in turn has offered her fortune and services to the American Red Cross. Mrs. Skouro came to the American relief headquarters shortly after the Red Cross unit arrived and was enrolled as a volunteer worker, being placed in charge of civilian relief work in a large district behind the Denikine army.

Her husband is one of the most powerful officers in Denikine's army. Like the famous military leaders of history, he rides at the head of his troops in every battle. He has gathered about him the most adventurous spirits of the Cossack country. They live only to fight and eat—and do very little eating.

It was Skouro's cavalry that cleared the Don and Dnieper river basins of the Bolsheviks and were instrumental in the fall of Kiev. Skouro's forces are fighting for a principle—the liberty of the Caucasus—but they are not "gentlemen soldiers" in the drawing-room sense of the word. As they are practically no funds to pay troops, they believe in the old war adage that "to the victor belong the spoils."

They have been a heavy drain on the Reds' treasury.

# BUTTE MAY BE U. S. ARMY POST

BUTTE, Mont., Nov. 29.—A report is current here that Butte is to be made the seat of a permanent garrison of regular troops, when final disposition of the army is made, although no definite official statement has been made.

There are forts at Helena and Missoula, each only a few hours' ride from this city, but the rumor will not down that barracks will be erected within the city limits of Butte and at least a battalion of infantry assigned to this city, "for good."

It is said this will be done under policy of distributing the army industrial centers where they are most needed for protection of property.

# BUSINESS MEN OF MEXICO AND U. S. TO CONFER

MEXICO CITY, Nov. 29.—A conference of exporters, importers, manufacturers, bankers and merchants concerned with trade between the United States and Mexico will be held in Mexico City for three days beginning February 11 next, at which time questions vital to commerce between the two countries will be discussed by experts. The conference has been arranged by the American Chamber of Commerce of Mexico, Secretary W. F. Saunders stating that approximately 4000 invitations had been extended.

The subjects to be discussed are: Mexican sales methods and distribution, Mexican agencies and representations, Mexican banking facilities, financing the exports of Mexico, shipping and packing merchandise for Mexico and trade marks for Mexico. The proceedings will be in English, but the report of the conference will be printed in both Spanish and English.

"Commerce between the United States and Mexico is increasing," said Mr. Saunders to the Associated Press. "In 1910 it amounted to \$245,613,991 and this year it will be much greater." As this commerce grows, trade problems arise the practical solution of which is of vital importance if the United States is to hold its present trade advantage in Mexico.

"To discuss these problems we arranged for a conference of trade experts, the first of its kind ever held in Mexico. In extending our invitations we have emphasized that we wish to have representatives attend the conference who are really in a position to speak with authority. The Mexican chambers of commerce are acting in full accord with us in this project and we anticipate much benefit as the result of this get-together meeting."

# FLANDERS MUD MAKES HOUSES

ROULERS, Belgium, Nov. 19.—(By Mail).—Flanders mud, the bane of all armies operating in Belgium, is of some use after all.

Lime is practically unobtainable in Belgium today and in many of the ruined villages the refugees are laying stones and bricks with mud for temporary shelter against the coming winter. Others fill the chimneys in their chimneys and walls with it, and altogether it is becoming as much of a comfort to the refugees as it was a handicap to the soldiers who lived in it for months.

At Dixmude the mayor divides his time between public affairs, weighing out coal, distributing supplies and cleaning mortar off of old bricks from the ruins of houses. He is laying these in mud, too, for his winter's shelter. His example is being widely followed in Dixmude and surrounding villages and Flanders mud is playing an important part in the making of temporary homes until new material can be secured in the spring.

From 60 to 70 per cent of the world's production of copper is required in normal times to supply the needs of the electrical industry.

In all probability the sugar cane originally came from India or China, as sugar is mentioned in the earliest literature of these two countries.

Nearly all artificial gems—that is to say, stones that are really made by artificial means—are compounds of alum crystallized under special conditions.

Aches, pains, nervousness, difficulty in urinating, often mean serious disorders. The world's standard remedy for kidney, liver, bladder and uric acid troubles—

## GOLD MEDAL HAARLEM OIL CAPSULES

bring quick relief and often ward off deadly diseases. Known as the national remedy of Holland for more than 200 years. All druggists, in three sizes. Look for the name Gold Medal on every box and accept no imitation.

# The Brunswick FOR THE SEVEN AGES of MAN "AND THEN THE LOVER"

Music aces with its voluptuous swell, Soft eyes look'd love to eyes Which spoke again, And all went merry as a marriage bell. —Byron

It was Shakespeare who said, "If music be the food of love, play on!" Music lovers find their cherished ideal in the Brunswick Phonograph. By the Brunswick Method of Reproduction, music is given its truest and finest tone.

Tone quality hitherto lost in phonographic music is now restored by The Brunswick because it is a super instrument.

It plays all records. So you are not limited in your choice of the world's finest music regardless of what manufacturer makes the records.

The Brunswick Method of Reproduction comprises two scientific features—the Ultona and the Tone Amplifier.

The Ultona plays all records truer, finer and sweeter. It is not a makeshift contrivance, but involves a genuine principle of sound. A slight turn of the hand presents the right needle, diaphragm and weight for playing any record.

The Tone Amplifier is an oval shaped vibrant tone chamber. Like the sounding board of a fine piano or violin, it is made entirely of wood. It is absolutely free from metal. It gives the right tonal volume and eliminates all harsh, thin, metallic sounds. It meets all advanced acoustical and musical laws.

Suppose you hear The Brunswick play today?
