IMMIGRATION PROBLEMS TOLD BY CAMINETTI

WASHINGTON, Dec. 16.—Creation of an additional office of Assistant Secretary of Labor with jurisdiction over all immigration matters, deportation of alien draft slackers and strengthening of the border patrol service against undesirables, are among the recommendations made by Commissioner General Caminetti of the Immigration Bureau in his annual report.

Suggestions that immigration be suspended completely were opposed by the commissioner on the ground that it would have an "injurious effect upon our efforts to further American commerce and enterprise in foreign countries. Continuance of war-time passport visa regulations and assignment of immigration bureau representatives at consular offices to aid in excluding undesirables was urged instead.

Only two aliens were excluded from the United States during the fiscal year on anarchistic grounds, while 37 aliens in the same class were expelled from the country and 55 are now awaiting deportation. To reach American citizens who en-

gage in similar propaganda, the report urges that "the acts prohibited by the anarchistic provisions of the immigration laws" be made criminal offenses.

Deportation is "not punishment for crime" but merely allows the alien anarchist to change his field of activity, the report said and added that it was to be hoped that "the lot of the anarchist will not so continue, but that by the common consent of civilized nations something more may be done to provide for his adequate punishment as an international outlaw."

An additional Assistant Secretary of Labor, together with a larger legal and administrative staff, is recommended on the ground that it would obviate delays now encountered within the department. The arrest during the year of many inadmissible Japanese and Chinese, as well as several alien enemies, who had been smuggled into the country, prompted the proposal to strengthen border patrol forces.

"The bureau now has a small force doing effective work along that line on the borders of Canada and Mexico and on our coasts, but this needs to be materially increased," the report said. "This class of work needs experienced officers who will devote their entire time and all their energies to the task."

A proposed new immigration law, submitted by Mr. Caminetti, would put the burden of proof of admissibility upon persons seeking to enter the United States, and provide for

RED CROSS OFFICIAL APPROVES SEAL SALE

Dr. Livingston Farrand, Chairman of the Central Committee, American Red Cross, Expresses Hope That Public Will Give Generous Support.

SALE IS NOW UNDER WAY.

More Than 650,000,000 Seals Must Be Disposed of to Insure the Success of the Nation-Wide Educational and Preventive Campaign of the National Tuberculosis Association in 1920

Dr. Livingston Farrand, executive head of the American Red Cross, has given his unqualified endorsement of the 1919 Red Cross Christmas Seal sale, which is now under way and which will extend for ten days under the auspices of the National Tuberculosis Association and its 1,000 allied organizations. A fund of more than \$6,500,000, which will be used in the 1920 educational and preventive campaign, will be raised through the sale of the seals.

Acquainted as he is with all questions of general health community improvement and relief because of the nature of his work and office, Dr. Farrand's endorsement is based upon an expert knowledge of what the National Tuberculosis Association has accomplished and will accomplish in the future. His letter to Dr. Charles J. Hatfield, Managing Director of the National Tuberculosis Association, follows:

"I have been greatly interested in the plans that the National Tuberculosis Association is making for the sale of Christmas Seals during the coming holiday season. The success of that effort is indispensable to the carrying out of the far-reaching plans of the Association in its fight against tuberculosis in this country.

"The American people, in common with the nations of Europe, are becoming aroused to the critical importance of the problem of vitality and conservation of health as the necessary factor in re-establishing the world after the devastation and destruction caused by the war. Of all the preventable diseases, tuberculosis takes perhaps the first place in importance. For that reason I view with keenest sympathy and approval the splendid work which the National Tuberculosis Association is conducting, and I trust that the response of the American people in the Christmas Seal Campaign will be generous and universal. Sincerely yours,

(Signed) LIVINGSTON FARRAND, Chairman, Central Committee, American Red Cross."

HEALTH BONDS POPULAR

The demand for the Health Bonds which the National Tuberculosis Association issued this year for the first time are meeting with a ready sale. The bonds are in graduated denominations, the smallest being for \$5. In the past some of the large business houses and other large contributors found it difficult to use up the number of Red Cross Seals their subscriptions called for. The bonds have been issued for the convenience of large subscribers and the proceeds of their sale will be used for the same purpose as the Christmas Seal funds—the financing of the 1920 effort to reduce the number of deaths from tuberculosis in the United States. Last year the disease claimed 150,000 lives. The health bonds can be obtained from state and local tuberculosis associations.

registration of all aliens and a probationary status for those whose admissibility is not clearly established. The law would add to the excluded class aliens who "practice, advocate, teach, sanction or encourage the extortion of money or property," aimed at members of black hand societies.

Commenting upon the number of "picture brides" who have come to this country from Japan, the report declared the gentleman's agreement with that country had "not brought the degree of restriction which might have been, and probably was, anticipated by those who took part in the negotiations," but that this result "grows out of the terms of the agreement rather than the manner of its observance."

FIRST OLIVES SHIPPED

SACRAMENTO, Cal., Dec. 16.—Oroville, California, lays claim to the distinction of shipping the first olives from California to the eastern markets this season. The shipment was made by the Pacific Coast Mercantile Co. of that place.

It is commonly asserted that the Burmese all smoke, and that Burmese babies cry for a cigar instead of crying for the moon. This is not so. But it is quite common to see a lot of little boys and girls in the street making mud-pies and puffing away at big cigars with equal enthusiasm.

EIGHTEEN ARE ENROLLED FROM HERE AT O. A. C.

OREGON AGRICULTURAL COLLEGE, Corvallis, Dec. 16.—Klamath Falls is represented by 18 of the 2906 students now registered at the college. This is a new mark in total enrollment—an increase of 86 per cent over the figure for the corresponding period in 1916-'7, the last normal school year. Despite the fact that class, laboratory and office room has been at such a premium that every available space in basement and garret has been utilized, a high standard of efficiency has been maintained.

Many students attending O. A. C. were graduated from the Klamath County high school. Among them are Allan W. McComb, senior in agriculture, and cadet colonel for the R. O. T. C.; McComb's sister, Miss Mary L. McComb, a junior in home economics and member of Delta Zeta; Austin M. Case, whose parents live at Mountain Lake, junior, manager of Theta Chi; T. W. Delzell, son of Postmaster Delzell, freshman in agriculture and a Sigma Nu pledge; Robert E. Elliott, freshman in electrical engineering; Earl Humphrey, son of George Humphrey, county sheriff, sophomore in electrical engineering and member of Kappa Delta Sigma; Agnes M. McCormack, daughter of Frank McCormack, county commissioner, registered in music; Earl W. Mack, whose parents reside at Spring Lake, a sophomore in agriculture; Clarence V. Montgomery, commerce; and Harry A. Prather, junior in pharmacy, member of Theta Chi.

Gladys Lennox, formerly of Roseburg and now of Klamath Falls, is a senior in home economics, and manager of Chi Omega sorority. Audrey E. Bradbury, pharmacy, and Eldon H. Cooper, chemical engineering, are sophomores in the institutions. Students enrolling the college this year include E. L. Cantrall, mechanical engineering; John L. Elliott, electrical engineering; Allen B. Lloyd, industrial arts; Kenneth S. Perry, chemical engineering, and Mildred L. Thrasher, commerce.

While war conditions brought about an increased interest in agriculture had caused unprecedented influx of students in the school of agriculture—total registration 725—engineering in its various branches leads in popularity at the college. Students studying civil, electrical, mechanical, mining and highway engineering number 810. Forestry and logging engineering is represented by 77 and industrial arts by 25 students. Farm mechanics in the school of agriculture, which has had an abnormal growth, owes its present popularity to heavy purchases of tractors and other power machinery in the last two years by farmers of the northwest.

An increase of approximately 160 per cent in engineering enrollment over registration in the fall of 1916 is largely attributable to the fact that the importance of engineering in winning the world war is fully realized, points out Dean G. A. Covell of the school of engineering. The greatest need in Oregon is for highway engineers. Because of the elaborate road building program the demand is not supplied. Graduates in other fields of engineering also have no difficulty in obtaining responsible positions.

Gain in number of students is shown in practically every division and department. The school of commerce has 543, home economics 497, pharmacy 154, school of mines 83. In the school of music 35 are registered in the full four-year course, while 160, who are majoring in other branches, take incidental instruction in music.

The high quality of work done this year is noticeable. Most of the 2906 students are high school graduates or have been transferred from other colleges or universities. Increase in faculty has been necessitated by heavy enrollment in some departments, and no pains have been spared in obtaining the best talent available. Men lead women 2070 to 634. The freshman class numbers 1091.

The number of applications for state aid for ex-service men sent to Salem for approval is 906. The fed-

A New Tire

Here is a tire that is a tire—THE GENERAL CORD. It is guaranteed for 10,000 miles, but you don't have to worry about that. For it will always beat that mark. The next time you buy a tire, buy a General—it's the tire you've been looking for.

Have a full line of accessories here. Drop in and look over.

ROBERTS & HANKS

428 Main St.

eral board for vocational education has sent 122 rehabilitations to O. A. C., which is reported to be the largest number assigned to any institution west of the Rocky mountains. A number of ex-service men have received scholarships from churches or other organizations, among which are three whose expenses are being provided by the supreme council of the Knights of Columbus.

That the college has a reputation over the country for efficiency is indicated by the fact that 129 students now in attendance were transferred from 53 institutions in 21 states and territories. The University of Oregon leads the list of transfers with 23. State universities all the way from the Atlantic to the Pacific are represented.

Due to lack of facilities at the opening of the school year it is estimated that at least 200 persons who applied for entrance returned home or entered other institutions. The congested condition was relieved, however, soon after when the S. A. T. C. barracks were converted into a dormitory. With accommodations for 140 additional students in this building and increased rooming facilities in Corvallis, it will be possible to care for all persons who desire to register January 5 for the work of the second term.

What is being accomplished at the college under adverse conditions is considered remarkable by persons who are familiar with the situation. More room is needed for class, laboratory and investigational work—and needed badly, it is pointed out. Seven instructors in one department have been forced through lack of accommodations to use one room for office and conferences purposes, and this is typical of the crowded condition in other departments.

TOBACCO FACTORY

SACRAMENTO, Cal., Dec. 16.—Sacramento valley tobacco growers will meet in Sacramento on December 18 to make arrangements for the erection of a big tobacco factory.

A subscription to The Evening Herald for a prospective locator this year, might mean a Christmas present for all of us next year.

DON'T SAY "OVERALLS," SAY

UNION MADE
Ironalls

They will give you the service They are Union Made and have a number of features over other makes of overalls. First is the material from which they are made; second, all seams are felled and triple stitched; third, cord-bound button holes and full cut in seat. Last, they are Union Made.

We handle the complete line.

An Exceptional Business Opportunity

It is our intention soon to establish in this community a new and electric store for the sale of the latest in electric lighting and power plants.

This new electrical store will enjoy an exceptionally profitable and substantial business.

The same lighting business is now recognized as one of the largest in its possibilities ever developed in this country. Lalley Light dealers everywhere are enjoying a larger profit from the sale and installation of Lalley Light plants and the subsequent sale of electrical and plumbing equipment, than they have experienced in any previous line of business.

Any live, aggressive firm or individual who realizes the great future of the farm lighting business in this community is invited to write us at once for our attractive Lalley Light dealer's proposition.

Manufactured by Lalley Light Corporation, Detroit, Michigan, U. S. A. Capacity—Approximately 1,000 Watts. Only three moving parts. Water-cooled. Equipped with 16-cell storage battery and water tank in use 10 years. Sold largely in every civilized country the world over.
