### Getting the Fur Coat Out of the Moth Balls Should Be a Reminder That Your Automobile Battery Needs a Little Extra Attention

\*

"The average motorist," said Judd Low, manager of the local "Exide" Service Station, the other morning, "is a queer combination of sound American common sense and unsound American easy goingness. And what parts of his car he never sees or hears a com-plaint from he is prone to neglect. And that, of course, is mainly why the battery suffers—it never complains.

"It does its work, right up to the point where it has nothing

more to give, under the most negligent and cruel theatment. But, of course, by the time it has reached such a point it is in mighty

of course, by the time it has reached such a point it is in mighty bad shape, and building it up again is going to cost Mr. Careless Motorist a penny that he might very well have saved himself.

"And all this in spite of the fact that we are continually writing our customers—talking to them, sending them folders and circulars—on the subject of getting better performance and longer life from the battery and keeping down big repair bills by giving it the right kind of service at the righttime. Right now we are sending out a little folder showing the importance of giving the battery proper storage when the car is laid up for the Winter. It has been the bad habit of many automobile owners at the approach of cold weather to simply run the old bus, fully equipped, into the

has been the bad habit of many automobile owners at the approach of cold weather to simply run the old bus, fully equipped, into the garage and then lock the door till next Spring.

"Certainly so far as the battery is concerned, this is a mighty poor proceeding. Inside of the battery, owing to its chemical nature, a certain sort of action and reaction is continually taking place, even when it is idle. For this reason it demands certain attention at regular periods. This attention can best be given it when it is stored under such conditions and superintendence as only the battery event can give it. Because of this weadyles our contendence. tery expert can give it. Because of this, we advise our customers to remove their batteries from their cars, sending them to us to be stored and cared for in our storage department. The cost of Win-ter storage is small and there is assurance that nothing detrimental can nappen to the battery during Jack Frost's reign.

### SUIT IN EQUITY FOR DECREE OF DIVORCE SUMMONS

Equity No. 1113

In the Circuit Court of the State of Oregon for Klamath County.

Frances Gertrude Winchell, Plaintiff, vs. James Howard Winchell, Defendant.

To James Howard Winchell, the above named defendant:

In the name of the State of Oregon you are hereby required to apappear and answer the complaint filed against you in the above entitled suit, on or before Monday, the 5th day of January, 1920, that being the day of the last publication of summons and the last day within which you are required to answer, as fixed by the order of publication of this summons. If you fail to appear and answer, the plaintiff will apply to the court for the relief demanded in said complaint. Said suit is brought to secure dissolution of the bonds of matrimony existing between yourself and plaintiff.

This summons is published in The Evening Herald a daily newspaper

tween yourself and plaintiff.

This summons is published in The Evening Herald, a daily newspaper printed and published at Klamath Falls, Oregon, by order of Honorable D. V. Kuykendall, Judge of said Court, and dated November 21st, 1919, the first publication to be made on the 24th day of November, 1919, and the last publication thereof on the 5th day of January, 1920.

with old misery Liniment"

Rub this soothing, penetrating ilu-iment right into the sora, inflamed nerves, and like magio—netralgia disappears. "St. Jacobs Liniment" conquers pain. It is a harmless "neuralgia relief" which doesn't burn or discolor the skin.

Don't suffer! It's so needless. Get

a small trial bottle from any drug store and gently rub the "aching nerves" and in just a moment you will be absolutely free from pain and

No difference whether your pain or pany got in on the New Haven games in three factories. part of the body, you get instant re-lief with this old-time, honest pain destroyer—it can not injure. NOTICE OF FINAL SETTLEMENT

F., meets Tuesday night of each sek at I. O. O. F. hall. Artie Wor O. P.; Nate Otterbein, S., Fountain Treasurer,

Doughboys in France Hailed as Friend Man Whom They Had, When "Kido," Feared Greatly.

The story of how two doughboys found their old enemy in France is told by Mike Nolan, former police lientenant of New York city, who served as a K, of C, secretary assigned to the Sixteenth Infantry, First division. Nolan is fifty-two years old and put in 23 years on the New York police force. When he changed the blue uniform for khaki, he was in charge of the twenty-third precinct, the old Ten-

On his breast is a victory ribbon with two bronze major offensive stars and three silver citation stars. He has been recommended for the D. S. C. by the commanding officer of the Sixteenth infantry.

He had wandered up to a "little bunch" of doughboys who were "shooting craps," and gave each of the boys a pack of K. of C. cigarettes. The game was an exciting one, and a soldier who was about "to roll the ivories" looked up at him and asked him to "kiss 'em for a five." Noian did so, and the dice turned up a two and

One of the unlucky boys who had lost on the toes of the dice looked up at Nolan and recognized him as an old enemy.

"Holy cat!, Look, it's Tenderloin Buil Nolan!" he said to his pal. "Don't

you remember, he's de cop who used to chase us from doorways for shooting craps when we was kids?"

"Shure," said the lucky soldier, "and he pulled us once for smoking butts. And here he is shelling out packs of real cigarettes and kissin' de bones for us. Damn'd if it ain't right dat de war changes de whole wolld!"

### INSIGNIA OF ANCIENT ORDER

That Now Worn by United States Army Medical Officers Goes Back Four Thousand Years.

The caduceus, which was introduced in 1902 by Col. John Van R. Hoff, M. C., U. S. A., editor of the Military Surgeon, as part of the medical officers' insignia, dates back 4,000 years, according to F. H. Garrison, M. D., U. S. A., writing in the Journal of the American Medical Association. For a number of reasons the serpent was always the symbol of medicine in antiquity. The Babylonians' caduceus, which as the insignia shows today—two snakes entwined with wings at the top of the staff-occurs in Hittite remains. It stands for an actual serpent god, Ningishzida, who as the special messenger of Ishtar, was the awakener of life in the springtime, and the Mesopotamian prototype of the Greek Hermes, The Romans had a special functionary, the caduceator, who was a sort of peace commissioner. The caduceus was used on the title pages of books published by the famous medical printer. Frobenius, in 1460 to 1527. The "wand of Mercury," as it is sometimes called, was also carried by merchant traders in ancient times, on excursions where peaceful negotiations were desired and they wanted to be known as neutrals.

Labor Troubles in China. The \$40 a month which the Chinese coolle with his family drew from the Chinese government during his period the labor disturbence which is rocking China at the present time, Along with other industrial activisays C. C. Thompson of Shanghai in ties, it remained for one ingenious the Seattle Post-Intelligencer. Mr. "Y" man in a New Haven, Conn., Thompson explains that prior to the war the average coolle made a month-ly wage of \$12 to \$15, while having become accustomed to the new standfactory to devise a scheme which he ards of living made possible by the in the shops. Wherever we can find \$40 allotment he declines now to rea floor space nine feet wide by thirturn to the old basis. Even household ty or more feet in length we set up domestics have become affected by portable backstops, paint or burn the new unrest and are demanding the spots on the floors or sink metal more money, he says. Recently because of the unsettled conditions there was a strike of dockworkers in Chipine, six wood or mineralite balls, nese ports which held up all trans-Pacific traffic for a considerable time. Mr. Thompson states.

Owes All to Uncle Sam.

Building upon his past experience as an employee in a shoe factory, the federal board for vocational education placed a young chap of 24, who was disabled at Soissons, in a shoe in facturing plant for training. His left hand and arm were severely injured by a high-explosive shell, but he finds he can carry on, in spite of the handicap, and is fast becoming an expert oe cutter. The management, finding his service valuable, are paying him \$1 a day—this, of course, in addition to his training pay, which comes from the board. He is enthusiastic and writes: "This training is great stuff. Everything is going fine. wouldn't have been able to do anything if the government hadn't given me this chance."

Movies Set Distance Record.

Two moving picture records were broken recently, according to the Pop-Notice is hereby given that the undersigned has filed in the County Court of the State of Oregon, for Klamath County, the Final Account of his Administration of the Estate of Alexander Cheyne, deceased, and said Court has fixed January 10th, 1920, at 2:30 P. M., as the time, and the court room of said Court as the place for the hearing of said Final Account and for the settlement thereof. ular Mechanics Magazine, at the centenary celebration of the Methodist of his Administration of the Estate of Alexander Cheyne, deceased, and said Court has fixed January 10th, 1920, at 2:30 P. M., as the time, and the court room of said Court as the place for the hearing of said Final Account and for the settlement thereof.

Dated: December 6th, 1919, Alex B. Cheyne, Administrator, with the Will-Annexed of the Estate of Alexander Cheyne, Deceased.

### TIMES "SURE HAD CHANGED" HAVE SIMILAR FINGER MARKS

Important Discovery Made by California Professor as to Peculiarities of Family Groups.

Prof. J. A. Larson, instructor of physiology in the University of Callfornia, announced a new discovery in connection with finger prints which is likely to have a remarkable influence on many important cases that concern the law courts of California.

Briefly, Professor Larson's discovery indicates that a similarity of finger prints among members of a family is sufficiently marked to enable scientists to trace family groups and determine positively whether a given individual is really a member of the family to which he claims relationship.

The importance of the discovery in probate cases such as the Slingsby case is obvious.

Should Dr. Larson's new discovery be accepted by law and science, the Slingsby decision may be reversed, as well as many other analogous cases. Dr. Larson's investigations began in 1913 at the Boston university.

"Since that time I have examined prints of members of approximately 100 families," he said, "and I am satis-fied in my own mind that such a means of identification is possible. I am preparing detailed reports of my work now in order that science may be benefited by my discovery. Before I complete this, however, I expect to investigate the prints of fifteen or twenty additional families so as to remove all doubt as to the accuracy of my discovery."—San Francisco Chron-**(c)** 

### AMBER FORMED BENEATH SEA

Natural Resin of Pines Turned Into Precious Material by the Action of the Elements.

The world's supply of amber, that rare and therefore precious substance, the "gold of the north," as it has been called, comes from the coast of Samland in the eastern Prussian peninsula, between the towns of Burstrort and Palmnicken, and here the shafts of a famous mine run out under the Baltic and the miners are actually working under water. Ages ago the country was a land of pine forests which the ocean overwhelmed; the pine trees vanished beneath the surface of the sea, and then, century by century, the wood became fossilized and the natural resin of the pines was turned into amber. Millions of years were needed to transform the resin into amber, and the search for amber has developed romantic and picturesque episodes like those that have become part and parcel of the story of gold and diamonds. An amber mine, however, is not necessarily under water, and there is an open air mine at Palm-nicken where amber is dug for in much the same way as diamonds are sought in the mines of Kimberley. In normal times this one mine provides occupation for about 3,000 amber

Masters. 19 45

We have been told that America is to save the world and rescue civilisation from dissolution, but we must do it in our way; in the way that has made us, in a little more than a century, the most unified, the most virile, and the most potent single power in the orid. And when we ask ourselve what it is that has given us this unity, this virility, and this potency, the an swer is, that we have founded this nation upon principles of law, and upon the guarantees of individual rights under the law. That is our great contribution to civilization; and f we are to be of use to other nations, old or new, our first thought must be to remain our own masters, to preserve our independence, to control our own forces as a nation by our own laws, and to protect our heritage of organized liberty from any form of detraction or perversion. — David Jayne Hill in the South American Review.

Glant Warrior of Middle Ages. The pride and magnificence that played their part in the days of chivairy can hardly have a better illus-tration than the suit of equestrian armor which has recently been placed on exhibition in the Metropolitan Museum of Art, in New York city, Sieur Jacques Gourdon de Genouffhac wore the suit in the sixteenth century, and Sleur Jacques was an uncomm large and powerful warrior, who serv ed under Louis XII. and Francis I, of France, As may be deduced from their armor, the knights of the period were not noticeably large men, and Sieur Jacques must have seemed a veritable giant, for a six-foot attendant at the museum has tried on his armor and is said to have "merely rattled around

Sea Moss.

Owing to the war the supply of "sea moss," of which several hundred thousand pounds, valued at almost \$50,000, have been imported annually, for the most part from France and Germany, has virtually come to an end. Sea moss (not seaweed) is the popular name of several kinds of mall marine animals that grow in colonies of a branching, plantlike form. Their commercial value arises from their having a horny skeleton which preserves the general plantlike shape

## TAKING THE CENSUS

During the 120 years between the taking of the first census in 1790 and the enumeration in 1910, the center of population of the United States moved westward at an average rate of about 47 miles for each decade. The last census showed the center to be in the city of Bloomington, Ind.
