STOPS HEADACHE, PAIN, NEURALGIA

Don't suffer! Get a dime pack of Dr. James' Headache Powder.

You can clear your head and relieve a dull, splitting or violent throbbing headache in a moment with a Dr. James' Headache Powder. This old-time headache relief acts almost magically. Send some one to the drug store now for a dime package and a few moments after you take a powder you will wonder what became of the headache, neuralgia and all the other things that stop you when you get what you need for.

FOR SALE

4 room strictly modern house on pavement, \$1900, \$400 cash, balance like rent.
5 room modern home in Hot Springs addition, on easy payments, immediate possession.
6 room modern new house on 10th street pavement. Immediate possession. Price \$4500.
CHELCOE & SMITH 7-9

Walter Cox, the Grand Circuit pilot, has completed the removal of his entire racing stables from Dover, N. H., to Laurel Hill farm, Indiana. If names count for anything, Runar Ohman, the Swedish champion, should be a likely contender for Marathon honors in the big Boston event next April.

Lift off Corns!

Doesn't hurt a bit and Frezzone costs only a few cents.

Try Frezzone! Your druggist sells a tiny bottle for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Frezzone is the discovery of a noted Cincinnati genius.

WHALE BLAMED FOR DISEASE

Malady That Attacks the Lungs is Thus Diagnosed by Prominent Danish Scientist.

The echinococcus disease (caused by a small tapeworm in the liver or lungs), which first made its appearance in Holland, is believed by Dr. Van Deinsse to be due originally to whales. The Medical Record quotes from a Dutch scientific paper some of the facts upon which Van Deinsse bases this theory.

"It is said that this affection is endemic in Iceland and that it eventually reached Friesland from that locality. Not only Friesland was attacked in the eighteenth century, but many other seaports along the North sea and English channel. The connecting link appeared to be the whale fisheries, originally a Basque industry, with headquarters at Bordeaux. In the seventeenth century the channel ports engaged in the whale-catching industry. Friesland, possibly infected from Iceland, also engaged in whaling, appeared to be a distributing point of the infection.

"Not only whales, but also seals and other Arctic fauna, were perhaps infected with echinococcus disease, which was conveyed directly to mankind when in starving seasons they ate this flesh and to dogs and cats in the same manner, the animals then serving as hosts for the parasite along with mankind. In time this maritime industry went out of use. Recollections of old whalers, however, testify to the custom of taking dogs along on whale ships, so that dogs could become infected aboard ship and menace the home dwellers."

TRACED DESCENT OF HORSE

Oregon Professor Left Records of His Researches in the Marshes of Oregon.

Horses of the miocene tertiary times, and during the pliocene age, which came later, roamed around the marshes of Oregon, according to Professor Condon of the University of Oregon. A letter which the professor wrote a woman in Nashville, Ore., thirty years ago, has been discovered, in which he referred to some of his own specimens of the early horse.

"There were in Oregon three or four species of the small horse," the professor wrote. "I have fragments of many individuals of several of these species. The one of which I have the most complete skeleton was about two feet high. He lived during the miocene tertiary times."

"My fossils would not warrant me in speaking of more than three hoofs on each foot; the center one on each foot being large, and the other ones small. Each fetlock bone furnished him with what was an external hoof."

"Belonging to a later period, the pliocene, I have other horse remains. The older classification gives the name Hipparion to the pliocene horse. The side hoofs of this animal were still external, and therefore, to some extent, functional. These horses multiplied in species, as well as in numbers, varying in size until the horse proper, or equus, came on the stage with only rudimentary fragments of the metatarsal bones of the side hoofs provided for."

Insects That Walk on Water.

Insects that walk on the water by means of pneumatic floats are the familiar spider and the pond skater. The pond skater really walks on pneumatic floats. There are tiny hairs on the feet of this insect, so fine that they cannot be seen, that are arranged to collect air. The amount collected in and about these hairs is sufficient to allow the insects to walk or float on the surface of the water. As each foot is put down it forms a cuplike depression, or tiny pit, in the water. The foot does not sink, because the air bubble that has been formed is too light to let it. A fine covering of hair protects the water spider, too, and even if it is submerged in the water it is never really wet; the hair keeps a layer of air between its body and the water. It looks like a white pearl when below the surface.

All That is Left of the Mastodon.

An early find of mastodon bones from Shawangunk, Ulster county, New York, was presented to the University of Virginia by Thomas Jefferson, third president of the United States, who, like Theodore Roosevelt, twenty-sixth president, was an enthusiastic naturalist. It is noted by natural history that after the great transcontinental glacier receded large marshes were left in the region where these bones were unearthed, and in them these animals frequently became mired. Both Ulster and Orange counties have been prolific in mastodon remains. The Warren mastodon, dug up near Newburg in 1845, and now in the American museum, is the most perfect skeleton so far found. Bones are frequently turned up by farmers, and the specimens have even included hair, long, dense and shaggy, and of dark golden-brown color.

What's in a Name?

Mistress—Let me see! What's your name?

Maid—Minnie, mum.

Mistress—Well, Minnie, if you'll only do the maximum of work, you'll suit!—Tit-Bits.

The Result.

"My wife undertook to make me some of this new 'bee' wine."

"What happened?"

"I was stung."

COMMITTEE IS DRAFTING FISH AND GAME BILL

PORTLAND, Jan. 9.—Senators

Norblad and Handley and Representative Bean are preparing a bill to submit to the special session of the legislature which will contain the result of the conference between the governor and the joint committees of the senate and house on fish and game legislation. This bill, or rather the idea it contains, was approved by all the members of the joint committee excepting Senator Thomas.

As planned there will be a fish and game commission of seven members, but the work of the commission will be in two departments—one to look after commercial fishing and the other the interests of the sportsmen. Three commissioners will have charge of the commercial and three of the sportsmen's departments. The seventh member will act as an arbitrator in case of dispute.

Governor Olcott has asked that the legislature create two commissions, but the joint committee did not approve this plan for the reason that in certain matters the commercial men and the sportsmen must co-operate, and the two departments must be coordinated. The governor, however, informed the members of the committee that he will abide by the plan proposed, which he considered in the nature of a compromise.

Under the proposed new commission each department will handle its own funds. The sportsmen will be responsible for the money coming in from that source and must make the best showing possible to satisfy their following. The commercial members of the commission will attend to the propagation of commercial fish. In the event of a dispute the seventh member will sit in judgment and act as a jury.

It is also the intention of the joint fish and game committee to have the legislature designate the personnel of the new state fish and game commission, or at least name six members, with the governor naming the seventh. The idea of the legislature assuming responsibility of naming the commissioners is not opposed by the governor.

By the time the special session convenes next Monday, Messrs. Norblad, Handley and Bean hope to have the draft of the bill completed and ready to introduce. Senators Norblad and Handley, coming from Astoria and Tillamook, are interested in commercial fishing and Representative Bean, from Eugene, is one of the most ardent sportsmen in the state and has taken an active part in legislation for sportsmen throughout his long career in the legislature, both as member of the state senate and house.

Senator R. W. Ritner, who attended the conference at Salem, believes there should be about five commissioners on the sportsmen's end of the commission. He says that Portland now has one member, and eastern Oregon and southeastern Oregon are represented, but that there should also be representation for the Willamette valley. Mr. Ritner has written his view on the subject to Mr. Bean for the latter's consideration.

The crux of the conference at Salem did not come until the joint committees went into executive session. Throughout the day there was a vast amount of talk about fishing on the Rogue river, which had no part in the purpose of which the conference was called. Senator Thomas, who is opposed to commercial fishing in the Rogue, voiced his objection to the proposed fish and game commission being divided into two departments. Mr. Thomas demanded that there be two distinct commissions, one for game and the other for the commercial interests. He was a minority, however, as the other members of the joint committee considered the plan agreed on as the most workable. The proposed measure, thus backed and supported by the joint fish and game committee, should be ready to report out in short order when the legislature gets down to business.

SHIPS ASSIGNED TO TRANSPORT DUTY

WASHINGTON, Jan. 9.—American ships furnished by the United States Shipping Board will be used to repatriate Czechoslovak, Polish and Rumanian troops now in Siberia, announced the state department today.

The first vessels, the President Grant and America, will leave soon for Vladivostok, where they are due about February 10.

FIGHT JUST STARTING FOR THESE "DRYS"

The real job is just starting for these two men—both life-long workers for prohibition. Above is Ernest Ernest Cherrington, who heads the organization for a world-wide prohibition. He is also in charge of all anti-saloon publications. Below is Wayne B. Wheeler, attorney for the Anti-Saloon League of America, who has prosecuted over 3000 cases, some of them in the United States Supreme Court.

WORTH WEIGHT IN GOLD HE ASSERTS

HOWARD GAINS FOURTEEN POUNDS TAKING TANLAC AND LAYS CANE ASIDE

"I've gained fourteen pounds in six weeks taking Tanlac and now I'm a well man," said Henry S. Howard, a well-known farmer and stock raiser of King Hill, Idaho.

"I had suffered from rheumatism and indigestion twelve years," he continued, "and could hardly eat a thing because everything was against me and I had no appetite. Every joint in me was swollen with rheumatism and hurt so I could hardly bear to be touched. I was in such a bad fix I couldn't work and had to use a walking stick to get along. The first bottle of Tanlac made a great change in my feelings, my rheumatism soon left me and I threw my stick aside, for now I can walk as well as anybody."

"And eat!—why I just can't get enough and I feel like I could do as much work as I ever could. Tanlac is worth its weight in gold, at least has convinced me that there's at least one medicine that will do what they say it will and I want to do my part in letting everybody know about it."

Tanlac is sold in Klamath Falls by the Star Drug Co., and in Lorella by the James Merc. Co.—Adv.

CAPTAIN OF CHAMPS PEDDLES SHIRTS

Heinie Groh is thrifty. World series money, as captain of the champion Reds, failed to divert the peppery Heinie from his regular winter job, once the season was over. So any day now Heinie can be found behind the shirt counter of a Cincinnati men's furnishing store. And Heinie's boss says the Red captain is a real salesman.

ENDED IDOLATRY IN HAWAII

Brave Act of Kapiolani, Daughter of Chief, Resulted in Establishing Christianity There.

No longer do the fire lakes in the great crater of Kilauea carry terror to the soul of Hawaii as a message from the dreaded fire god, Pele. It is a century since Kapiolani, daughter of Kewihimanihi, high chief of the district of Hilo, and wife of Nathaniel, high chief of Kona, and the national orator, defied the fire goddess, and turned her people from the idolatry. Prior to that time the superstition ran that whenever Pele stamped her foot on the bottom of the volcano Mauna Loa, her "House of Everlasting Fire," there were earthquakes. If she became angered with hapless lovers, or any who failed to worship her, she was credited with pouring out torrents of lava and liquid flame. All who went near the crater were expected to do so with humility and sacrifice, and high priests of the goddess kept the people in awe. People gave their dead to the volcano, hoping they would become ghost gods to aid them. Then Kapiolani, in 1820, after three years teaching at the feet of missionaries, accepted Christianity, and did what is recorded as one of the greatest acts of moral courage ever performed. She visited the volcano against the advice of her husband and friends, and hurled stones into the pit, and ate of the enchanted berries near it. She defied the goddess. Before going up she left a message, saying that if she didn't return, her people should continue to worship Pele, but if she did they should accept the new teachings. Her return safely banished the hold of idolatry in Hawaii.

FIRST POST SERVICE CRUDE

That Between New York and Boston, However, Was the Beginning of Great System.

The first regular postal service between two American cities was established December 10, 1872, when the government of New York inaugurated a regular monthly post to Boston.

Some thirty-three years before that a post office had been opened in Boston at the house of Richard Fairbanks, "for letters which are brought from beyond the seas, or are to be sent thither."

In 1857 the Virginia assembly provided for the "rapid transmission" of official communications from plantation to plantation on penalty of one hoghead of tobacco for each default. Four years after the establishment of the New York-Boston monthly mail, the colonial court of Massachusetts founded an official postoffice in Boston, with John Hayward as postmaster.

The first parliamentary act for the establishment of a postal system in the English-American colonies was passed in 1602, and a royal patent was granted Thomas Neale, who was authorized to transport "letters at such rates" as the planters should agree to give. Neale began operations in Virginia, and the other colonies soon joined in the movement, although the system was very imperfect.

Whale's Breathing Apparatus.

An eminent naturalist says concerning the breathing apparatus of the whale: "The windpipe does not communicate with the mouth; a hole in, as it were, bored right through the back of the head. Engineers would do well to copy the action of the valve of the whale's blow-hole; a more perfect piece of structure it is impossible to imagine. Day and night, asleep or awake, the whale works its breathing apparatus in such a manner that not a drop of water ever gets down into the lungs. Again, the whale must of necessity stay a much longer period under water than seals; this alone might possibly drown it, inasmuch as the lungs cannot have access to fresh air. We find that this difficulty has been anticipated and obviated by a peculiar reservoir in the venous system, which reservoir is situated at the back of the lungs."

Insist on Facts.

When you have lived your life long enough and consistent enough there will be no occasion to question your standing. Each year added to its predecessors with the same consistent goal adds to the stability of character that makes character for the community. Such lives unconsciously stamp themselves upon everyone they touch, and the world is made better in consequence. It's the hope of the future that there will arise a class of men who will take nothing for granted—who will seek bed-rock facts for every new venture. Then will come the days when our civilization will be founded on truth and the results attained will abide. You can be one of these framers of the new age if you want to. Lend your aid in making the world better and its people happier. Teach people not to take things for granted.—Grit.

Animals Worth Owning.

A performing animal often has a greater earning capacity than a successful man of business. The first kangaroo to enter the boxing ring in America earned a sum in five years that allowed himself and his owner to retire from the limelight and spend the rest of their lives in peace and quiet. This was the first of a long line of pugilistic kangaroos who "made" their masters. Much of the success of Hagenbeck's Wonder Zoo at Olympia a few years back was undoubtedly due to the engagement of Max and Moritz, the "human apes."

NOTICE

Bonanza, Ore., Dec. 31, 1919.
To the Stockholders of the Bonanza National Farm Loan Association: On Tuesday, January 13, 1920, the annual meeting of the stockholders of our association will be held in the church in Bonanza, at 2 o'clock p.m.

This is your meeting. Your interests are under consideration. We who have served you as best we could for the last twelve months are ready to report what we have done.

This is the time to elect our successors for the ensuing year; the time to make arrangements for the improvement and enlargement of our association, and to correct any faults in its management.

We have over thirty members now who have received over fifty thousand dollars. There is not one dollar delinquent. No new indebtedness has been incurred during the year and 50 per cent of the debts existing a year ago will have been paid.

All this in detail concerns each of you directly. Will you not come at the time appointed and help us make a better record next year?

H. M. DANIEL,
Sec'y-Treas. B.N.F.L.A.

HAY GROWERS ATTENTION

The Hay Marketing Committee of the Farm Bureau has a market for 175 tons of baled hay. Farm bureau members wishing to bid on these orders may get in touch with the market through the Bureau secretary in the county agents office. (If you are not a member of the Farm Bureau, it only costs \$1.00 to join). 13
