BUILDING NEW NAVY.

REVAL, Esthonia, Jan. 16. (By Mail).- Esthonia has taken energetically to shipbuilding. A small fleet

ships are being built of American steel at Reval.

PERFORMANCE COUNTS

Make Your 1920 Truck a

You will Earn and Save by doing so.

A good motor truck is the means of earning money, but it must be a high-grande, thoroughly engineered and manufactured truck.

That is because it will do you no good to earn money through the operation of a truck and then have to spend all you make (and probably more, too) in order to keep the truck running.

At this time you probably are thinking about how to increase your business during 1920. You must have a truck or you must have another one. Upon that you have de-

Then it becomes a question of selection. You should buy a truck as you would make an investment of any other type. Knowing your needs, the choice should not be difficult.

MACK trucks are recognized as the standard of heavy-duty transportation. There is a size that is right for your needs. We would appreciate an opportunity to tell you about MACK trucks.

Editor of The Herald.

Dear Sir.—I have before me a report of the proceedings of the Western States Reclamation congress at Salt Lake City and there are many things which would be of great inhings which would - or shouldmake the doubting Thomas sit up and take notice. In a speech Chas. H. Stewart, president of the federal

reserve bank of Salt Lake City, said:
"The first of November, on a pleasure trip, I drove from Burley, daho, through Twin Falls and on to I think I saw there the most triking example of the effect of irrigation that a man could meet. I don't believe the water had been on the Minnedoka project more than seven years, but Burley is now a town of five thousand people, with two or three millions of bank deposits, fine stores, and substantial buildings. I do not believe you would find a better town forty or offer years old in the stores. fifty years old in the farming sections of the east. We drove out of Burley and found on every side homes, great alfalfa prosperous tacks, dairy herds grazing; and just as suddenly as though a picture were thrown on the screen, we were in the Not an occupied house for -nothing but a few tumbledown shacks where a homesteader had fought a losing fight and given it up. In all the 25 miles, until we reached the Twin Falls project, then ust as suddenly we found ourselves Klamath lagain surrounded by good homes, following: farmers hauling beets to the dump others digging potatoes—all cash ing in on the products the land and water had raised for them on land which was no better than the 2 miles of desert through which -we had passed, which was a barrer

He also mentioned the Strawberry Valley country, which is irrigated at cost of \$100 per acre; and the returns on the crop of this year have tons of sugar beets per acre. He brigation been \$200 per acre they would have still been better off, con-

sidering their previous condition.

Answering some informal ques tions, Mr. Stewart made the following statement:

"We started our crop estimates on dry farms largely on the expense of outling in the crop—\$10 per acre. Later we allowed as high as \$20 per acre in August, but we were ready to consider a crop estimate in the spring on an irrigated farm of \$30 to \$40 per acre."

The question was asked, "How would you state the ratio between dry and irrigated farms in the matter of these loans?" The ratio would be at least three to one, was his answer.

In a speech by A. P. Davis, general in a speech by A. P. Davis, general director of the United States reclamation service, Washington, D. C., the following facts were stated: In the year 1919, on the 25 projects operated, a million acres actually in crops, the gress returns, good, bad and indifferent all taken in, averaged \$63.40 per acre. The agricultural department statistics of the country at large is almost exactly country at large is almost country at large is almost exactly one-half what it is from irrigated land. Governor Davis of Idaho call-2 nitention to the fact that the Twin Falls project, costing between ten and twelve million dollars, and records from the railway company for the last year show they moved from the project \$42,000 don worth. from the project \$42,000,000 worth of agricultural products. The Yakima project, costing \$14,000,000, showed crop census of \$54,000,000

for the year. And so it went through the congress. These statements were made by men of standing, with facts and figures to verify their statements While attending the congress I talked with many people, representing many different projects, and, with

I. A. L. Leavitt, Police Judge of the City of Klamath Falls, Oregon, do hereby certify that the foregoing is a duly enrolled copy of the Resolution adopted by the Common Council on the 26th day of January, 1920, relative to changing certain grades on Pacific Terrace. A. L. LEAVITT, Police Judge.

saw a more prosperous farming sec-Timber Sale, Klamath Indian Reser vation.—Sealed bids, in duplicate, marked outside "Bid Eggsman Unit,"

marked outside "Bid Eggsman Unit, and addressed to the Superintendent Klamath Indian School, Klamath Agency, Oregon, will be received until twelve o'clock noon, Pacific time, Thursday, March 11, 1920, for the purchase of timber on 640 acres of tribal and allotted land on the Sprague River in Sections 22, 27 and 28, Township 34 South, Range 5 East of the W. M., Klamath Reservation. The sale comprises about vation. The sale comprises about two and one-half million feet of yel-low pine, for which no bid of less low pine, for which no bid of less than three dollars and ten cents (\$3.10) per thousand feet will be considered. All timber must be removed prior to July 1, 1921. Each bid must be accompanied by a certified check for one thousand dollars payable to the Superintendent of the Klamath Indian School. Deposit will be retained as liquidated damages if bidder fails to execute contract and bond within sixty days from acceptance of bid. The right to reject any and all bids is reserved. Form of contract and other information may be obtained from Superintendent. Washington, D. C., January 23, 1920. CATO SELLS, Commissioner of Indian Affairs. 3-eod-28

enly two exceptions, the cost per tien, with sugar beets piled in great acre for irrigating far exceeded the heaps in the fields and comfortable estimated cost of our Langell Valley homes and surroundings. There is district—\$32 per acre construction one thing sure, that in the event of and \$10 water charge. Some of our people say our alti-tude is too high and our climate is not as favorable. Salt Lake City has an altitude of 4,280 feet, but I never tween the bank account of the two. But when we see the difference be-tween the bank account of the two, I believe there will be many who will forsake chaps and spurs for the shovel.
