**FARMERS SELL
BY NEW PLAN**

NEW HAVEN, Conn., Feb. 28.—An experiment in use of the hamper for carrying products of the farm from the farmer to the city householder, is being tried out in Connecticut. The Department of Agriculture has approved the idea which is patterned on that of the parcel post rural service. The street railway express is the medium of transportation, not the mails.

A farmer may take orders by telephone or mail, fill up a hamper and deliver it to the street railway company which maintains an auxiliary express service along its lines with automobile delivery in the cities. Eggs, poultry, potatoes, apples and other farm products, ordered over the wire, may be delivered in a few hours with as much care as a marketman in town gives to his city customer.

The New Haven County Farm bureau, which for a year has studied local marketing, by a survey found the possibilities of the trolley express were such as to develop a "farm to table" delivery by means of a "home hamper." Connecticut is gridironed with trolley lines. Tens of thousands of farmers can see cross country trolley lines pass. Express cars pick up wayside freight or express matter at any stopping place. Hampers made up in Milford were delivered in New Haven and Bridgeport, within two hours, or in as short an interval as a city merchant makes his local deliveries.

The plan contemplates use of a uniform hamper of varying sizes, easily handled as express, recognized by car crews and automobile drivers as containing foodstuffs with the possibility of perishable articles, like dressed poultry, or breakable, like eggs.

Experimental hampers hold enough food to last a family several days. Success of the plan depends largely upon the initiative of farmers in securing customers who are willing to have delivery made in this way.

**MONEY DOWN AND
WAGES UP, AUSTRIA**

VIENNA, Feb. 10. (By Mail).—The effect of the diminishing value of Austrian currency is shown in the great increases in wages demanded here. There was a strike of tailors the other day to enforce a demand by master tailors for an income of 65,780 crowns a year. Their pre-war earnings were about 2,700 crowns. Assistant tailors, that is plain sewers, asked for about 36,000 crowns a year. Before the war they averaged 700 crowns.

In all recent strikes and demands of other class of workers, a sliding scale allowance was asked so as to meet the advances in the price of necessities.

The United States has been supplying English cotton manufacturers with raw material since 1791.

**BRITISH EXPORTS
ON THE INCREASE**

LONDON, Jan. 26. (By Mail).—The adverse balance of trade against Great Britain as shown by comparison of her exports and imports during the month of November was the lowest attained since the armistice. Its total was 36,200,000 pounds.

Britain's exports increased about 5,000,000 pounds in November while in the same period her imports decreased about 10,000,000 pounds. The decline in imports is attributed by the American Chamber of Commerce in London in part to the recent strikes in the United States. It is stated also that decreased production and shipping troubles in Amer-

ica forcibly reduced British imports market for exports in continental Europe which were shut off from their source of supply.

**JAPAN MAY LET
STRANGERS OWN LAND**

TOKIO, Jan. 20. (By Mail).—An effort will be made in the forthcoming session of the Japanese Diet to enact a law permitting foreigners to own land in Japan. The failure heretofore to grant this right has been cited many times abroad as evidence that Japan withholds from others what she asks for her own subjects in the United States and other countries.
