FIVE PER CENT BILL NOT GAINING GROUND

Professional paid circulators in Portland are endeavoring to get signatures to the proposed 4 per cent and 5 per cent interest rate bill, but they are meeting with very poor success, according to the Tax Liberator. People realize that instead of lowering interest rates in Oregon this bill will produce a condition under which it will be impossible to borrow money in Oregon at all. They fully understand that money will not be

loaned in Oregon at 5 per cent when it can be loaned in adjoining states at 8 per cent.

The present low price of Liberty Bonds on the open market presents an interesting phase of this situation. Liberty Bonds can now be purchased at a price which will net the owner between 5 per cent and 6 per cent. If money could not be loaned in Oregon at a greater rate than 5 per cent, naturally persons with money to loan would buy Liberty Bonds instead of loaning their money.

If this measure should pass, every loan in Oregon which is now in effect would be called when it becomes due. This would mean the foreclosure of practically every Oregon mortgage, and business houses which have to finance themselves with borrowed capital would be forced out of business.

Personal Mention

Ed Young, Poe Valley rancher, is seriously ill at his home with erysipelas. Dr. Soule was called to attend him yesterday and found the face and scalp of the patient attacked by the disease. He reports, however, that the spread has been checked and quick recovery is indicated.

W. L. Wright arrived yesterday from Sacramento to take the position of assistant manager of the local plant of the Standard Oil company, vacated three weeks ago when former Assistant Manager Kirkham was transferred to Orland as special agent for the company.

Mrs. O. D. Burke returned last night from a month's visit with relatives in Missouri and Nebraska. She found the East gripped by severe storms and blizzards and is glad to get back to a mild climate.

LARGEST TELESCOPE
