HAVE BENEFITED BY TABOO

South Sea Islanders Made Better by Restrictions Imposed by System It Represented.

From our interesting neighbors, the South Sea Islanders, we have the word "taboo," so expressive in the complete agreement of its sound with its meaning that there is nothing so adequate in our own language to give this thought.

In its original sense, it is a curious combination of conflicting ideas. It is the Polynesian tabu, meaning sacred. Yet to its own people it expresses the same thought for which we have appropriated it.

It came to represent an important institution in the life of the people, reaching in every phase of their lives enforced under penalty of death. Sacrifices to the gods, festive seasons, even marital relations and the cooking and eating of food—all were attended by their particular taboo.

Though the efficacy of prohibitions such as this is questionable, the taboo system, by virtue of many laudable rulings, has had, it is said, a very beneficial effect upon the people.—Hermine Neustadt.

OLD THEORY MAY BE RIGHT

That Malaria Is Caused by Emanations From the Soil Is Probably the Correct Idea.

We have lately been taught that the mosquito was the only disseminator of malaria, and that we should be safe if we got rid of mosquitoes. But Doctor Roux, formerly chief physician of the St. Louis hospital, Jerusalem, asserts as the result of his own experience of 20 years and of that of many colonial physicians that malaria often exists where there are no mosquitoes.

At Reunion and Senegal, for instance, the malaria season is just that when there are no mosquitoes; at Hlatou, London, natives living near a mosquito-infested marsh do not contract malaria, while those living in the hills where there are no mosquitoes are victims.

He points out that everywhere in malarial countries the disease breaks out just at the time when the soil is broken for planting. He does not deny that the anopheles mosquito spreads malaria, but he says this is evidently not the only means of infection.

The old theory that malaria was caused by the bad air of swampy districts or by certain emanations from the soil may be correct, after all.

Why Seal Hunters Wear Black.

No animal that is known has eyesight which at all compares with that of a man. A wolf can see you under favorable conditions a little more than half a mile away; a caribou at a little more than a quarter of a mile, and a seal commonly at about 300 yards, if you are standing up, or 150 to 200 yards if you are lying down. You can walk unconcernedly toward a seal until less than 400 yards away, after which you begin a careful approach. You crawl ahead on all fours while he sleeps and you lie flat and motionless while he is awake. It might seem that something could be gained by wearing white clothing, to match the snow, but this is the reverse of wisdom, for the seal's one enemy that he fears is a polar bear, and the polar bear is white. If a seal sees anything that is suspicious and white he takes discretion to be the better part of valor and dives promptly into his hole. If the suspicious object is black he assumes that it is probably another seal that has come out of another hole to bask in the sun. It is therefore the task of the hunter to simulate a seal.

Cactus Takes Long Trip.

A small cactus, the jointed opuntia, is widely distributed in arid regions from New Mexico northward. In some mysterious way it has reached many dry rocky ledges in humid Minnesota and Wisconsin, writes D. Lange in the American Forestry Magazine of Washington. A few years ago on a canoe trip on Lake of the Woods I found a fresh joint of this cactus among the boulders of the Ontario shore in a densely wooded region. How the plant reached this spot has remained a secret to me.

Lame Sickness.

An investigation of the South African disease known as lenziekte, or lame sickness, suggests that it is due to a special plant poison that is generated under abnormal conditions in grasses or other plants that are normally harmless. Its development seems to be associated with unusual weather and soil experiences of which summer drought is important. Through such conditions, wilting would favor the formation of the poison, and this explains the common belief that the disease results from eating wilted plants.

Ridiculously "Decorated."

Perhaps the most extraordinary idea in tutuology ever carried out is that of a French coachman, who has his body covered with more than 120 different designs. Among these designs are portraits of some of the most noted people in the country. The work of tattooing these pictures occupied more than two years.

"I am more grateful to Tanlac than words can express, for it has given me health and happiness after twelve long years of suffering." was the enthusiastic statement made the other day by Mrs. Olivine Peltier, of Vermont.

"I am more grateful to Tanlac than words can express for it has given me health and happiness after twelve long years of suffering." was the statement made the other day by Mrs. Olivine Peltier, No. 26 East Allen Street, Winoski, Vt.

"I had been troubled so long with nervousness and sleeplessness that my housework was a drudgery and I got little pleasure out of life. My appetite left me entirely and at times I could hardly bear the sight of food and what little I did eat caused me severe suffering afterward. Gas would form on my stomach so badly that it affected my heart and I thought I had heart trouble.

"I was so nervous I would jump at the least unexpected noise and would drop everything I had in my hands. I got so weak and faint at times that I would have to catch hold of something to keep from falling over. My sleep was broken and restless and I was losing weight rapidly. I had little strength or energy, and as I had tried all kinds of medicines without relief, I had become very much discouraged over my condition.

"My husband had been taking Tanlac and when I saw what wonderful results he was getting I decided to try it myself and now I think as much of Tanlac as he does because it has helped me the same way.

"My appetite has come back and everything agrees with me perfectly. I am taking on weight rapidly and have already gained nine pounds; in fact, I feel perfectly well in every way. Tanlac has done wonders for me and I am only too happy to tell others about it."

Tanlac is sold in Klamath Falls by the Star Drug Co., in Lorella by the James Merc. Co., and in Merrill by the Southern Oregon Drug Co.—adv.

White Pelican Baths open from 2 to 5 and 7 to 10 Special attention given private parties. M. A. MANN, Hot Spring Bath House
