

Have You Found a Room Yet?

SATURDAY, MAY 15

IS THE OPENING DAY OF THE

Arcade Hotel

1032-1034 MAIN STREET

New building, new rooms, new beds, new furniture—everything span, bran new.

Hot and cold water, steam heat, shower and tub baths. Reasonable prices. Courteous treatment.

A hotel for persons who seek cleanliness and convenience.

ALASKAN WOODS HOLD HOPE FOR FUTURE PAPER

WASHINGTON, D. C., May 13.—Secretary of Agriculture Meredith is convinced that there is a large opportunity for the department of agriculture to assist in the economic upbuilding of Alaska. As one means to this end, he is calling attention to the favorable situation for the establishment of paper mills in the territory, and offering co-operation by making available national forest pulpwood on terms that will provide a satisfactory operating basis.

The secretary believes that the development of the forest and hydroelectric resources of Alaska is a practicable means of increasing the supplies of newsprint available for the United States, and there eventually lessening the paper shortage, now so acute. The national forests of Alaska probably contain 100,000,000 cords of timber suitable for the manufacture of newsprint and other grades of paper. Under careful management, these forests can produce 2,000,000 cords of pulpwood annually for all time, or enough to manufacture one-third of the pulp products now consumed in the United States.

The Alaskan forests, according to Secretary Meredith, also contain the second chief essential of a paper-manufacturing industry—water power. While no accurate survey of water powers has been made, known projects have a possible development of 100,000 horsepower, and the department estimates that a complete exploration of the national forests in southern Alaska will increase their potential power to a quarter of a million.

High Prices Should Stimulate Development

According to the secretary, the chief drawbacks which have prevented paper making in Alaska hitherto have been the large investments required for new plants, inaccessibility and lack of development in Alaska, and the transportation charges to consuming regions in the central and eastern states. The secretary expresses the belief, however, that these obstacles are more than offset by the present acute demand and high prices for all grades of paper; and that the near future should witness a movement of the paper industry into southeastern Alaska.

"Alaska," said Secretary Meredith, "is destined to become a second Norway. With her enormous forests of rapidly growing species suitable for pulp, her water power, and her tide-water shipment of manufactured products, Alaska will undoubtedly become one of the principal paper sources of the United States. A substantial development of the paper industry in this wonderful region, combined with the intelligent reforestation of pulp lands in the older regions, should settle forever the question of a paper shortage in the United States." Within the last 10 years, he points out, the forest service has brought about the sale of 420,000,000 feet of saw-timber in the national forests of Alaska. A number of acres suitable for pulp operations have been cruised and prepared for sale; and during the coming summer the survey of pulpwoods will be extended in order that other desirable tracts may be brought to the attention of manufacturers. Promising developments in paper manufacture, in fact, are now pending. The forest service has also investigated stream flow in co-operation with the geological survey, and has collected data of value to engineers in planning power developments.

Department Offers Timber Contracts
Secretary Meredith also announced that, to encourage a paper industry in Alaska, national forest timber will be offered for large installations under mutually favorable terms. The department is prepared to contract sufficient stumpage to supply paper mills for 30 years. The timber will be paid for from month to month as it is cut, obviating the necessity for large investments in raw material.

The initial prices, based upon current timber values in Alaska, are sufficiently low to make the cost of pulpwood stumpage a relatively negligible factor to the manufacturer. On several areas which have been appraised, the spruce timber is priced at 50 cents a cord and the hemlock timber at 25 cents. These rates will apply during the first five years following the installation of the plant. Thereafter prices will be readjusted at five-year intervals if current timber values in Alaska warrant, but

Harmony in Your Home Surroundings

Beautify the walls of your Living Room or Bedroom with an attractive tint of

W. P. FULLER & CO'S Washable Wall Finish

The colors are mellow, soft in tone and wear well.

This ideal coating is replacing unsightly and unsanitary Wall Paper.

Washable Wall Finish is ready for use and dries with a hard surface that is easily kept clean.

BALLOT MEASURE WOULD AID BLIND

PORTLAND, May 13.—The practicability of training the blind in work that is remunerative is shown by the school for the blind maintained in Portland. Dozens of helpless, sightless persons have been taken from the streets and taught trades and arts that have made them self-supporting. It is because of the success of this institution which is open only to the blind of Portland, being maintained by the school district, that the blind people and others are seeking now to have a state institution which will enable the blind throughout the state to have the benefit of this training.

The question appears on the ballot at the state election May 21st in the form of a bill prepared by the legislature providing a levy of one-sixth of one mill for next year to establish the institution and one twenty-fifth of one mill each year thereafter to maintain it. The amount raised will be sufficient to provide for all the adult blind of the state.

Denmark claims that there is not a single adult person in her domain who cannot read or write.

KEEP BEES!

If you own an orchard you must have bees as they are the only dependable pollenizing agents.

You can keep bees anywhere that they can forage within a mile—they require but little attention and will often render you a splendid profit. We can start you right and save you unnecessary work and expense.

Our Bee Supply Catalog lists everything necessary for the successful production of honey; tells how to care for and handle bees.

Ask for Catalog No. K53

For a long time the Boers refused to sanction the construction of railways in the Transvaal, on the ground that nowhere were such contrivances mentioned in the Bible.

SALTS FINE FOR ACHING KIDNEYS

We eat too much meat which clogs Kidneys, then the Back hurts

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulates them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious complications.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

MALTHOID READY ROOFING

Quality in roofing is what gives it resistance to sun and rain—the two worst enemies of roofing. Quality in Malthoid is built-in. That's why it lasts so long—why it's the cheapest roofing you can buy. No better protection for house, barn, shed, fruit warehouse, shop, garage, etc. Comes in three thicknesses. Cement, nails and directions in each roll.

CONVENIENCES FOR 1920 PARK VISITORS

LIVINGSTON, Mont., May 13.—In the hope of inducing tourists to extend their visits to Yellowstone National Park, a change of policy for next season has been announced by the park administration. The establishment of a park mail service has been announced; additional trails will be constructed; camps and hotels will be forbidden to serve park trout on dining tables, that fishing for the tourist may not

suffer, and a boys' summer camp and school will be established.

Camp Roosevelt, at Tower Falls, is to be devoted almost exclusively to long time visitors, and saddle horses and other special equipment will be made available.

Until private automobile parties began to invade the park in recent years, 95 per cent of all visitors attempted to see its natural wonders on a limited tourist schedule, park officials declare, and it is this tendency that the new regulations are intended to discourage.

ANNOUNCEMENT

THE WHITE PELICAN MILLINERY AND BLOUSE SHOP IS NOW LOCATED IN THEIR NEW STORE, 1134 MAIN ST., NEXT DOOR TO MONDALE THEATER. FOR OPENING WEEK WONDERFUL LINE OF TRIMMED SPORT AND STRAW HATS, PRICES \$7.50 TO \$12.50. ALSO JUST RECEIVED WONDERFUL LINE NEW DROP STITCH TRI-COLETTE BLOUSES, \$9.50.
