TEACHER SUPPLY INADEQUATE TO STATE'S NEEDS

In asking the state of Oregon to vote favorably for the two-mill elementary school measure, popularly known as the Children's Rights Bill, the teachers of the state of Oregon are not asking for an increase in salary. They are merely working for a fair and equal distribution of taxes for the support of these basic schools, that the entire state will be taxed and not only the organized school districts, as at present is the case.

The shortage of teachers in Oregon is growing so rapidly that the situation is alarming in the extreme. Last year 100 schools were closed, and in these 100 schools, 230 rooms were closed and close to 4000 pupils were unable to have the instruction that rightly should have been theirs. What was the cause?

It was due entirely to a shortage of teachers. Why? Because the teachers are being underpaid and are leaving the profession for better-paid work. They have to do this. Some day Oregon must come to the rescue of the teacher. Now, it is being asked to save the child, the voter of tomorrow. Do we want him educated? Sure. Only recently in New York did the question of raising the teachers' salaries come up before the legislature and it was due to a lack of sufficient information as to the extent to which they should be increased, and the ability of communities to pay increases have led the legislative leaders to decide to postpone final revision of the teachers' salary law until another session.

The temporary readjustment of salaries will fix the minimum rate for the rural school teacher at \$850, while in the larger country districts the lowest paid elementary teachers will get \$900. The minimum in elementary schools in third-class cities will be \$1,100 instead of \$820 as at present, and that in high schools \$1,250 instead of \$940. Second-class cities must raise their minimum salary of elementary teachers from \$800 to \$1,200, and that of high school teachers from \$1,000 to \$1,400.

In order to prevent New York City draining the adjoining cities of teachers, Yonkers, Mount Vernon, White Plains, and New Rochelle are to be required to pay within \$550 of the rates in effect in New York City. Flat increases of \$550 over the March 1 rates are mandated upon Syracuse and of \$400 on Buffalo and Rochester. These higher salaries will do much to make the teaching service more attractive.

The New York City rates are to be fixed by a committee now at work upon the problem of determining how the city's quota of the direct state tax of 1 1/2 mills—\$12,000,000—shall be distributed among more than 24,000 members of the supervising staff. The average increase of \$500 would seem small in comparison with the other increases were it not for the fact that the governor last month signed a bill giving the New York City teachers an increase on June 1. Six thousand six hundred and three teachers will receive from 30 to 40 per cent more pay than they received on Dec. 31, 1919, while 6,550 others of a total of 24,123 will have their salaries increased from 50 to 60 per cent. But the minimum salary on June 1 will be only \$1,005.

In redrafting the provisions of the state-wide salary bill affecting New York City the joint legislative committee to which the task was assigned has raised this minimum to \$1,500 and has so revised other salaries that those grades of the service where the chief shortage of teachers exists shall offer salaries that will attract and hold the best teachers. In no other way can the standards of teaching be maintained, not to say improved.

When the legislative committee reports next year whatever other grades of the service have not received due and proper consideration can be provided for in the general salary increase measure.

WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash poisons and toxins from system before putting food into stomach.

Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food taken into the stomach nearly an ounce of waste material must be carried out of the body. If this waste is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts, which should suck only nourishment.

A splendid health measure is to drink, before breakfast each day, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash those poisons from the stomach, liver, kidneys and bowels; thus cleansing, sweetening and freshening the alimentary canal before eating more food.

A quarter pound of limestone phosphate costs but very little at the drug store, but is sufficient to make anyone an enthusiast on inside bathing.

SCHOOLS ARE UNABLE TO GET INSTRUCTORS

Superintendent Spaulding of Cleveland Board Decries Small Salaries.

Men teachers are disappearing from the schools of Oregon.

Thirty years ago there were as many men as women in elementary schools. Now the ratio is four men to six women.

Cleveland, Ohio, finds it impossible to secure men teachers of manual or physical training for elementary schools because of low salaries.

These facts are presented to Cleveland teachers by Supt. Frank E. Spaulding in an article being distributed to them for information in connection with their study of the salary questionnaire recently sent out.

The remedy in Oregon is the two-mill levy.

Significance is lent to the situation by a recent resolution of the Schoolmasters' Club of Cincinnati deploring the condition nationally and stating "the influence of men is considered necessary for the proper education of American youth."

The resolution asks the National Educational Association to bring before the public and its school officials the seriousness of the situation.

Probably without a parallel in the shoe making industry is the record of service of Mrs. Lydia Ann Varney, who for fifty-six years has been a shoe worker in Brockton, Mass. For twenty-two years she has been working in the same factory and at the same machine.

Mount Holyoke College has a new club whose membership is confined to students and faculty members whose grandmothers studied at the college. Dating back to 1836, Mount Holyoke is one of the few women's colleges which have been in existence long enough to boast of three generations of students.

The American men and women must guard constantly against kidney trouble because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out, they weaken from overwork, become sluggish; the eliminative tissues clog and the result is kidney trouble, bladder

weakness and a general decline in health. When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times a night; if you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidney; to neutralize the acids in the urine so it no longer is a source of irritation, thus ending bladder disorders. Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia-water beverage, and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.
