Recent comparative tests have shown that ethylene is a good substitute for acetylene in cutting and welding operations. As far as heat of combustion is concerned ethylene has a slightly higher coefficient.

A use for waste products of the coal mines, such as coal dust and slack, is claimed to have been found by the inventor of a process for turning these products into a patent fuel which is declared to be cheaper and more satisfactory than coal in its natural state.

A Classified Ad will sell it.

### BETTER CROPS BY SEED TEST

O. A. C. EXPERIMENT STATION, Corvallis, May 19.—Farmers all over the state have taken advantage of the opportunity to have seeds tested for purity, germination and identification this year to a larger extent than ever before. Samples received since July 1, 1919, number 2,645 while last year the figure was 1,495.

Farmers and commercial seed growers are beginning to realize the great difference in crop results obtained from tested seed, and are increasing their farm production. Extensive examination of seeds for purity and germination has been made by the station for the northwest which includes Oregon, Washington, Idaho, Utah, Montana and Wyoming. This is the region designated by the government to be served by these laboratories. Seedsmen, individuals, county agents, and others have sent in samples.

As custom houses are not permitted to allow most forage crop seed to enter without passing the germination and purity tests, a quantity of forage crop seed is sent from the custom houses in Montana, Seattle and Portland, respectively. Approximately 125 samples have been sent in by the custom houses.

The test for vitality is one of the outstanding helps. The percentage of foreign seed is not only determined in the purity test, but the foreign seed, itself, is identified. Tests for purity have been largely with alfalfa, red clover, alsike clover, sweet clover, crimson clover and vetch. Grasses such as English rye grass, Italian rye grass, orchard grass, timothy, Kentucky blue grass, Canada blue grass, Red top and Fescue, also receive the purity test. Cereals are tested.

The purity test is made on the percentage basis, determining the amount of weed and foreign seed and of inert matter. In tests for germination, a count of the original number of seed is taken, and then the number of sprouts on each seed. The largest part of the germination work has been in testing vegetable seed.

Probably the only woman in America engaged in the manufacture of nitro-glycerine is Mrs. Claire W. Stokes, of Petrolia, Ont., whose factory turns out large quantities of the material, used principally in torpedoing oil wells.

### THOROUGH WORK

How a Klamath Falls Citizen Found Freedom From Kidney Troubles. If you suffer from backache—From urinary disorders—Any curable disease of the kidneys. Use a tested kidney remedy. Doan's Kidney Pills have been tested by thousands.

Klamath Falls people testify. Ask your neighbor: "Can you ask more convincing proof of merit?" Mrs. J. A. Harrison, 320 9th St., Klamath Falls, says: "I can certainly recommend Doan's Kidney Pills for I know they are just as represented. My kidneys were weak and I suffered with such backaches that I could hardly keep on my feet. Frequent headaches kept me miserable and my kidneys acted irregularly and unnaturally. I used Doan's Kidney Pills and they soon relieved the backaches and other signs of kidney complaint."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Harrison had. Foster-Mulburn Co., Mfrs., Buffalo, N. Y.
