

24 Rounds of High Class BOXING

FRIDAY NIGHT, MAY 21

under the supervision of the Klamath Falls boxing commission

HOUSTON OPERA HOUSE

Program starts at 7 o'clock
Seats now on sale at the Rex cafe, \$3.00 for ringside, \$2.00 general admission, including war tax

Young Souza vs. Trench King, 118 pounds, 10 rounds
Bobbie Allen vs. Young Eaton, 144 pounds, 6 rounds
Red Moore vs. Joe Blackburn, 145 pounds, 4 rounds
Bearcat vs. Kid Covert, 105 pounds, 4 rounds

OWNERS WILL RUN ROADS O. K. SAYS WILLARD

NEW YORK, May 21.—Confidence in the future successful operation of the railroads of the United States under private ownership control was expressed by Daniel Willard, president of the Baltimore and Ohio Railroad company, in an address he delivered here today before the National Association of Manufacturers. If the new railroad law is applied as congress intended and if the railway managers so operate the properties as to fairly meet the requirements and expectations of the public, he said, "we may reasonably expect that private ownership and operation of the railroads as an economic policy will continue in this country. If private ownership should fall the only alternative I am able to see is government ownership and operation, with all that the policy implies. Railway managers must for a time at least keep constantly in mind that private ownership is on trial and they must be determined that it shall win. They must study the needs of the public for transportation and make every reasonable effort to satisfy them. They must treat all alike and without discrimination."

Mr. Willard repeated his recommendation made to the council of national defense in 1917 that "a nation should have a national transportation system and such a system should embrace and make proper use of all available and suitable agencies." He added that in his opinion, his recommendation which he made as a war measure is equally pertinent and important in time of peace.

"We are fortunate in actually having in this country the essential elements of such a national system of transportation as I have in mind," said Mr. Willard. "There should, in the public interest, be the fullest cooperation between the several transportation agencies and in all cases that agency should be preferred which can render the required service at the lowest total economic cost. If this policy is followed I feel confident of the future success of private ownership and operation of the railroads."

Having described the difficulties of the railroads in obtaining funds necessary for improvements, extensions and equipment which he said had been estimated at from \$500,000,000 to \$1,000,000,000 a year, Mr. Willard said congress by enacting the Each-Cummings bill, had corrected the "poorly contrived system of regulation which brought about a sickly condition of the railroads" but that "the patient is still weak and unable to stand alone." Personally, he said, he was in favor of the government naming the rate of return upon the value of the properties which the railroads shall be permitted to earn, but he declared that "the railroads must be self-supporting before they can be expected to show signs of renewed vigor."

"First of all," declared Mr. Willard, "the railroad rates and charges must be so adjusted as to measurably

mean the increased operating costs resulting from conditions created by the war. Congress has given definite instructions that this be promptly done." After that he said it would remain for the railway managers to "so deal with the problem as to satisfy the reasonable requirements of the public. People in this country," he went on, "in the past have had the cheapest transportation in the world. I think they are entitled to it in the future; at any rate I believe that under private ownership they will have it. They are also entitled to adequate transportation, and there is an imperative obligation upon the carriers to furnish it. Inadequate transportation facilities would check production and tend to increase the cost of living."

Mr. Willard predicted that strikes upon the railroads would become less and less frequent as time went on since, in his opinion, congress had provided a definite and workable arrangement that should secure justice to the railway workmen.

"The public," said President Willard, "is entitled to expect an uninterrupted operation of railway properties. I believe the railway managers and the employes will be able satisfactorily to solve this (labor) problem. Perhaps, not immediately, but within a reasonably near future. If not, then to my mind, it will be the clear duty of congress to pass some kind of a law that will make the stoppage of railway trains because of labor disputes, impossible."

Several sections of Iceland are rich in agates and chalcedony, which are widely used in making jewels for the bearings of watches and electrical instruments.

A new electric cloth-cutting device has a thin circular knife which revolves at a rate of six thousand revolutions per minute and cuts thru many thicknesses of the cloth.

The honey crop of the United States is estimated at 250,000,000 pounds, which at the present high price means a value of fully \$50,000,000.

A South African engineer is the inventor of a machine which he claims will solve the very difficult problem of cutting sugar cane by mechanical means.

In the early days Massachusetts was the chief seat of the iron industry in the American colonies, the first successful blast-furnace having been put in operation at Lynn in 1642. In 1750, Pennsylvania became the leading iron-producing state, and maintained the supremacy for upwards of a hundred years.

STOVE CO. REBUILDS

PORTLAND, Ore., May 21.—As did the phoenix, so did the Portland Stove works—it rose from the ashes. Four months ago the plant was totally destroyed by fire; today its 20 workmen are installed in a new building preparing castings for stoves that will be ready for delivery within a few days. The structure contains an additional floor, although covering the ground space of the old plant, and will accommodate almost twice as many men. Plans are being made to add to its products pipeless furnaces and blue, gray and white enameled ranges.

MAKERS' DIRECTORY

PORTLAND, Ore., May 21.—The where and why of every manufactured article put out in the state can be ascertained on short notice through the directory of Oregon manufactures just issued by the Associated Industries. This volume is indexed both as to location and product and copies have been sent to all parts of the world and placed in every library in the state.

SHEARING IN UMATILLA

PENDLETON, Ore., May 21.—Sheep on the Umatilla ranges are now losing their winter coats, as shearing is in full swing. An average yield is expected. Practically all sales will be conducted through auctions in Portland warehouses.

NEW PAPER WAREHOUSE

PORTLAND, Ore., May 21.—An addition to the paper warehouse colony here will be the Independent Paper Stock company of San Francisco, which has purchased half a block in Portland. It is soon to erect a two-story building on this site.

LOGGING STARTS

EUGENE, Ore., May 21.—Logging operations have been opened up by the Oshkosh Lumber company a short distance above Mabel. Equipment formerly used in the Sweet Home country will be installed by the owners.

ROOM FOR PRUNES

DALLAS, Ore., May 21.—Plenty of room for storing the 1920 prune crop will be provided through the construction of a plant by the Oregon Growers' Co-operative association at this city. A piece of ground has just been acquired for a building site.

From 60 to 70 per cent of the world's production of copper is used in normal times in the electrical industry.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

Try Freezone! Your druggist sells a tiny bottle for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Freezone is the discovery of a noted Cincinnati genius.

Drinking a Glass of Hot Water is a Splendid Habit

Cleanse and sweeten the system each morning and wash away poisonous, stagnant matter.

Those of us who are accustomed to feel dull and heavy when we arise; splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, lame back, can, instead, both look and feel as fresh as a daisy always by washing the poisons and toxins from the body with phosphated hot water each morning.

We should drink, before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it to flush from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary tract before eating more food.

The action of limestone phosphate and hot water on an empty stomach is wonderfully invigorating. It cleans out all of the sour fermentations, gases, waste and acidity and gives one a fine appetite for breakfast. A quarter pound of limestone phosphate costs very little at the drug store, but is enough to make anyone who is bothered with biliousness, constipation, stomach trouble or rheumatism an enthusiast on internal sanitation.

WEATHER RECORD

Hereafter the Herald will publish the mean and maximum temperatures and precipitation record as taken by the U. S. Reclamation service station. Publication will cover the day previous to the paper's issue, up to 5 o'clock of that day.

About two hundred years ago Englishmen were the finest diamond cutters in the world, and the trade was nearly all carried on in London. Through religious persecution the cutters migrated to Amsterdam, where they have since remained.

TINWARE

You may never have realized, in these times of high prices and scarcity of aluminum and enamel ware, the important part tinware plays in the life of the housewife. She cannot make those delicious pies and cakes, nor that delightful homemade bread without something to bake them in, and the pie tins, cake tins and bread tins afford her an opportunity to procure them at a very reasonable price, enabling her to still give her family the comforts of life.

Tinware also enters into the life of the camper who wants to get up an outfit as cheap as possible and yet have the necessary comforts of travel. The tin cups, plates, tin spoons, fry pans, pails, etc., that can be bought at this store still insure you of an inexpensive outing.

Below we give you a list of the many items that we carry in the line of tinware, probably just the articles you have been intending to buy for a long time and didn't know where you could get them at popular prices.

Pie Tins, 5-in. to 10-in.....	5c-15c ea.
Clean Cut Cake Tins, 9-in. to 10-in.....	15c ea.
Gem Pan, 6-cup.....	25c ea.
Gem Pan, 8-cup.....	30c ea.
Gem Pan, 12-cup.....	50c ea.
Pudding Pans, 1-qt. to 10-qt.....	10c-40c ea.
Dairy Pans, 1-qt. to 10-qt.....	10c-40c ea.
Dish Pans, 8-qt., 10-, 12-, 14-qt.....	25c-35c ea.
Dust Pans.....	15c-20c ea.
Fire Shovels.....	15c-20c ea.
Stove Pokers.....	15c ea.
Bread Tins, all sizes.....	15c-25c ea.
Tin Cups, 1/2-pt., 3c; 1-pt., 3 for.....	25c
Milk Strainers.....	25c-35c ea.
Milk Skimmers.....	10c ea.
Mail Boxes.....	20c ea.
Covered Pails, 2-qt.....	20c ea.
Cookie and Doughnut Cutters.....	5c-10c ea.
Wash Basins.....	25c-30c ea.
1-Cup Flower Sifters.....	15c ea.
Metallic Sieve.....	25c-30c ea.
Wire Strainers.....	5c-20c ea.
Wire Extension Strainers.....	20c-25c ea.
Stove Lid Lifters.....	5c-10c-15c ea.
Candle Sticks.....	15c ea.
Match Boxes.....	10c-15c ea.
Comb Cases.....	20c ea.
Asbestos Mats, metal rim.....	10c-15c ea.
Tin Lids, 6-in. to 15-in.....	10c-20c ea.
Graters.....	5c-25c ea.
Steel Fry Pans, 6-in. to 12-in.....	15c-40c ea.
Wire Toasters.....	10c-20c ea.
Potato Ricers.....	40c ea.
Tin Cooking Spoons, 10-in. 12-in. 14-in.....	10c-25c ea.
Tin Teaspoons, 3 for.....	5c
Mixing Spoons.....	15c ea.
Sink Strainers.....	25c ea.
Funnels.....	10c-20c ea.
