PORTABLE SCHOOLS

SAVANNAH, Ga., May 29.—The Board of Education of Chatham county, of which Savannah is the county seat, expects to buy a number of portable school houses to meet the congested condition of the public schools. Each will accommodate 50 pupils and cost about \$1,000.

In the English village of Stivehall may be seen a church that possesses the unique distinction of having been built by the unaided efforts of one man alone. The man was a stone-mason and took seven years over his task.

Canada has paid an average of over \$600 to her over-seas service troops, voted \$40,000,000 for needy soldiers, spent large sums in establishing a re-education system for returning soldiers, and advances \$7,500 to each man who takes up farming. Nevertheless, a large body of veterans is agitating for an additional \$2,000 for each one who served on the front, \$1,500 for any who got only to England, and \$1,000 for service in Canada. The Government declares it will not pay these sums, estimated to total \$300,000,000.

A Classified Ad will sell it.

HAVE MOVED TO NEW CENTRAL HOTEL BUILDING

834 Main Street

Phone 375

YOUR FINEST FURNITURE pictures, china, cut glass, etc., will be safely transferred to your new home if we do the moving. Our men are skilled handlers of fine household effects and are as careful as they are expert. The usual loss incurred in many movings will be entirely eliminated if we are entrusted with the work of removal. Phone call. **Western Transfer Co.** 708 Main Phone 197; Res. 9942

LARGEST SHIP SOON BUILDING

QUINCY, Mass., May 29.—The keel of the world's biggest warship will be laid down here within six months. The battle-cruiser Lexington, combining in a degree unequalled by any ship of war now built or building the qualities of powerful armament and high speed, has taken form in drawings and awaits the arrival of materials to be advanced from the hands of the architect to those of the builder. By fall, it is estimated, the prospective queen of the United States navy will become a ship under construction instead of an ambitious plan.

The Lexington is the name-ship of a class of battle-cruisers which will give Uncle Sam within four years a fleet of six big-gun fighting ships unmatched by anything then afloat. Her sister-ships, the Constellation, Saratoga, Ronger, Constitution and United States, are also under contract. They bring names out of the old navy with which to develop for the first new capital vessels of the post-war fleet a traditional background for fresh exploits.

With the others of its class, the Lexington will be a whale of a ship. It will displace 43,200 tons and will have the power of 180,000 horses, as measured in mechanical terms. Its length of 874 feet is within 46 feet of the length of the Leviathan, monster passenger liner. The 161.4 feet of width of the Lexington will make that floating gun platform broader than any passenger ship.

The Lexington, which is to be equipped with electric drive, will attain a speed of 35 knots. This cruiser speed, higher than that of many destroyers, is the object of much of the designing that entered into the creation of the Lexington class. Armour will be sacrificed to make possible the 35 knot speed—the main belt being only five inches thick at its maximum as compared with the 12 inch steel belt on most battleships, but armament will be of tremendous power. The Lexington thus will have not only the strategic advantage of high speed but will be able to fire a heavier charge over a greater distance than any other battleship for which the plans are known.

The Lexington in action will speak with a voice of 16-inch guns, of which she will have eight. The navies of Great Britain, France and Italy contain no gun greater than 15 inches and that of Japan includes 16-inch guns only on battleships of 24 knot speed which are now under construction. Unlike the dreadnought class' reliance on big guns exclusively, the Lexington will carry 16 six-inch guns as a secondary armament.

Taking a page from the naval lessons of the war, the designers of the Lexington have equipped the ship with four anti-aircraft guns, eight torpedo tubes, four of which are submerged and four on deck and with means of defense against aerial bombs and aerial torpedoes. Defense against submarine torpedoes will be obtained through fore and aft torpedo defense bulkheads, by which the stability of the vessel will be preserved no matter where she is pierced. Under any conditions but an explosion, it is claimed, the Lexington class of warship should prove unsinkable.

An indication of the Lexington's greatness is afforded by comparison with British warship Hood, which when it is floated will be the biggest ship in the British navy and afloat.

	Lexington	Hood
Speed	35 knots	31 knots
Displacement	43,200 tons	41,200 tons
Length	874 feet	860 feet
Horsepower	180,000	144,000
Big guns	8 16-inch	8 15-inch
Main armor	5 inch	12 inch

GERMAN SCHOOLS TO ABOLISH FLOGGING

BERLIN, May 19. (By Mail).—Corporal punishment in German schools is to be abolished says a decree just promulgated by the Ministry for public instruction. The decree declares that caning and other forms of castigation are inconsistent with the spirit of the times and should be discontinued altogether in favor of moral suasion. It is added that in no case girls should be subject to corporal punishment. In a year from now, a report is to be made by schoolmasters and mistresses on the effects of moral suasion upon the German youth.

The earliest fabric which deserves the name of lace was probably made in Egypt. The most of the "lace" mentioned in the early Bible ages was in reality a sort of embroidery and not lace in the ordinary sense of the word.

Now is Your Chance to Cut Down Your Expenses

The Central Hotel

will rent a limited number of rooms to permanent guests. These rooms are furnished with the best beds that money can buy. They are clean, tidy and well ventilated, and will be kept so.

There will be hot and cold water, tub and shower baths. Restaurant and barber shop will be in the building and everything will be done to make it comfortable, convenient and homey.

The Hotel is now open for business. The restaurant and barber shop will be ready early in June.

The purpose back of this hotel is to furnish to the workingman of Klamath Falls a place where he can live decently and cleanly and at a price that will be within his reach. The owners of this hotel feel that they have done this.

BUENOS AIRES WANTS BETTER ACQUAINTANCE

BUENOS AIRES, April 20. (By Mail).—After visiting various parts of the United States and lecturing at several American universities, Alejandro Bunge, director general of statistics in Argentina and one of the Argentine representatives at the Pan American Financial congress, returns to Buenos Aires, astonished that so little is known in the United States about his country.

The idea is still generally prevalent among North Americans, he says, that Argentina is inhabited by half-breeds, negroes and Indians.

"Naturally," he told a reporter for La Razon, "in banking, industrial and commercial circles, they know us as a great and rich country and with a great future. But outside these circles, the generality of people do not know us. In no other way can be explained the astonishment that was expressed by many persons on numerous occasions to learn from the Argentine delegates that the majority of our population is of the white race. It is believed that in these regions the dominating element is mestizo (mixture of Spanish and Indian) and that there are many negroes and mulattos.

"Happily a group of bankers and distinguished men have undertaken the task of making known to their compatriots through disinterested propaganda the truth about Argentina and the promise of its future."

Argentine government statistics show that nearly 90 per cent of the 8,000,000 inhabitants of Argentina are pure Caucasian, a larger proportion than exists in the United States or, it is said, any other American republic.

SOCIETY WILL STUDY OLD CIVILIZATION

PHILADELPHIA, May 29.—Distinguished archeologists have organized here the Maya society, the object of which is the study of the Indian races of Mexico and Central America. Particular attention will be given to the period of civilization when great cities are believed to have been built there more than 2,000 years ago, the ruins of many of which dot the forests of Yucatan. First efforts, it was stated, will be directed toward discovering a key to the Maya hieroglyphs.

SALTS FINE FOR ACHING KIDNEYS

We eat too much meat which clogs Kidneys, then the Back hurts

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders. You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulates them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious complications.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

If the Wood Dealer Sold Service

We do not sell current; we sell service. That sounds odd doesn't it?

Well, suppose the wood dealer sold service instead of wood, he would tend to your furnace and your range, take away the ashes and clean the flues. You would buy so much heat.

Now you buy so much light, although you pay according to the current you consume. But the service is performed for you by this company at the substations and power plants.

That is what we want to give you—efficient service. It is the aim of this company to have none but satisfied customers. No matter what it is, if you have a grievance, or are dissatisfied about your bill or do not understand our rates, please come in and see us or write us about it.

If you have any suggestions to make, we will gladly avail ourselves of them as our aim is constantly to improve our service to you as fast as the development of science and human ability permit.
