

Western Floral Shop

FOR YOUR LOVED ONES

living and departed, flowers are the logical, natural tribute of esteem and affection. Being Nature's loveliest gift to man (except woman), you cannot show your feelings in a tenderer way than by means of floral gifts.

POT POURRI

By LONE STAR

Someone told Lone Star yesterday that Cap. Siemens was going to get oil if he had to bore 35,000 feet for it.

One of our local citizens tells the following story, and he stated to Lone Star that it happened in a very prominent local home. "It occurred in the evening. I and several others were calling. As we chatted in the parlor we heard the patter of little feet at the head of the stairs above.

Funny how women used to go to Paris for the styles, isn't it? They seem to be going to Africa for them now.

Al Sloan asked the Lone Star if short shirts had come into style again. We replied that since those tight sweaters have come into vogue, we had not given the matter a thought.

There is something in being as young as one feels, but there is nothing in being as rich as one feels.

A story is told of little Willie who always used to end his prayers with this: "Please God, send me a baby brother." After praying for the baby brother for some months, Willie got disheartened, and said one day "I don't believe God has got any more babies to give away.

A fellow edged up to Lone Star this morning, and in a subdued voice, asked: "Do you want a bottle?" "Bottle of what?" we inquired. "Gasoline?"

How do you like that Antidiluvian? Hear it 7,000 years ago, too?

Lone Star has been looking around very carefully for "cut-prices" but so far has been unable to discover one that has been even scratched.

No doubt our virtuous Antidiluvian heard that one a hundred years ago, too. That is—to hear him talk.

He barely knows his A. B. C. Nor does he wear a B. V. D.

Here's one that starts off as it would just suit our unknown? friend, so we will spring it on you.

Until he signed an I. O. U. And he got wise then P. D. Q.

So now he buys stuff F. O. B. Unless they send it C. O. D.

Improving—are we not, Antidiluvian?

Say folks—what do you think about a "Barefoot club"? We do not see how such a club could advance the prices of shoes. If no one in America will wear a shoe until August we guarantee that ladies pumps with no more leather in them than there is paper in a postage stamp will not sell for \$20 and up.

Dr. Murphy, the public health service surgeon, has gone—but he's not forgotten by any means. Also—he says he is coming back—but we doubt it. Guess Murphy and Andy Soule had a merry time for a few days, but things are nearly normal once more, and business is going on as usual.

There are just two points which stand out pertinently regarding that time honored question of prostitution, and they are these. Can it be done away with—and if so, how?

As long as this old globe has revolved on its axis, and possibly longer, the inhabitants of it have had to face that question. If you remember, the first thing old Noah did when he came out of the Bird-cage, was to celebrate. Naturally he took to wine, although Lone Star has never yet been able to figure out just where the wine came from if everything on the earth was destroyed by the flood. But that's aside from the question.

We know this—the first thing old whiskers did, was to get a beautiful bun on, and, as we would naturally expect, there was also a woman in

THEY CAN SAVE YOUR GRAIN FROM SMUT

The Department of Agriculture at its experimental farm at Arlington, Va., wages an unceasing warfare against the deadly grain smut. It is estimated that smut which could be prevented every year destroy enough wheat to make four million barrels of flour. One bushel of smutted wheat is worth only one-third as much as the clean grain. This picture shows experts tabulating results in various cases—the information which all grain growers may have by writing to the Agricultural Department at Washington.

RED CEDAR COMPOUND

Keeps moths out of clothing and furs. A mixture of Red Cedar Chips and Moth Flake. Cheaper and more effective than moth balls. Large package 25c

STAR DRUG CO.

R. E. DEWEENE P. S. POPE

JAPAN HOLDS HAWAIIAN BORN TO ARMY DUTY

HONOLULU, T. H., May 22. (By Mail.)—Although the Japanese government has made some concessions in the matter of the release of Hawaiian-born Japanese from Japanese citizenship, it still holds physically fit males between seventeen and twenty years of age liable for military service, according to an announcement by the department of public instruction of the Territory of Hawaii.

Associations of Hawaiian-born Japanese have forwarded a plea to the Tokio government to be released from the dual-citizenship obligations imposed by the Japanese regulations and also have asked President Wilson to present their case at Tokio.

The original Japanese law classed all children of Japanese parents, regardless of where born, as Japanese citizens, but an amendment in 1916 allowed foreign born Japanese to drop their citizenship under certain conditions.

The following data concerning the filing of petitions for release from Japanese citizenship by Hawaiian-born Japanese was gathered by the department of public instruction: Applicant must have been born in Hawaii, must be an American citizen and must be residing in Hawaii.

Male and female applicants under seventeen years of age are accepted without restriction.

In order to become legally discharged from Japanese citizenship obligations, consent must be obtained from the secretary of the interior, Tokio.

Other proposed changes in the territorial laws being considered by the chamber of commerce include: A provision that the department of public instruction, before issuing a certificate to and teacher, shall satisfy itself that such teacher possesses ideals of democracy and has a knowledge of the English language, American history and methods of

JAPAN BIG BUYER OF BEND CEDAR

BEND, Ore., June 9.—Though it looks exactly like rotten cordwood and would be passed upon as valueless by a casual observer, a class of timber that has been moving out of here in carload lots brings a high price for a peculiar purpose. The timber in question is seasoned—too well seasoned it appears—juniper, on its way to Japan to be made into pencils. The rotteness of the log is, the softer is the surrounding wood, and the better pencil stock it makes, so the Japanese manufacturers like it that way. Though the use of weathered juniper for pencil stock is still in its experimental stages, large quantities of this wood have been moving out of here for shipment to Japan on steamships running from Portland to the Orient.

WILL MAKE PAPER OF ALASKAN FORESTS

JUNEAU, Alaska, May 1. (By Mail.)—Paper plants are soon to invade Alaska's thousands of acres of pulp timber, according to reports received here. One plant, the first pulp mill to be established in Alaska, is to be erected on the Speel river, 36 miles from here, by a Juneau company. Another company is planning to build at Peferburg, Alaska, south of Juneau.

Increased Efficiency

in your wardrobe is most easily attained by sending your clothes to us to be cleaned and dyed. We remove all soiled spots and restore the garment to its former state. You'll never know how much good wear remains in that suit unless you let us renovate it for you.

KLAMATH DYE WORKS 481 Main St. Klamath Falls, Ore.

the case. The bible assures us that such was a fact. And the good book assures us who that woman was—but we will not go into that. The fact remains that Old Brother Noah celebrated, and celebrated in good shape too, after his incarceration in the wash-tub. If Murphy had been alive then and stuck around, he might have been useful.

Now, folks—listen. Old Noah was the only man found to be righteous in the sight of the Lord, and for this reason, he was saved from the flood. Now—either the Lord approved of that kind of righteousness—or Old Man Noah had the Lord buffaloed. Either one of the two. Which one, deponent sayeth not.

Now then—which was it?—and it's too big a question for us to answer. The fact which I want to bring out though, is, that in those days, a righteous man committed the very crime which Dr. Murphy and thousands of others are trying to stamp out. And from that day to this—increasingly, as the years go by, that same sin has been committed.

No folks, as long as men and women are constituted as they are, prostitution will flourish, and all the laws, and all the preachers, and all the schemes of mice and men will "gang aft aglee" as far as stopping it is concerned.

If it is an evil which cannot be eliminated, as it seems to be, then let it be kept under control. By no means let the game be carried on indiscriminately, as that would be rank folly. But—and if it has to be—then let's make as harmless an evil out of it as we can.

Certainly it is wrong, for women, proved to be infected with disease, to be allowed to ply their trade without restraint. We would like to see the world rid of it altogether—but we will never see that. Next to that we would like to see the laws made so stringent, that the danger of infection is reduced to the lowest possible minimum.

As far as Dr. Murphy's trip is concerned, we will say this. Two weeks after Dr. Murphy has left here, the place will be running as wide and open as ever, if not more so, and all the Murphys between here and Murphytown, will never be able to stop, or even control it until we get some

local authority that will put his foot down on it, regardless of public opinion.

If the people of Klamath Falls want a "Tules," let them put in office men which will allow a "Tules" to run. That bunch is in office now. But—if the people of Klamath Falls do NOT want a "Tules"—then let them put in office men who WILL NOT let a "Tules" run. There is only one place to decide these questions, and that is at the polls.

It's the devil's own job though, to get men and women to turn out to vote in a presidential campaign, let alone at a city election. This to the shame of the voters of Klamath Falls.

Then, when the question has been decided at the polls, let the side that loses keep their mouth shut, and not be everlastingly trying to agitate and start something that they cannot finish. If the populace of this city want an open town—let them vote for an open town, and if they want a closed town, let them vote for a closed town—AND THEN—when they have decided, let them go to it.

The easiest and surest way to repeal any law is to rigidly enforce it. So then, on trial the people it. So then—if, on trial the people decide that the open town is desirable, let them have it, and let those that don't want it, either keep quiet, or move. And vice-versa. See the point?

So you see Antidiluvian, we can talk sense once in a while too.

MUST TEACH ENGLISH IN T. H. SCHOOLS

HONOLULU, T. H., May 19. (By Mail.)—No language other than English shall be taught in any school, public or private, in the territory of Hawaii, in any grade lower than the seventh, says a draft of a proposed bill to be submitted to the next session of the territorial legislature by the chamber of commerce of Honolulu.

Other proposed changes in the territorial laws being considered by the chamber of commerce include:

A provision that the department of public instruction, before issuing a certificate to and teacher, shall satisfy itself that such teacher possesses ideals of democracy and has a knowledge of the English language, American history and methods of
