Maibohm Six

Lightning Speed, vibrationless power flow, sinky cushioning, exquisite body shape, and silky springs are most desired of motor car characteristics. Heretofore such features have had their associations in cars of great weight, huge engines and costly operation. Maibohm has succeeded in installing these excellent attributes and many more in a lighter car whose replacement parts are uncostly and whose fuel use is miserly. Come in for a ride. Allow us the pleasure of proving our assertions.
