## ANNAPOLIS FOUNDED IN 1604

Nova Scotia Earliest Colonized Land in North America, With Exception of St. Augustine.

Nova Scotia may lay claim to being the earliest colonized land in North America, with the exception of St. Augustine, Fla., where the Spanish establishment was made as early as 1565. Port Royal, now the little town of Annapolis, was founded in 1604, three years before the English settled at Jamestown. The brave French pioneers found it necessary to suspend their colony for three years, but the settlement was re-established in 1610 by a group of Acadians.

The Acadians were in almost constant conflict with the English. The colony fell into the hands of the English twice, and was each time returned to the French before the English finally captured it in 1710. The Acadians remained steadfast in their hopes that French rule would some day return, but their hope was destined never to be realized. They, however, persisted in maintaining their identity even against the English insistence that they abandon their allegiance to their mother country.

The descendants of the Acadians, numbering 300,000, are to be found in Maryland, Virginia, the Carolinas, Georgia and Louisiana. When the Acadians were expelled from the Basin of Monas, Grand Pre, when they refused to take the oath of fealty to the English sovereign in 1755, many of them escaped to the wilderness and later drifted back to their former homes only to find them occupied by new settlers from New England states.

## DEEP RESPECT FOR SAB3ATH

Writer's Recollection of How Day Used to Be Observed When He Was a Small Boy.

My mother was born and reared in a little country village in western New York. On the farm where my grandmother lived, it was the custom to begin Sunday on Saturday night at sundown. The "hired man" came in from the chores, grandmother put away all her work in the kitchen, and then the entire family gathered in the best room and studied the Sunday school lesson, or had a reading from the Bible, led by grandfather, and all the family retired not later than nine o'clock.

In the morning after doing none but the absolutely necessary chores on the farm, the team that had not been used the day before was hitched up to the big four-sected wagon and the entire family, including the "hired" help, went to church. There was preaching service in the forenoon, and then we adjourned to a lunch for ourselves and the team. Then we went in to a Sunday school service, and after an interval there was another preaching service, after which we hitched up and drove slowly back to the farm.

That was the way Sunday was kept in western New York a little more than fifty years ago. I can remember hearing my mother say that when she was a girl in the same New York state village, she was not allowed to walk except to the cemetery and back, on Sunday, and was not allowed to read any books except the Bible and "Fox's Book of Martyrs."—Christian Herald.

**Rebuilding Guatemala City.**  
Guatemala city, in the republic of the same name, which was the scene of one of the most violent earthquakes in Central American history, during the latter months of 1917 and the early part of 1918, is now being gradually rebuilt.

Guatemala was for centuries the home of the Maya-Quiche Indians. At Quirigua are located some of the most remarkable ruins in the Americas—monoliths resembling Egyptian obelisks, from the top of which gigantic faces stare at the intruder. Excavations in the vicinity have revealed the ground plan of what must have been a remarkable and imposing temple. A bulletin of the National Geographic society states that in the mountains of southwestern Guatemala live pure-blooded Indians who are known for their physique, cleanliness and scrupulous honesty.

A Classified Ad will sell it.

**WHEN YOU WAKE UP DRINK GLASS OF HOT WATER**

Wash poisons and toxins from system before putting food into stomach.

Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food taken into the stomach nearly an ounce of waste material must be carried out of the body. If this waste is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts, which should suck only nourishment.

A splendid health measure is to drink, before breakfast each day, a glass of hot water with a teaspoonful of limestone propephate in it, which is a harmless way to wash these poisons from the stomach, liver, kidneys and bowels; thus cleansing, sweetening and freshening the alimentary canal before eating more food.

A quarter pound of limestone phosphate costs but very little at the drug store, but is sufficient to make anyone an enthusiast on inside bathing.
