#### WILL LOWER RATE ON AIR TRAVEL

PARIS, June 27. (By Mail.)—Early announcement is expected of the reduction of passenger rates for air travel between London and Paris and many are wondering if the day is far distant when it may be cheaper to travel by air than by land and sea. At the beginning of the London-Paris air service last year the price for one way ticket on small fast machines was 20 guineas and 15 guineas on the larger passenger ships. It is now reported that fares will soon be reduced to £10, 10 shillings.

In one recent week's flying more than 100 passengers were carried in the London-Paris air service and it is hoped that a reduction in price will increase the number of passengers. There have been an ever-increasing number of inquiries for the service but the price has discouraged many prospective passengers.

#### DINING CAR MEALS TICKLE SOURDOUGHS

ANCHORAGE, Alaska, July 26.—Veteran "sourdoughs" who used to pay \$2.50 a plate for pork and beans without a merriment and to whom ham and eggs were a sure-enough luxury, take keen comfort in the buffet car recently placed on one of the trains operating between Seward and Anchorage. Tourists who have dined on Uncle Sam's roiling kitchen talk about the menu for a long time thereafter.

For an elaborate dinner of fresh mountain trout with a rasher of bacon the modest sum of \$1.25 is asked. Boiled or fried Matanuska potatoes are sold for 15 cents an order; grape fruit, orange and other fresh fruits are served for 25 cents and coffee costs 10 cents a cup. Meats are naturally a trifle higher than they are on the "outside," on account of the high cost of transportation, but, Alaska railroad officials believe, it will soon be possible to obtain home grown meat in abundance.

#### OPIUM GROWN IN DEFIANCE OF LAW

SHANGHAI, June 17. (By Mail.)—Opium is being grown extensively in ports of Fukien province despite the law against it, according to a mission worker stationed at Yenching. He writes to the Anti-Opium Society:

"At the city of Yungan, the headquarters of the southern forces, I found they were growing opium extensively; even in the grounds of the yamen itself the ground was white with poppy. I was told there were over 100 opium shops in the city licensed for one dollar per night marked 'places for the breaking of the opium habit.'

"The military are forcing the people to plant the drug and no matter what the value of the crop may be, they are to be taxed a definite amount."

#### CHICAGO UNIVERSITY MAN GETS MEDAL

LONDON, July 6. (By Mail.)—Albert Abraham Michelson, professor of physics in the University of Chicago, has been awarded the Albert Medal of the Royal Society of Arts for 1907, with the approval of the Duke of Connaught, the president, for optical inventions which have rendered possible the reproduction of accurate metric standards and provided the means of carrying out measurements with a minute precision hitherto unobtainable.

Professor Michelson's contributions to scientific research already have been recognized by the award of the Copley Medal of the Royal Society and of the Nobel prize for Physics both in 1907.

#### PLENTY OF PULP WOOD, ALASKA

PORTLAND, Ore., July 24.—Within the last 10 years the forest has brought about the sale of 420,000,000 feet of timber in the national forests of Alaska, for piling, sawlogs and shingle bolts.

The national forests of Alaska contain 100,000,000 cords of timber suitable for the manufacture of papers, according to estimates made by the forest service. Under careful management these forests can produce two million cords of pulpwood annually for all time, or enough to manufacture one-third of the pulp products now consumed in the United States.

The commercial trees of Alaska are western hemlock, Sitka spruce, Alaska cedar and western red cedar. Cottonwood, birch, lodgepole pine and white fir are also found in small quantities.

Work in the open is possible at all time of the year on the Tongass national forest, Alaska, but logging operations are not profitable in the short days of winter.

In 1918 145,583 cords of hemlock pulpwood and 35,385 cords of spruce were consumed in Washington, Oregon and California.
